Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. For States with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above.
(Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hour; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

(D) Withheld to avoid disclosing figures for individual companies.

(Z) Less than half of the unit of measurement shown.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|---|----------------------|----------------------|-----------------------|--------------------------------|--|-------------------------------------|-----------------------------|--------------------------------|-------------------------------|

¹These figures include the shipments of fabric gloves made in knitting mills (primary products of industry 2259) as well as the shipments of fabric gloves cut and sewn from purchased fabric. Industry 2381 shipments of fabric dress and work gloves in 1972 represent 96 percent of those products shipped by cut-and-sew shops. In 1967, the coverage ratio on this basis was 96 percent.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| 23890 00 | Apparel, n.e.c., n.s.k., for companies with 10 employees or more. (See note.)..... | | (X) | 23.6 | (X) | 17.8 |
| 23890 02 | Apparel, n.e.c., n.s.k., for companies with less than 10 employees. (See note.)..... | | (X) | 6.2 | (X) | 3.0 |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹Data for 1972 are as revised in the Current Industrial Reports, Annual Series MA23D, "Gloves and Mittens," 1973. Data for leather gloves will be shown in census report MC31B, Leather Gloves; Luggage; and Miscellaneous Leather Goods.

²These data are included with "All knit fabric, seamless," product code 22590 11, in order to avoid disclosing figures for individual companies.

³These data include "All woven fabric," product code 23811 11.

⁴Excludes rainwear made on Government contract.

⁵Includes rainwear made on Government contract and men's uniform raincoats.

⁶Does not include belts made and sold as parts of garments.

⁷20 to 40 percent of this item was estimated.

⁸Quantity for this item was estimated, based on unit-price relationship for all other items in this product class.

⁹Includes garter belts made in Puerto Rico, which are out-of-scope of the census of manufactures.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |
|--|---|-------|---|---|------|
| | 1972 | 1967 | | 1972 | 1967 |

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

- Represents zero. (NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at the individual product level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Establishments in this industry were requested to report value of production in 1958 and prior years rather than value of shipments.

³For purposes of comparability with prior years annual survey of manufactures data, the value of shipments of the knitting mills (SIC group 225) has been excluded. (See tables 5B and 6A.)

⁴Includes \$5.5 million of miscellaneous apparel not specified by kind.

TABLE 7. Materials Consumed, by Kind: 1972 and 1967

EXPLANATORY TEXT

MISCELLANEOUS FABRICATED TEXTILE PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2391—Curtains and Draperies
- 2392—Housefurnishings, Except Curtains and Draperies*
- 2393—Textile Bags
- 2394—Canvas and Related Products
- 2395—Pleating, Decorative and Novelty Stitching, and Tucking for the Trade*
- 2396—Automotive Trimmings, Apparel Findings, and Related Products*
- 2397—Schiffli Machine Embroideries
- 2399—Fabricated Textile Products, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2391.—CURTAINS AND DRAPERIES

This industry comprises establishments primarily engaged in manufacturing curtains and draperies from purchased materials. Establishments primarily engaged in manufacturing lace curtains on lace machines are classified in industry 2292, Lace

* Note that the "short title" for this industry is used throughout the report.

Goods. For a detailed list of products of industry 2391, refer to table 6A, product codes 23910 11 to 23910 58.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Curtains and Draperies Industry in 1972 totaled \$762.2 million. This included shipments of curtains and draperies (primary products) valued at \$581.1 million, shipments of other products (secondary products) valued at \$45.1 million, and miscellaneous receipts (mainly resales) of \$136.0 million.

Shipments of curtains and draperies (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent. Secondary products shipped by this industry in 1972 consisted mainly of housefurnishings, n.e.c., (\$31.7 million).

Shipments of curtains and draperies (primary products) from establishments classified in industry 2391 in 1972 represented 93 percent (coverage ratio) of these products valued at \$626.2 million shipped by all industries. In 1967, the coverage ratio was 95 percent. Other industries shipping curtains and draperies consisted mainly of industry 2392, Housefurnishings, N.E.C., (\$35.5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2391, these establishments accounted for 19 percent of value of shipments.

INDUSTRY 2392.—HOUSEFURNISHINGS, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in manufacturing housefurnishings such as blankets, bedspreads, sheets, tablecloths, and towels from purchased materials. Establishments primarily engaged in manufacturing curtains and draperies are classified in industry 2391. Establishments producing housefurnishings primarily of fabric woven at the same establishment are classified in industries 2211, 2221, or 2231, Textile Mill Industries, according to fiber. For a detailed list of products of industry 2392, refer to table 6A, product codes 23920 19 to 23929 53.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Housefurnishings, N.E.C., Industry in 1972 totaled \$1,517.9 million. This included shipments of housefurnishings, n.e.c., (primary products) valued at \$1,212.5 million, shipments of other products (secondary products) valued at \$213.3 million, and miscellaneous receipts (mainly resales) of \$92.1 million.

Shipments of housefurnishings, n.e.c., (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent. Secondary products shipped by this industry in 1972 consisted mainly of finished cotton broadwoven fabrics (\$20 to \$50 million), finished manmade broadwoven fabrics (\$20 to \$50 million), and curtains and draperies (\$35.5 million).

Shipments of housefurnishings, n.e.c., (primary products) from establishments classified in industry 2392 in 1972 represented 57 percent (coverage ratio) of these products valued at \$2,123.5 million shipped by all industries. In 1967, the coverage ratio was 52 percent. Other industries shipping housefurnishings, n.e.c., consisted mainly of industry 2262, Finishing Plants, Manmade Fiber and Silk, (\$100 to \$200 million) and industry 2391, Curtains and Draperies, (\$31.7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2392, these establishments accounted for 10 percent of value of shipments.

INDUSTRY 2393.—TEXTILE BAGS

This industry comprises establishments primarily engaged in manufacturing shipping and other industrial bags from purchased fabric. Establishments primarily engaged in manufacturing plastic bags are classified in industry 2643, Bags, Except Textile Bags; laundry, wardrobe, shoe, and other textile housefurnishing bags, in industry 2392; and luggage, in industry 3161, Luggage. For a detailed list of products of industry 2393, refer to table 6A, product codes 23930 11 to 23930 97.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Textile Bags Industry in 1972 totaled \$255.1 million. This included shipments of textile bags (primary products) valued at \$208.3

million, shipments of other products (secondary products) valued at \$15.5 million, and miscellaneous receipts (mainly resales) of \$31.3 million.

Shipments of textile bags (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent. Secondary products shipped by this industry in 1972 consisted mainly of bags, except textile bags, (\$11.0 million).

Shipments of textile bags (primary products) from establishments classified in industry 2393 in 1972 represented 90 percent (coverage ratio) of these products valued at \$231.5 million shipped by all industries. In 1967, the coverage ratio was 89 percent. Other industries shipping textile bags consisted mainly of industry 2643, Bags, Except Textile Bags, (\$11.3 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2393, these establishments accounted for 7 percent of value of shipments.

INDUSTRY 2394.—CANVAS AND RELATED PRODUCTS

This industry comprises establishments primarily engaged in manufacturing awnings, tents, and related products from purchased fabric. Establishments primarily engaged in manufacturing canvas bags are classified in industry 2393. For a detailed list of products of industry 2394, refer to table 6A, product codes 23940 21 to 23940 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Canvas and Related Products Industry in 1972 totaled \$276.4 million. This included shipments of canvas and related products (primary products) valued at \$240.0 million, shipments of other products (secondary products) valued at \$13.6 million, and miscellaneous receipts (mainly resales) of \$22.8 million.

Shipments of canvas and related products (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent.

Shipments of canvases and related products (primary products) from establishments classified in industry 2394 in 1972 represented 88 percent (coverage ratio) of these products valued at \$272.1 million shipped by all industries. In 1967, the

coverage ratio was 95 percent. Other industries shipping canvas and related products consisted mainly of industry 2399, Fabricated Textile Products, N.E.C., (\$10.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2394, these establishments accounted for 22 percent of value of shipments.

INDUSTRY 2395.—PLEATING AND STITCHING (Short Title)

This industry comprises establishments primarily engaged in pleating, decorative and novelty stitching, and tucking for the trade. Establishments primarily engaged in performing similar services for individuals are classified in service industries. For a detailed list of products of industry 2395, refer to table 6A, product codes 23951 12 to 23959 31.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Pleating and Stitching Industry in 1972 totaled \$306.3 million. This included shipments of pleating and stitching (primary products) valued at \$256.3 million, shipments of other products (secondary products) valued at \$34.6 million, and miscellaneous receipts (mainly commission receipts) of \$15.4 million.

Shipments of pleating and stitching (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent.

Shipments of pleating and stitching (primary products) from establishments classified in industry 2395 in 1972 represented 98 percent (coverage ratio) of these products valued at \$261.8 million shipped by all industries. In 1967, the coverage ratio was 95 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2395, these establishments accounted for 19 percent of value of shipments.

INDUSTRY 2396.—AUTOMOTIVE AND APPAREL TRIMMINGS (Short Title)

This industry comprises establishments primarily engaged in manufacturing automotive trimmings and apparel findings and related products. For a detailed list of products of industry 2396, refer to table 6A, product codes 23961 11 to 23963 49.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Automotive and Apparel Trimmings Industry in 1972 totaled \$1,133.0 million. This included shipments of automotive and apparel trimmings (primary products) valued at \$1,090.5 million, shipments of other products (secondary products) valued at \$17.3 million, and miscellaneous receipts (mainly commission receipts) of \$25.2 million.

Shipments of automotive and apparel trimmings (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 98 percent.

Shipments of automotive and apparel trimmings (primary products) from establishments classified in industry 2396 in 1972 represented 95 percent (coverage ratio) of these products valued at \$1,146.2 million shipped by all industries. In 1967, the coverage ratio was 93 percent. Other industries shipping automotive and apparel trimmings consisted mainly of industry 3465, Automotive Stampings, (\$20 to \$50 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2396, these establishments accounted for 6 percent of value of shipments.

INDUSTRY 2397.—SCHIFFLI MACHINE EMBROIDERIES

This industry comprises establishments primarily engaged in manufacturing Schiffli machine embroideries. For the product of industry 2397, refer to table 6A, product code 23970 12.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Schiffli Machine Embroideries Industry in 1972 totaled \$120.5 million. This included shipments of Schiffli machine embroideries (primary products) valued at \$98.2 million, shipments of other products (secondary products) valued at \$3.7 million, and miscellaneous receipts (mainly commission receipts) of \$18.6 million.

Shipments of Schiffli machine embroideries (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 98 percent.

Shipments of Schiffli machine embroideries (primary products) from establishments classified in industry 2397 in 1972 represented 99 percent (coverage ratio) of these products valued at \$99.1 million shipped by all industries. In 1967, the coverage ratio was also 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2397, these establishments accounted for 25 percent of value of shipments.

INDUSTRY 2399.—FABRICATED TEXTILE PRODUCTS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing fabricated textile products, not elsewhere classified. For a detailed list of products of industry 2399, refer to table 6A, product codes 23990 15 to 23990 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Fabricated Textile Products, N.E.C., Industry in 1972 totaled \$724.6 million. This included shipments of fabricated textile products, n.e.c., (primary products) valued at \$599.7 million, shipments of other products (secondary products) valued at \$72.8 million, and miscellaneous receipts (mainly resales) of \$52.1 million.

Shipments of fabricated textile products, n.e.c., (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 89 percent. Secondary products shipped by this industry in 1972 consisted mainly of housefurnishings, n.e.c., (\$16.2 million) and canvas and related products (\$10.9 million).

Shipments of fabricated textile products, n.e.c., (primary products) from establishments classified in industry 2399 in 1972 represented 82 percent (coverage ratio) of these products valued at \$733.9 million shipped by all industries. In 1967, the coverage ratio was 83 percent. Other industries shipping fabricated textile products, n.e.c., consisted mainly of industry 3714, Motor Vehicle Parts and Accessories, (\$50 to \$100 million) and industry 2392, Housefurnishings, N.E.C., (\$11.7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2399, these establishments accounted for 13 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|---|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (percent) | (percent) |
| | (number) | (number) | (1,000) | (million dollars) | (1,000) | (millions) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (percent) | (percent) |

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2391 | Industry 2392 | Industry 2393 | Industry 2394 | Industry 2395 | Industry 2396 | Industry 2397 | Industry 2399 |
|-----------|------------------|------------------|------------------|------------------|------------------|------------------|------------------|------------------|
| 1972..... | 1,540 | 1,058 | 188 | 845 | 894 | 644 | 466 | 796 |
| 1967..... | 1,393 | 1,189 | 177 | 846 | 1,104 | 762 | 605 | 799 |
| 1963..... | 1,092 | 1,205 | 175 | 869 | 1,315 | 746 | 755 | 1,027 |

(NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar of shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |
|--------------------------------|--|----------------------------|-------------------|------------------------------|--------------------|-------------------------|----------------------------|---|--|---|--|

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|---|----------------------|----------------------|-----------------------|--------------------------------|--|-------------------------------------|-----------------------------|--------------------------------|-------------------|

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹10 to 30 percent of this product is estimated.

²Commission receipts are not included in the total for curtains and draperies.

³The data for 1972 and 1967 present totals as collected in the census of manufactures as well as comparable totals from Current Industrial Reports series. The product detail as shown are those collected on the CIR form specified.

⁴30 to 50 percent of this product is estimated.

⁵For 1972, excludes disposable diapers made of paper (usually contains pulp or cellulose fibers) which are classified in census product code 26472 87. For 1967, these data were included in product code 23990 27.

⁶Included in all other fabricated textile products.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

- Represents zero. (NA) Not available.

| 23990 | Fabricated textile products, n.e.c..... | ⁵ 733.9 | 734.8 | 739.0 | 655.5 | 550.6 | ⁵ 529.3 | 353.8 | 257.3 |

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Excludes shipments made in weaving mills.

³Totals for industry 2395, Pleating and Stitching, are included with those for industry 2396, Apparel Findings, for 1958.

⁴Product class code 23950 is included with 23960 for 1958.

⁵Includes over \$2 million of product class 22110.

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹This item represents the total cost of materials for establishments that did not report detailed materials data.²From 30 to 50 percent of this figure was estimated.³From 10 to 30 percent of this figure was estimated.⁴Included with "All other materials and components, parts, containers, and supplies consumed."⁵Included with "Other broadwoven fabrics."

MAJOR GROUP 24

Lumber and Wood Products

- 24A Logging camps, sawmills, and planing mills
- 24B Millwork, plywood, and structural wood members, n.e.c.
- 24C Wooden containers and miscellaneous wood products
- 24D Wood buildings and mobile homes

This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are classified in Major Group 25; musical instruments, toys, playground equipment, and caskets in Major Group 39. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.

TABLE 1. General Statistics: 1972 and Earlier Years

(See appendix, Explanation of Terms)

| Year and item | Establishments | | All employees ¹ | | Production workers | | | Value added by manufacture ² | Cost of materials ³ | Value of industry shipments ³ | Capital expenditures, new ⁴ |

(X) Not applicable. (NA) Not available. (S) Withheld because the data did not meet publication standards.

¹The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.²For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. For 1899 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.³The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.⁴The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.⁵Data for 1972 are not directly comparable to 1971 and earlier years. See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.⁶Similar data are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these establishments are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, or prior to 1949.⁷The figures for 1958 through 1972 include data for establishments primarily engaged in the manufacture of hard pressed wood fiberboard. Prior to 1958 these establishments were classified in industry 2661, Building Paper and Building Board Mills. Data for establishments primarily engaged in manufacturing fabricated hardboard products are also included in the figures shown for 1958 through 1967. These establishments were previously classified in industry 2649, Paper and Board Products, N.E.C.

Footnotes continued on next page.

TABLE 1. General Statistics: 1972 and Earlier Years—Continued

Footnotes for table 1 --Continued

⁸These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufacturing establishments. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are given in the annual survey of manufacturing volumes for this period.

⁹A significant undercoverage in the 1950 and 1949 sample for this major industry group is to be noted, especially in industry 2411 logging camps and logging contractors. The figures for 1937 to 1947 exclude data for logging contractors and independent logging camps not operating sawmills as well as establishments primarily engaged in manufacture of venetian blinds, which are included for these years in the series for the "Furniture and Fixtures" industries.

¹⁰The figures for 1899 to 1929 do not include data for establishments primarily engaged in manufacture of wood and vehicle stock, which are included for these years in the series for the "Transportation Equipment" industries. Value added by manufacture for 1931, excluding data for these establishments and on a basis comparable with 1929 was \$523.8 million.

¹¹The figures for 1899 to 1923 include data for establishments engaged in manufacture of rules made of metal and other materials as well as wood, whereas the figures for later years include data for establishments making wooden rules only.

¹²The figures for 1914 do not include data for establishments engaged in manufacture of lathes and shingles. The figures for 1899 to 1909 include data for establishments primarily engaged in manufacture of window and door screens, which are included for later years in the series for the "Furniture and Fixtures" industries. Value added by manufacture for 1914, including data for these establishments, was \$651.8 million.

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

²The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

EXPLANATORY TEXT

LOGGING CAMPS, SAWMILLS, AND PLANING MILLS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2411—Logging Camps and Logging Contractors
- 2421—Sawmills and Planing Mills, General
- 2426—Hardwood Dimension and Flooring Mills*
- 2429—Special Product Sawmills, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2411.—LOGGING CAMPS AND LOGGING CONTRACTORS

This industry comprises establishments primarily engaged in cutting timber and in producing rough, round, hewn, or riven primary forest or wood raw materials. Independent contractors engaged in estimating or trucking timber, but who perform no cutting operations, are classified in nonmanufacturing industries. Logging and woods operations conducted in combi-

nation with sawmills, pulp mills, or other converting establishments, and not separately reported, are classified in their respective industry groups; namely, with sawmills in SIC group 242, veneer and plywood mills in SIC group 243, pulp mills in SIC Major Group 26 (Paper and Allied Products), and charcoal and wood distillation plants in SIC group 286 (Industrial Organic Chemicals). Establishments primarily engaged in the collection of bark, sap, gum, and other forest byproducts are classified in Major Group 08 (Forestry). For a detailed list of products of industry 2411, refer to table 6A, product codes 24110 11 to 24119 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Logging Camps and Logging Contractors Industry in 1972 totaled \$2,529.5 million. This included shipments of logging products and contract logging (primary products) valued at \$2,327.8 million, shipments of other products (secondary products) valued at \$78.6 million, and miscellaneous receipts (mainly resales) of \$123.1 million.

Shipments of logging products and contract logging (primary products) in 1972 represented 97 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 99 percent. Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$59.8 million).

Shipments of logging products and contract logging products (primary products) from establishments classified in industry 2411 in 1972 represented 89 percent (coverage ratio) of these products valued at \$2,601.4 million shipped by all industries. In 1967, the coverage ratio was 91 percent. Other industries shipping logging products and contract logging consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$231.8 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2411, these establishments accounted for 35 percent of value of shipments.

*Note that the "short title" for this industry is used throughout the report.

INDUSTRY 2421.—SAWMILLS AND PLANING MILLS, GENERAL

This industry comprises establishments primarily engaged in sawing rough lumber and timber from logs and bolts or resawing cants and flitches into lumber, including box lumber and softwood cut stock; planing mills combined with sawmills; and separately operated planing mills which are engaged primarily in producing surfaced lumber and standard workings or patterns of lumber. This industry includes establishments primarily engaged in sawing lath and railroad ties, and in producing tobacco hogshead stock, wood chips, and snow fence lath. Establishments primarily engaged in manufacturing box shooks or boxes are classified in SIC group 244 (Wood Containers); sash, doors, wood molding, window and door frames, and other fabricated millwork in industry 2431 (Millwork); and hardwood dimension and flooring in industry 2426. Logging camps combined with sawmills, when not separately reported, are included in this industry. For a detailed list of products of industry 2421, refer to table 6A, product codes 24211 32 to 24219 51.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Sawmills and Planing Mills, General, Industry in 1972 totaled \$6,420.8 million. This included shipments of sawmill and planing mill products (primary products) valued at \$5,656.4 million, shipments of other products (secondary products) valued at \$571.7 million, and miscellaneous receipts (mainly resales) of \$192.6 million.

Shipments of sawmill and planing mill products (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of logging products and contract logging (\$231.8 million) and softwood veneer and plywood (\$172.9 million).

Shipments of sawmill and planing mill products (primary products) from establishments classified in industry 2421 in 1972 represented 94 percent (coverage ratio) of these products valued at \$5,999.6 million shipped by all industries. In 1967, the coverage ratio was 95 percent. Other industries shipping sawmill and planing mill products consisted mainly of industry 2436, Softwood Veneer and Plywood, (\$165.7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and

sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2421, these establishments accounted for 11 percent of value of shipments.

INDUSTRY 2426.—HARDWOOD DIMENSION AND FLOORING (Short Title)

This industry comprises establishments primarily engaged in manufacturing hardwood dimension lumber and workings therefrom; and other hardwood dimension, semifabricated or ready for assembly; hardwood flooring; and wood frames for household furniture. Establishments primarily engaged in manufacturing stairwork, molding, and trim are classified in industry 2431 (Millwork); and those manufacturing textile machinery bobbins, picker sticks, and shuttles in industry 3552 (Textile Machinery). For a detailed list of products of industry 2426, refer to table 6A, product codes 24261 11 to 24266 11.

The 1972 definition of this industry has been significantly revised from that used in the 1967 SIC manual. However, the SIC number and title are unchanged. The industry as now constituted includes wood frames for household furniture which were previously classified in industry 2512, Upholstered Household Furniture. The effect of the revisions on the data are summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 321 establishments with 6.0 thousand total employment and \$51.0 million value added would have been classified in industry 2512, Upholstered Household Furniture, under the old SIC.

Value of shipments and other receipts of the Hardwood Dimension and Flooring Industry in 1972 totaled \$572.0 million. This included shipments of hardwood dimension and flooring (primary products) valued at \$505.6 million, shipments of other products (secondary products) valued at \$47.2 million, and miscellaneous receipts (mainly resales) of \$19.2 million.

Shipments of hardwood dimension and flooring (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$24.3 million).

Shipments of hardwood dimension and flooring (primary products) from establishments classified in industry 2426 in 1972 represented 88 percent (coverage ratio) of these products valued at \$571.5 million shipped by all industries. Other indus-

tries shipping hardwood dimension and flooring consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$36.3 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2426, these establishments accounted for 11 percent of value of shipments.

INDUSTRY 2429.—SPECIAL PRODUCT SAWMILLS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing excelsior, wood shingles, and cooperage stock; and in sawing special products, not elsewhere classified. For a detailed list of products of industry 2429, refer to table 6A, product codes 24290 03 to 24290 89.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Special Product Sawmills, N.E.C., Industry in 1972 totaled \$180.8 million. This included shipments of special product sawmill goods,

n.e.c., (primary products) valued at \$169.1 million, shipments of other products (secondary products) valued at \$3.3 million, and miscellaneous receipts (mainly resales) of \$8.4 million.

Shipments of special product sawmill goods, n.e.c., (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 98 percent. Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$1.2 million) and wood products, n.e.c., (under \$2 million).

Shipments of special product sawmill goods, n.e.c., (primary products) from establishments classified in industry 2429 in 1972 represented 96 percent (coverage ratio) of these products valued at \$175.7 million shipped by all industries. In 1967, the coverage ratio was 95 percent. Other industries shipping special product sawmill goods, n.e.c., consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$2.6 million) and industry 2449, Wood Containers, N.E.C., (\$2 to \$5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2429, these establishments accounted for 18 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|---|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |
| | (number) | (number) | (1,000) | (million dollars) | (1,000) | (millions) | (million dollars) | | | | | | | | |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2411 | Industry 2421 | Industry 2426 | Industry 2429 |
|-----------|---------------|---------------|---------------|---------------|
| 1972..... | 13,152 | 7,662 | 879 | 397 |
| 1967..... | 16,265 | 10,016 | (NA) | 454 |
| 1963..... | 13,522 | 11,931 | (NA) | 476 |

(NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar of shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

| Industry | Composition of new industry | | | | | Totals for industries on old SIC | | | | |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

¹The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

TABLE 4. General Statistics, by Employment Size of Establishment: 1972

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Logging camps and logging contractors (SIC 2411) | Sawmills and planing mills, general (SIC 2421) | Hardwood dimension and flooring (SIC 2426) | Special product sawmills, n.e.c. Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. From 10 to 30 percent of this figure was estimated.

¹Due to 1972 revisions in the Standard Industrial Classification for product classes 24211 and 24212, separate 1967 totals for n.s.k. codes 24211 00 and 24212 00 are unavailable. For 1967, the value for product code 24211 00 is included with 24212 00.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Includes an indeterminable amount of receipts for contract logging reported as "Logs, bolts, and pulpwood, not specified by kind."

³Prior to 1967, data for wood chips, product class 24215, were included in product class 24290.

⁴For 1958, data for product class 24260 are included in product class 24210, sawmill and planing mill products, n.s.k., and product class 24990, wood products, n.e.c.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

| 1972 code | Material | Unit of measure | 1972 | | 1967 | |

EXPLANATORY TEXT

MILLWORK, PLYWOOD, AND STRUCTURAL WOOD MEMBERS, N.E.C.

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2431—Millwork
- 2434—Wood Kitchen Cabinets
- 2435—Hardwood Veneer and Plywood
- 2436—Softwood Veneer and Plywood
- 2439—Structural Wood Members, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2431.—MILLWORK

This industry comprises establishments primarily engaged in manufacturing fabricated millwork. Planing mills primarily engaged in producing millwork are included in this industry, but planing mills primarily producing standard workings or patterns of lumber are classified in industry 2421 (Sawmills and Planing Mills, General). Establishments primarily manufacturing wood kitchen cabinets and bathroom vanities are classified in industry 2434. For a detailed list of products of industry 2431, refer to table 6A, product codes 24311 33 to 24318 79.

The 1972 definition of this industry has been significantly revised from that used in the 1967 SIC manual. However, the SIC number and title are unchanged.

The 1972 revisions transferred the manufacture of custom

cabinetwork, to be built in, to industry 2434, Wood Kitchen Cabinets. The effect of the revisions on the data is summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 3,326 establishments with 87.7 thousand total employment and \$1,164.5 million value added would have been classified in industry 2431, Millwork, under the old SIC. As a result of the revisions, 892 establishments with 17.2 thousand employment and \$201.8 million value added shifted to industry 2434.

Value of shipments and other receipts of the Millwork Industry in 1972 totaled \$2,426.8 million. This included shipments of millwork (primary products) valued at \$2,103.1 million, shipments of other products (secondary products) valued at \$146.0 million, and miscellaneous receipts (mainly resales) of \$177.7 million.

Shipments of millwork (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of metal doors, sash, and trim (\$26.7 million) and wood kitchen cabinets (\$23.6 million).

Shipments of millwork (primary products) from establishments classified in industry 2431 in 1972 represented 94 percent (coverage ratio) of these products valued at \$2,229.7 million shipped by all industries. Other industries shipping millwork consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$43.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2431, these establishments accounted for 13 percent of value of shipments.

INDUSTRY 2434.—WOOD KITCHEN CABINETS

This industry comprises establishments primarily engaged in manufacturing wood kitchen cabinets, stock line or custom, and vanities and other cabinetwork. Establishments primarily engaged in manufacturing wood household furniture are classified in industry 2511 (Wood Household Furniture). For a detailed list of products of industry 2434, refer to table 6A, product codes 24341 11 to 24343 18.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned.

Industry 2434, Wood Kitchen Cabinets, was formed by combining the manufacture of custom cabinetwork, to be built in, (old product class 24317) with wood kitchen cabinets (old product class 25114).

The effect of the revisions on the data is summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 892 establishments with 17.2 thousand total employment and \$201.8 million value added would have been classified in industry 2431, Millwork, under the old SIC; and 895 establishments with 21.4 thousand employment and \$283.3 million value added, in industry 2511.

Value of shipments and other receipts of the Wood Kitchen Cabinets Industry in 1972 totaled \$891.1 million. This included shipments of wood kitchen cabinets (primary products) valued at \$819.8 million, shipments of other products (secondary products) valued at \$39.7 million, and miscellaneous receipts (mainly resales) of \$31.6 million.

Shipments of wood kitchen cabinets (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of millwork (\$18.8 million) and wood partitions and fixtures (\$11.0 million).

Shipments of wood kitchen cabinets (primary products) from establishments classified in industry 2434 in 1972 represented 95 percent (coverage ratio) of these products valued at \$858.4 million shipped by all industries. Other industries shipping wood kitchen cabinets consisted mainly of industry 2431, Millwork, (\$23.6 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2434, these establishments accounted for 10 percent of value of shipments.

INDUSTRY 2435.—HARDWOOD VENEER AND PLYWOOD

This industry comprises establishments primarily engaged in producing commercial hardwood veneer, either face or tech-

nical, and those primarily engaged in manufacturing commercial plywood or prefinished hardwood plywood. This includes nonwood backed or faced veneer and nonwood faced plywood from veneer produced in the same establishment or from purchased veneer. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of end products, such as fruit and vegetable baskets and wood boxes, are classified in industries 2441 (Nailed Wood Boxes and Shook) and 2449 (Wood Containers, N.E.C.). For a detailed list of products of industry 2435, refer to table 6A, product codes 24351 00 to 24354 71.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned.

Under the 1967 classification system, all veneer and plywood were included in industry 2432, Veneer and Plywood. For 1972, industry 2432 was split into two separate industries: Industry 2435, Hardwood Veneer and Plywood, and industry 2436, Softwood Veneer and Plywood.

The effect of the revisions on the data is summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 598 establishments with 68.8 thousand total employment and \$1,276.2 million value added would have been classified in industry 2432 under the old SIC. As a result of the reclassification, 366 establishments with 25.1 thousand total employment and \$340.8 value added were reclassified into industry 2435, and 232 establishments with 43.7 thousand total employment and \$935.4 value added were reclassified into industry 2436.

Value of shipments and other receipts of the Hardwood Veneer and Plywood Industry in 1972 totaled \$911.8 million. This included shipments of hardwood veneer and plywood (primary products) valued at \$804.0 million, shipments of other products (secondary products) valued at \$80.1 million, and miscellaneous receipts (mainly resales) of \$27.7 million.

Shipments of hardwood veneer and plywood (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of millwork (\$23.3 million) and sawmill and planing mill products (\$19.7 million).

Shipments of hardwood veneer and plywood (primary products) from establishments classified in industry 2435 in 1972 represented 92 percent (coverage ratio) of these products valued at \$875.3 million shipped by all industries. Other industries shipping hardwood veneer and plywood consisted mainly of industry 2436, Softwood Veneer and Plywood, (\$37.5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail

portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2435, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 2436.—SOFTWOOD VENEER AND PLYWOOD

This industry comprises establishments primarily engaged in producing commercial softwood veneer and plywood from veneer produced in the same establishment or from purchased veneer. Establishments primarily engaged in producing commercial hardwood veneer and plywood are classified in industry 2435. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of end products, such as fruit and vegetable baskets and wood boxes, are classified in industries 2441 (Nailed Wood Boxes and Shook) and 2449 (Wood Containers, N.E.C.). For a detailed list of products of industry 2436, refer to table 6A, product codes 24361 00 to 24364 31.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned.

Under the 1967 classification system, all veneer and plywood were included in industry 2432, Veneer and Plywood. For 1972, industry 2432 was split into two separate industries: Industry 2436, Softwood Veneer and Plywood, and industry 2435, Hardwood Veneer and Plywood.

The effect of the revisions on the data is summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 598 establishments with 68.8 thousand total employment and \$1,276.2 million value added would have been classified in industry 2432 under the old SIC. As a result of the reclassification, 232 establishments with 43.7 thousand total employment and \$935.4 million value added were split from industry 2432 to form industry 2436, and the remaining 366 establishments with 25.1 thousand total employment and \$340.8 million value added were reclassified to form industry 2435.

Value of shipments and other receipts of the Softwood Veneer and Plywood Industry in 1972 totaled \$2,011.5 million. This included shipments of softwood veneer and plywood (primary products) valued at \$1,735.0 million, shipments of other products (secondary products) valued at \$241.9 million, and miscellaneous receipts (mainly resales) of \$34.6 million.

Shipments of softwood veneer and plywood (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$165.7 million) and hardwood veneer and plywood (\$37.5 million).

Shipments of softwood veneer and plywood (primary products) from establishments classified in industry 2436 in 1972 represented 89 percent (coverage ratio) of these products valued at \$1,939.6 million shipped by all industries. Other industries shipping softwood veneer and plywood consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$172.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2436, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2439.—STRUCTURAL WOOD MEMBERS, N.E.C.

This industry comprises establishments primarily engaged in producing laminated or fabricated trusses, arches, and other structural members of lumber. Establishments primarily engaged in fabrication on the site of construction are classified in Division C (Construction) of the SIC manual. Establishments primarily engaged in producing prefabricated wooden buildings, sections, and panels are classified in industry 2452, Prefabricated Wood Buildings and Components. For a detailed list of products of industry 2439, refer to table 6A, product codes 24390 31 to 24390 98.

The Structural Wood Members, N.E.C., Industry is included for the first time in the census of manufactures for 1972. All products now classified in this industry were formerly part of industry 2433, Prefabricated Wood Structures. The balance of industry 2433 is now classified as industry 2452, Prefabricated Wood Buildings.

The effect of the revisions on the data is summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 993 establishments with 38.1 thousand total employment and \$643.6 million value added would have been classified in industry 2433 under the old SIC. As a result of the reclassification, 678 establishments with 12.6 thousand employment and \$182.8 million value added

EXPLANATORY TEXT—Continued

were reclassified to industry 2439, and 315 establishments with 25.5 thousand employment and \$460.8 million value added were reclassified to industry 2452.

Value of shipments and other receipts of the Structural Wood Members, N.E.C., Industry in 1972 totaled \$456.0 million. This included shipments of structural wood members, n.e.c., (primary products) valued at \$411.2 million, shipments of other products (secondary products) valued at \$22.6 million, and miscellaneous receipts (mainly resales) of \$22.2 million.

Shipments of structural wood members, n.e.c., (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of prefabricated wood buildings (\$16.1 million) and millwork (\$1.4 million).

Shipments of structural wood members, n.e.c., (primary products) from establishments classified in industry 2439 in 1972 represented 90 percent (coverage ratio) of these products valued at \$455.5 million shipped by all industries. Other industries shipping structural wood members, n.e.c., consisted mainly of industry 2452, Prefabricated Wood Buildings, (\$23.3 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2439, these establishments accounted for 18 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|---|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | 1972 industry 2431 | 1972 industry 2434 | 1972 industry 2435 | 1972 industry 2436 | 1967 industry 2432 | 1972 industry 2439 |

(NA) Not available.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar of shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

| Industry | Composition of new industry | | | | | Totals for industries on old SIC | | | | |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|---|--------------------|-------------------|--------------------|------------------------|--------------------------------------|------------------------------------|-----------------------|--------------------------|-------------------------------|

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 5A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Millwork (SIC 2431) | Wood kitchen cabinets (SIC 2434) | Hardwood veneer and plywood (SIC 2435) | Softwood veneer and plywood (SIC 2436) | Structural wood members, n.e.c. (SIC 2439) | Other industries |

| 24390 02 | Structural wood members, n.e.c., n.s.k., for companies with less than 10 employees. (See note.)..... | | (X) | 32.3 | (X) | (NA) | | |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. ^eFrom 10 to 30 percent of this figure was estimated.

¹Includes shipments of prefinished hardwood plywood made from plywood produced at the same establishment.

²Combined to avoid disclosing figures for individual companies.

³For 1967, the "n.s.k." product codes 24350 00 and 24350 02 include data for both hardwood (2435) and softwood (2436) veneer and plywood.

⁴In 1967, the unit of measure was on a "1-inch basis."

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²The individual product codes included in this class of product for 1972 differ from the 1967 definition. Products shifting into or out of this class of product represent approximately 7 percent of the total 1967 shipments at the U.S. level.

³For 1971 and prior years, product class 24350 includes data for product class 24360.

TABLE 7A. Materials Consumed, by Kind: 1972

(See appendix, Explanation of Terms)

| 1972 code | Material | Unit of measure | Quantity | Delivered cost (million dollars) |
|---|---|---------------------------------------|----------|-------------------------------------|
| INDUSTRY 2431.--MILLWORK | | | | |
| | Materials, containers, and supplies, total..... | | (X) | 1,320.1 |

EXPLANATORY TEXT

WOODEN CONTAINERS AND MISCELLANEOUS WOOD PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2441—Nailed and Lock Corner Wood Boxes and Shook*
- 2448—Wood Pallets and Skids
- 2449—Wood Containers, N.E.C.
- 2491—Wood Preserving
- 2492—Particleboard
- 2499—Wood Products, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2441.—NAILED WOOD BOXES AND SHOOK (Short Title)

This industry comprises establishments primarily engaged in manufacturing nailed and lock-corner wooden boxes (lumber or plywood), which also may produce shook for nailed and lock-corner boxes. For a detailed list of products of industry 2441, refer to table 6A, product codes 24411 21 to 24412 55.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

*Note the "short title" for this industry is used throughout the report.

Value of shipments and other receipts of the Nailed Wood Boxes and Shook Industry in 1972 totaled \$237.9 million. This included shipments of nailed wood boxes and shook (primary products) valued at \$201.6 million, shipments of other products (secondary products) valued at \$28.8 million, and miscellaneous receipts (mainly resales) of \$7.5 million.

Shipments of nailed wood boxes and shook (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 88 percent. Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$12.0 million) and wood pallets and skids (\$4.7 million).

Shipments of nailed wood boxes and shook (primary products) from establishments classified in industry 2441 in 1972 represented 87 percent (coverage ratio) of these products valued at \$232.8 million shipped by all industries. In 1967, the coverage ratio was also 87 percent. Other industries shipping nailed wood boxes and shook consisted mainly of industry 2431, Millwork, (\$10.6 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2441, these establishments accounted for 19 percent of value of shipments.

INDUSTRY 2448.—WOOD PALLETS AND SKIDS

This industry comprises establishments primarily engaged in manufacturing wood and wood-metal combination pallets and skids. Establishments primarily engaged in manufacturing all metal pallets are classified in industry 3537 (Industrial Trucks and Tractors).

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned. Industry 2448, Wood Pallets and Skids, had been classified under product class 24992 as a part of industry 2499, Wood Products, N.E.C. The effect of the revisions of the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, the 456 establishments with 14.3

thousand total employees and \$140.9 million value added, which are now classified as new industry 2448, would have been classified in industry 2499 under the old SIC.

Value of shipments and other receipts of the Wood Pallets and Skids Industry in 1972 totaled \$295.4 million. This included shipments of wood pallets and skids (primary products) valued at \$253.7 million, shipments of other products (secondary products) valued at \$24.3 million, and miscellaneous receipts (mainly resales) of \$17.4 million.

Shipments of wood pallets and skids (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$10.2 million) and nailed wood boxes and shook (\$4.7 million).

Shipments of wood pallets and skids (primary products) from establishments classified in industry 2448 in 1972 represented 89 percent (coverage ratio) of these products valued at \$287.4 million shipped by all industries. Other industries shipping wood pallets and skids consisted mainly of industry 2499, Wood Products, N.E.C., (\$5.1 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2448, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2449.—WOOD CONTAINERS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing wood containers, not elsewhere classified, such as cooperage, wirebound boxes and crates, and other veneer and plywood containers. Establishments primarily engaged in manufacturing tobacco hogshead stock are classified in industry 2421 (Sawmills and Planing Mills, General), and those manufacturing cooperage stock in industry 2429 (Special Product Sawmills, N.E.C.). For a detailed list of products of industry 2449, refer to table 6A, product codes 24491 11 to 24495 59.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned. New industry 2449, Wood Containers, N.E.C., was formed by combining old industries 2442, Wirebound Boxes and Crates; 2443, Veneer and Plywood Containers; and 2445, Cooperage. The effect of the revisions on the data is summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from

table 1C, 268 establishments with 11.9 thousand total employees and \$114.1 million value added are now classified in industry 2449 under the new SIC. Under the old SIC, 134 establishments with 7.6 thousand employees and \$70.1 million value added would have been classified in industry 2442; 60 establishments with 1.9 thousand employees and \$13.1 million value added would have been classified in industry 2443; and 74 establishments with 2.4 thousand employees and \$30.9 million value added would have been classified in industry 2445.

Value of shipments and other receipts of the Wood Containers, N.E.C., Industry in 1972 totaled \$240.2 million. This included shipments of wood containers, n.e.c., (primary products) valued at \$215.4 million, shipments of other products (secondary products) valued at \$12.9 million, and miscellaneous receipts (mainly resales) of \$11.9 million.

Shipments of wood containers, n.e.c., (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of nailed wood boxes and shook (\$5.3 million) and wood pallets and skids (\$2.1 million).

Shipments of wood containers, n.e.c., (primary products) from establishments classified in industry 2449 in 1972 represented 98 percent (coverage ratio) of these products valued at \$218.7 million shipped by all industries. In 1967, the coverage ratio was 93 percent. Other industries shipping wood containers, n.e.c., consisted mainly of industry 2448, Wood Pallets and Skids, (\$1.1 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2449, these establishments accounted for 10 percent of value of shipments.

INDUSTRY 2491.—WOOD PRESERVING

This industry comprises establishments primarily engaged in treating wood, sawed or planed in other establishments, with creosote or other preservatives to prevent decay and to protect against fire and insects. This industry also includes the cutting, treating, and selling of poles, posts, and piling, but establishments primarily engaged in manufacturing other wood products (which they may also treat with preservatives) are not included. For a detailed list of products of industry 2491, refer to table 6A, product codes 24911 12 to 24911 19.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Wood Preserving Industry in 1972 totaled \$475.8 million. This included shipments of wood preserving (primary products) valued at \$443.8 million, shipments of other products (secondary products) valued at \$5.8 million, and miscellaneous receipts (mainly resales) of \$26.2 million.

Receipts for wood preserving (primary products) in 1972 represented 99 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 98 percent. Secondary products shipped by this industry in 1972 consisted mainly of sawmill and planing mill products (\$3.5 million) and millwork (under \$2 million).

Receipts for wood preserving (primary products) from establishments classified in industry 2491 in 1972 represented 96 percent (coverage ratio) of these products valued at \$461.3 million shipped by all industries. In 1967, the coverage ratio was 98 percent. Other industries with receipts for wood preserving consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$16.3 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2491, these establishments accounted for 6 percent of value of shipments.

INDUSTRY 2492.—PARTICLEBOARD

This industry comprises establishments primarily engaged in manufacturing wood panel products from small wood particles. This includes preparation of small particles of wood, drying, mixing with a synthetic resin binder, and compressing. Pressing may take place in hydraulic presses with heated platens or by extrusion.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned. Industry 2492, Particleboard, had been classified under product class 24993 as a part of industry 2499, Wood Products, N.E.C. The effect of the revisions on the data is summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC. During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 69 establishments with 8 thousand total employees

and \$14.8 million value added, which are now classified in new industry 2492, would have been classified in industry 2499 under the old SIC.

Value of shipments and other receipts of the Particleboard Industry in 1972 totaled \$302.0 million. This included shipments of particleboard (primary products) valued at \$273.9 million, shipments of other products (secondary products) valued at \$25.1 million, and miscellaneous receipts (mainly resales) of \$3.0 million.

Shipments of particleboard (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of wood products, n.e.c., (\$18.8 million) and hardwood dimension and flooring (\$5 to \$10 million).

Shipments of particleboard (primary products) from establishments classified in industry 2492 in 1972 represented 94 percent (coverage ratio) of these products valued at \$292.8 million shipped by all industries. Other industries shipping particleboard consisted mainly of industry 2421, Sawmills and Planing Mills, General, (\$10 to \$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2492, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2499.—WOOD PRODUCTS, N.E.C.

This industry comprises establishments primarily engaged in turning and shaping wood and manufacturing miscellaneous wood products, not elsewhere classified, from rattan, reed, splint, straw, veneer, veneer strips, wicker, and willow. This industry also includes establishments manufacturing lasts and related products, cork products, hardboard, and wood or metal mirror and picture frames. Establishments primarily engaged in manufacturing particleboard are classified in industry 2492, and those manufacturing pallets and skids in industry 2448.

The 1972 definition of this industry has been significantly revised from that used in the 1967 SIC manual. However, the SIC number and title are unchanged. The 1972 revisions transferred the manufacture of wood pallets and skids to industry 2448 and the manufacture of particleboard to industry 2492. The effect of the revisions on the data is summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each estab-

EXPLANATORY TEXT—Continued

lishment was classified according to both the old and new SIC. As can be seen from table 1C, 3,657 establishments with 85.3 thousand total employees and \$1,097.3 million value added would have been classified in industry 2499 under the old SIC. As a result of the revisions, 456 establishments with 14.3 thousand employees and \$140.9 million value added shifted to industry 2448; and 69 establishments with 8.0 thousand employees and \$148.0 million value added shifted to industry 2492.

Value of shipments and other receipts of the Wood Products, N.E.C., Industry in 1972 totaled \$1,517.4 million. This included shipments of wood products, n.e.c., (primary products) valued at \$1,345.0 million, shipments of other products (secondary products) valued at \$105.4 million, and miscellaneous receipts (mainly resales) of \$67.0 million.

Shipments of wood products, n.e.c., (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastics products (\$10.7 million) and sawmill and planing mill products (\$7.3 million).

Shipments of wood products, n.e.c., (primary products) from establishments classified in industry 2499 in 1972 represented 91 percent (coverage ratio) of these products valued at \$1,479.1 million shipped by all industries. Other industries shipping wood products, n.e.c., consisted mainly of industry 2661, Building Paper and Board Mills, (\$20 to \$50 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2499, these establishments accounted for 18 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|---|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |
| | (number) | (number) | (1,000) | (million dollars) | (1,000) | (millions) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (percent) | (percent) |

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A.)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2441 | Industry 2448 | Industry 2449 | Industry 2491 | Industry 2492 | Industry 2499 |
|-----------|------------------|------------------|------------------|------------------|------------------|------------------|
| 1972..... | 424 | 444 | 236 | 309 | 40 | 3,008 |
| 1967..... | 567 | (NA) | 266 | 278 | NA | 3,044 |
| 1963..... | 637 | (NA) | 255 | 250 | NA | 2,818 |

For the new SIC industries 2448 and 2492, the 1967 and 1963 company counts are included in the company counts for old SIC industry 2499.

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, Annual Survey of Manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry. Data prior to 1963 exclude Alaska and Hawaii to avoid disclosing individual company figures.

²In the 1967 Census of Manufactures, data for this industry were classified in product class 24992 as part of industry 2499.

³In the 1967 Census of Manufactures, data for this industry were classified in product class 24993 as part of industry 2499.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

| Industry | Composition of new industry | | | | | Totals for industries on old SIC | | | | |
|--|-----------------------------|---------------------------|---------------|----------------------------|--------------------|----------------------------------|---------------------------|---------------|----------------------------|--------------------|
| | Establishments | | All employees | Value added by manufacture | Value of shipments | Establishments | | All employees | Value added by manufacture | Value of shipments |
| | Total | With 20 employees or more | | | | Total | With 20 employees or more | | | |

TABLE 4. General Statistics, by Employment Size of Establishment: 1972—Continued

(Footnotes for table 4)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization--the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization--the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|--|----------------------|----------------------|-----------------------|--------------------------------|--|-------------------------------------|-----------------------------|--------------------------------|-------------------------------|

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Nailed wood boxes and shook (SIC 2441) | Wood pallets and skids (SIC 2448) | Wood containers, n.e.c. (SIC 2449) | Other industries |

| 24995 67 | Dimension and parts, including cut-to-size and molded products. (See also code 24996 21.) | ...do..... | (NA) | 39.3 | (NA) | 21.7 |
| 24995 68 | Perforated board, including both prefinished perforated board and perforated board that is not face finished. (See also code 24996 31.) | ...do..... | (S) | 2.2 | 8.2 | .9 |
| 24995 69 | Other fabricated hardboard products. | ...do..... | (NA) | 15.8 | (NA) | 8.0 |
| 24995 71 | Stepladders. | Mil. lin. ft.. | ^e 21.0 | 21.3 | 12.1 | 13.2 |
| 24995 75 | Rung ladders (nonextension, extension, and scaffolding ladders). | ...do..... | (X) | 10.8 | 6.9 | 6.5 |
| 24995 79 | Other scaffolding equipment (horses, scaffold jacks, extension planks, window jacks, etc.) | ...do..... | | | (X) | 2.2 |
| 24995 82 | Wood novelties and specialties (bookends, ash trays, silverware chests, etc.) | ...do..... | | | (X) | 32.0 |
| 24995 87 | Jewelry boxes and chests. | ...do..... | (X) | 41.6 | (X) | 32.0 |
| 24995 83 | Woodenware: turned, shaped or molded (dishes, serving forks, spoons, salad and mixing bowls, etc.) | ...do..... | (X) | 11.2 | (X) | 10.2 |
| 24995 84 | Flat veneer products (forks, spoons, plates, tongue depressors, applicators, etc.) | ...do..... | (X) | 20.2 | (X) | 9.7 |
| 24995 85 | Wooden reels for wire and cable. | ...do..... | (X) | 43.9 | (X) | 30.4 |
| 24995 86 | Wood fences, all types, including ornamental, picket, snow fence, etc. | ...do..... | (X) | 14.5 | (X) | 13.6 |
| 24995 88 | Wood garment hangers. | ...do..... | (X) | 5.7 | (X) | 10.0 |
| 24995 89 | Wood flour. | Million tons.. | (X) | 8.4 | (X) | 4.5 |
| 24995 91 | Other fabricated industrial parts, except hardwood. | Million bd.ft. | (X) | 10.2 | (NA) | 25.4 |
| 24995 94 | Toilet seats: Plastic, solid, and cored, including hard rubber. | Million units. | 5.3 | 28.2 | 9.5 | 36.1 |
| 24995 97 | Wood, including molded wood. | ...do..... | 14.8 | 33.5 | | |
| 24995 96 | Wood turnings, except handles and spools. | ...do..... | (X) | 149.3 | (X) | 75.4 |
| 24995 98 | Miscellaneous wooden goods, including toothpicks; spools, except textile machinery spools; rattan and willow ware products, etc. | ...do..... | (X) | 45.6 | (X) | 19.3 |
| 24995 00 | Wood products, n.e.c., n.s.k. | ...do..... | (X) | 45.6 | (X) | 19.3 |
| 24996 -- | Fabricated Hardboard Products, Made From Hardboard Produced at the Same Establishment. | ...do..... | (X) | 258.5 | (X) | 159.2 |
| 24996 11 | Prefinished paneling, except laminated and tiled wallboard, including siding and wall panels that are plastic coated, embossed, painted, grooved, printed, varnished, or shellacked. (See also code 24995 66.) | Million sq.ft. (1/8" basis). | 2,504.9 | 148.8 | 2,215.3 | 117.2 |
| 24996 21 | Dimension and parts, including cut-to-size and molded products. (See also code 24995 67.) | ...do..... | 697.7 | 38.9 | 82.3 | 2.8 |
| 24996 31 | Perforated board, including both prefinished perforated board and perforated board that is not face finished. (See also code 24995 68.) | ...do..... | 111.5 | 6.8 | 99.9 | 5.5 |
| 24996 41 | Panel stock, including interior and exterior panels and siding not face finished. | ...do..... | ^e 1,264.9 | 54.2 | 889.8 | 28.8 |
| 24996 00 | Fabricated hardboard products, n.s.k. | ...do..... | (X) | 9.8 | (X) | 4.9 |
| 24990 00 | Wood products, n.e.c., n.s.k., for companies with 10 employees or more. (See note.) | ...do..... | (X) | 173.8 | (X) | 84.2 |
| 24990 02 | Wood products, n.e.c., n.s.k., for companies with less than 10 employees. (See note.) | ...do..... | (X) | 154.1 | (X) | 61.0 |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. ^eFrom 10 to 30 percent of this figure was estimated.

¹Combined to avoid disclosing figures for individual companies.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |

(X) Not applicable.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Data exclude Alaska and Hawaii to avoid disclosing individual company figures.

EXPLANATORY TEXT

WOOD BUILDINGS AND MOBILE HOMES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

2451—Mobile Homes

2452—Prefabricated Wood Buildings and Components*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2451.—MOBILE HOMES

This industry comprises establishments primarily engaged in manufacturing mobile homes. These mobile homes are generally over 35 feet long, at least 8 feet wide, do not have facilities for storage of water or waste, and are equipped with wheels. These products may also have nonresidential uses, such as classrooms or offices. Trailers that are generally 35 feet long or less, 8 feet wide or less, and with self-contained facilities are classified in industry 3792. Portable buildings not equipped with wheels are classified in industry 2452. For a detailed list of products of industry 2451, refer to table 6A, product codes 24511 11 to 24512 27.

The Mobile Homes Industry is included for the first time in the census of manufactures for 1972. All products now classified in this industry were formerly part of industry 3791, Trailer Coaches. The effect of the revisions on the data are

* Note that the "short title" for this industry is used throughout the report.

summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC."

Value of shipments and other receipts of the Mobile Homes Industry in 1972 totaled \$3,252.2 million. This included shipments of mobile homes (primary products) valued at \$3,168.6 million, shipments of other products (secondary products) valued at \$27.3 million, and miscellaneous receipts (mainly resales) of \$56.3 million.

Shipments of mobile homes (primary products) in 1972 represented 99 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of prefabricated wood buildings (\$14.1 million).

Shipments of mobile homes (primary products) from establishments classified in industry 2451 in 1972 represented 99 percent (coverage ratio) of these products valued at \$3,190.9 million shipped by all industries. Other industries shipping mobile homes consisted mainly of industry 3792, Travel Trailers and Campers (\$15.2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2451, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2452.—PREFABRICATED WOOD BUILDINGS (Short Title)

This industry comprises establishments primarily engaged in manufacturing prefabricated wood buildings, sections, and panels. Establishments primarily engaged in fabricating buildings on the site of construction are classified in division C, Construction, and in manufacturing fabricated structural wood products are classified in industry 2439. For a detailed list of products of industry 2452, refer to table 6A, product codes 24521 73 to 24524 47.

The Prefabricated Wood Buildings Industry is included for the first time in the census of manufactures for 1972. All products now classified in this industry were formerly part of industry 2433, Prefabricated Wood Structures. The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC."

EXPLANATORY TEXT—Continued

Value of shipments and other receipts of the Prefabricated Wood Buildings Industry in 1972 totaled \$1,058.7 million. This included shipments of prefabricated wood buildings (primary products) valued at \$958.3 million, shipments of other products (secondary products) valued at \$28.5 million, and miscellaneous receipts (mainly resales) of \$71.9 million.

Shipments of prefabricated wood buildings (primary products) in 1972 represented 97 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of structural wood members, n.e.c., \$19.3 million.

Shipments of prefabricated wood buildings (primary products) from establishments classified in industry 2452 in 1972

represented 96 percent (coverage ratio) of these products valued at \$1,001.9 million shipped by all industries. Other industries shipping prefabricated wood buildings consisted mainly of industry 2439, Structural Wood Members, N.E.C., \$16.1 million; and industry 2451, Mobile Homes, \$14.1 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2452, these establishments accounted for less than 1 percent of value of shipments.

TABLE 1A. General Statistics: 1972

(See appendix, Explanation of Terms)

| Year | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |

| INDUSTRY 2451.--MOBILE HOMES | | | | | | | | | | | | | | | |
| 1972 Census..... | 685 | 591 | 72.2 | 549.0 | 60.7 | 115.5 | 408.9 | 1,037.0 | 2,227.0 | 3,252.2 | 63.8 | (NA) | 223.5 | 99 | 99 |
| INDUSTRY 2452.--PREFABRICATED WOOD BUILDINGS | | | | | | | | | | | | | | | |
| 1972 Census..... | 315 | 250 | 25.5 | 200.3 | 19.2 | 35.3 | 125.5 | 460.8 | 618.6 | 1,058.7 | 30.0 | (NA) | 145.9 | 97 | 96 |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. For 1972, there are 352 companies for industry 2451 and 268 companies for industry 2452.

(NA) Not available.

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

| Industry | Composition of new industry | | | | | Totals for industries on old SIC | | | | |
|---|-----------------------------|---------------------------|---------------|----------------------------|--------------------|----------------------------------|---------------------------|---------------|----------------------------|--------------------|

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization--the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization--the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|---|----------------------|----------------------|-----------------------|--------------------------------|--|-------------------------------------|-----------------------------|--------------------------------|-------------------------------|
| | | Total | Primary products | Secondary products | Miscel- laneous receipts | Primary product special- ization ratio | Total, made in all industries | Made in this industry | Made in other industries | Coverage ratio |
| | | (million dollars) | (million dollars) | (million dollars) | (million dollars) | Col. B Col. B & C (percent) | (million dollars) | (million dollars) | (million dollars) | Col. B Col. F (percent) |

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Mobile homes (SIC 2451) | Prefabri- cated wood buildings (SIC 2452) | Other industries |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5-digits) followed by "00," or in some cases to the appropriate product-group code (4-digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | Product class and geographic area | Value of shipments (million dollars) |

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | Product class and geographic area | Value of shipments (million dollars) |
|---|---|--|---|

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. (Z) Less than half of the unit of measurement shown.

¹From 10 to 30 percent of this figure was estimated.

²From 30 to 50 percent of this figure was estimated.

TABLE 7B. Fuels and Electric Energy Consumed: 1971 and 1967

(Not available for this report)

MAJOR GROUP 25

Furniture and Fixtures

25A Household furniture

25B Office, public building, and miscellaneous
furniture; office and store fixtures

This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork are classified in industry 2431; wood kitchen cabinets in industry 2434; cut stone and concrete furniture in Major Group 32; laboratory and hospital furniture in Major Group 38; beauty and barber shop furniture in Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

(X) Not applicable. (NA) Not available.

¹The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

²For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work in process during the year. For 1899 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.

³The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

⁴The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.

⁵See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.

⁶The figures for 1939 to 1972 include data for establishments primarily engaged in manufacture of metal partitions, classified for earlier years in the fabricated metal products industries. Value added by manufacture for 1939, excluding data for these establishments, was \$410.7 million.

⁷Similar data are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these establishments are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, or prior to 1949.

⁸These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

⁹The figures for 1937 and later years include data for establishments primarily engaged in manufacture of venetian blinds, included for earlier years in the series for the lumber and wood products, except furniture industries. Value added by manufacture for 1937, excluding data for these establishments and therefore on a basis comparable with 1935, was \$417.7 million.

¹⁰The figures for 1899 to 1925 do not include data for establishments primarily engaged in manufacture of sewing machine cases, cabinets, and tables, classified for these years in the machinery (except electrical) industries.

¹¹The figures for 1899 to 1909 do not include data for establishments primarily engaged in manufacture of window and door screens, included for these years in the series for the lumber and wood products, except furniture industries. Value added by manufacture for 1914, excluding data for these establishments and on a basis comparable with 1909, was \$169.4 million.

TABLE 2. General Statistics by Geographic Area: 1972 and 1967

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (2) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

²The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

EXPLANATORY TEXT

HOUSEHOLD FURNITURE

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2511—Wood Household Furniture, Except Upholstered***
- 2512—Wood Household Furniture, Upholstered***
- 2514—Metal Household Furniture**
- 2515—Mattresses and Bedspreads**
- 2517—Wood Television, Radio, Phonograph, and Sewing Machine Cabinets***
- 2519—Household Furniture, N.E.C.**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2511.—WOOD HOUSEHOLD FURNITURE (Short Title)

This industry comprises establishments primarily engaged in manufacturing wood household furniture commonly used in dwellings. This industry also includes establishments primarily engaged in manufacturing infants' and children's wood furniture and wood outdoor furniture. Establishments primarily engaged in manufacturing kitchen cabinets, formerly in this industry, are classified in industry 2434 (Wood Kitchen Cabinets) and upholstered furniture is classified in industry 2512. For a detailed list of products of industry 2511, refer to table 6A, product codes 25112 19 to 25117 61.

* Note that the "short title" for this industry is used throughout the report.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual; however, the SIC number and title are unchanged. Kitchen cabinets, formerly included in industry 2511, are now classified in industry 2434, and wood, TV, radio, phonograph, and sewing machine cabinets, which were previously in this industry, are now classified in industry 2517. The effect of the revisions on the data is summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 3,351 establishments with 173.8 thousand total employment and \$2,018.9 million value added would have been classified in industry 2511 under the old SIC.

Value of shipments and other receipts of the Wood Household Furniture Industry in 1972 totaled \$2,870.0 million. This included shipments of wood household furniture (primary products) valued at \$2,582.7 million, shipments of other products (secondary products) valued at \$168.3 million, and miscellaneous receipts (mainly resales) of \$119.0 million.

Shipments of wood household furniture (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of upholstered household furniture (\$70.2 million).

Shipments of wood household furniture (primary products) from establishments classified in industry 2511 in 1972 represented 95 percent (coverage ratio) of these products valued at \$2,716.8 million shipped by all industries. Other industries shipping wood household furniture consisted mainly of industry 2517, Wood TV and Radio Cabinets, (\$39.4 million) and industry 2512, Upholstered Household Furniture, (\$36.2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2511, these establishments accounted for 9 percent of value of shipments.

INDUSTRY 2512.—UPHOLSTERED HOUSEHOLD FURNITURE (Short Title)

This industry comprises establishments primarily engaged in manufacturing upholstered furniture on wood frames. Estab-

lishments primarily engaged in manufacturing wood frames for upholstered furniture are classified in industry 2426 (Hardwood Dimension and Flooring). Establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds are classified in industry 2515, Mattresses and Bedsprings, regardless of the material used in the frame. For a detailed list of products of industry 2512, refer to table 6A, product codes 25120 12 to 25120 98.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual; however, the SIC number and title are unchanged. The product class has been changed from 25121 to 25120, while the content varies in that "wood furniture frames" was transferred to industry 2426 (code 24266 11). The effect of the revisions on the data is summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 1,630 establishments with 98.0 thousand total employment and \$1,148.3 million value added would have been classified in industry 2512 under the old SIC.

Value of shipments and other receipts of the Upholstered Household Furniture Industry in 1972 totaled \$2,104.7 million. This included shipments of upholstered household furniture (primary products) valued at \$1,887.1 million, shipments of other products (secondary products) valued at \$168.9 million, and miscellaneous receipts (mainly resales) of \$48.7 million.

Shipments of upholstered household furniture (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of mattresses and bedsprings (\$115.9 million).

Shipments of upholstered household furniture (primary products) from establishments classified in industry 2512 in 1972 represented 95 percent (coverage ratio) of these products valued at \$1,990.5 million shipped by all industries. In 1967, the coverage ratio was 94 percent. Other industries shipping upholstered household furniture (primary products) consisted mainly of industry 2511, Wood Household Furniture, (\$70.2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2512, these establishments accounted for 6 percent of value of shipments.

INDUSTRY 2514.—METAL HOUSEHOLD FURNITURE

This industry comprises establishments primarily engaged in manufacturing metal household furniture, whether padded or plain, of a type commonly used in dwellings. Establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds are classified in industry 2515, regardless of the material used in the frame. For a detailed list of products of industry 2514, refer to table 6A, product codes 25141 11 to 25144 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Metal Household Furniture Industry in 1972 totaled \$890.4 million. This included shipments of metal household furniture (primary products) valued at \$780.0 million, shipments of other products (secondary products) valued at \$87.2 million, and miscellaneous receipts (mainly resales) of \$23.2 million.

Shipments of metal household furniture (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of wood household furniture (\$13.4 million).

Shipments of metal household furniture (primary products) from establishments classified in industry 2514 in 1972 represented 91 percent (coverage ratio) of these products valued at \$859.3 million shipped by all industries. In 1967, the coverage ratio was 90 percent. Other industries shipping metal household furniture (primary products) consisted mainly of industry 2511, Wood Household Furniture, (\$8.9 million) and industry 2515, Mattresses and Bedsprings, (\$6.8 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2514, these establishments accounted for 5 percent of value of shipments.

INDUSTRY 2515.—MATTRESSES AND BEDSPRINGS

This industry comprises establishments primarily engaged in manufacturing innerspring mattresses, box spring mattresses, and noninnerspring mattresses containing felt, foam rubber, or any other filling material; and assembled wire springs (fabric, coil, or box) for use on beds, couches, and cots. This industry

also includes establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds regardless of the material used in the frame.

Establishments primarily engaged in manufacturing automobile seats and backs are classified in industry 2531; individual wire springs in industry 3481; and paddings and upholstery filling are classified in industry 2293. For a detailed list of products of industry 2515 refer to table 6A, product codes 25151 15 to 25156 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Mattresses and Bedsprings Industry in 1972 totaled \$1,048.3 million. This included shipments of mattresses and bedsprings (primary products) valued at \$947.8 million, shipments of other products (secondary products) valued at \$59.2 million, and miscellaneous receipts (mainly resales) of \$41.3 million.

Shipments of mattresses and bedsprings (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of upholstered household furniture (\$20.2 million).

Shipments of mattresses and bedsprings (primary products) from establishments classified in industry 2515 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,079.6 million shipped by all industries. In 1967, the coverage ratio was 91 percent. Other industries shipping mattresses and bedsprings (primary products) consisted mainly of industry 2512, Upholstered Household Furniture, (\$115.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2515, these establishments accounted for 10 percent of value of shipments.

INDUSTRY 2517.—WOOD TV AND RADIO CABINETS (Short Title)

This industry comprises establishments primarily engaged in manufacturing wood radio, phonograph, hi-fi, and television cabinets. This industry also includes establishments primarily engaged in manufacturing sewing machine cabinets. Establishments primarily engaged in manufacturing wood household

furniture are classified in industry 2511. For a detailed list of products of industry 2517, refer to table 6A, product codes 25170 13 to 25170 21.

The code number for this industry was changed in the 1972 revision of the SIC manual from the previous classification system. Industry 2517, Wood TV and Radio Cabinets, had been classified under product codes 25111 13, 25111 15, and 25112 11, as a part of the Wood Household Furniture Industry, 2511. The effect of the revisions on the data is summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 3,351 establishments with 173.8 thousand total employment and \$2,018.9 million value added would have been classified in industry 2511 under the old SIC.

Value of shipments and other receipts of the Wood TV and Radio Cabinets Industry in 1972 totaled \$330.2 million. This included shipments of wood TV and radio cabinets (primary products) valued at \$267.8 million, shipments of other products (secondary products) valued at \$45.7 million, and miscellaneous receipts of \$16.7 million.

Shipments of wood TV and radio cabinets (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of wood household furniture (\$39.4 million).

Shipments of wood TV and radio cabinets (primary products) from establishments classified in industry 2517 in 1972 represented 91 percent (coverage ratio) of these products valued at \$293.0 million shipped by all industries. Other industries shipping wood TV and radio cabinets (primary products) consisted mainly of industry 2511, Wood Household Furniture, (\$8.5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2517, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 2519.—HOUSEHOLD FURNITURE, N.E.C.

This industry comprises establishments primarily engaged in manufacturing reed, rattan, and other wicker furniture, plastics and fiberglass household furniture and cabinets, and

EXPLANATORY TEXT—Continued

household furniture, n.e.c. For a detailed list of products of industry 2519, refer to table 6A, product codes 25190 11 to 25190 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same. However, it should be noted that the 1972 data are not comparable to prior years' data due to a large number of establishments switching to this industry in 1972.

Value of shipments and other receipts of the Household Furniture, N.E.C., Industry in 1972 totaled \$172.6 million. This included shipments of Household Furniture, N.E.C., (primary products) valued at \$139.8 million, shipments of other products (secondary products) valued at \$26.2 million, and miscellaneous receipts (mainly resales) of \$6.6 million.

Shipments of household furniture, n.e.c., (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 83 percent.

Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastics products (\$19.9 million).

Shipments of household furniture, n.e.c., (primary products) from establishments classified in industry 2519 in 1972 represented 73 percent (coverage ratio) of these products valued at \$190.3 million shipped by all industries. In 1967, the coverage ratio was 56 percent. Other industries shipping household furniture, n.e.c., (primary products) consisted mainly of industry 3079, Miscellaneous Plastics Products, (\$31.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2519, these establishments accounted for 8 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|------------------------|---|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2511 | Industry 2512 | Industry 2514 | Industry 2515 | Industry 2517 | Industry 2519 |
|-----------|---------------|---------------|---------------|---------------|---------------|---------------|
| 1972..... | 2,160 | 1,201 | 426 | 888 | 95 | 157 |
| 1967..... | (NA) | 1,582 | 464 | 939 | (NA) | 75 |
| 1963..... | (NA) | 1,729 | 508 | 1,066 | (NA) | 72 |

(NA) Not available. (Z) Less than half of the unit of measurement shown. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²Effective with the 1972 census, a large number of establishments previously classified in other industries reported significant shipments of products included in industry 2519. These changes in industry classification of establishments are primarily the result of modifications in their product mix between 1967 and 1972. Such modifications are not readily identifiable until census years. Accordingly, data for years prior to 1972 do not reflect the more gradual shift of these establishments.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee | Assets per employee | Production worker as percent of total employment | Annual man-hours of production workers | Average hourly earnings of production workers | Cost of materials per dollar of shipments | Cost of materials and payrolls per dollar shipments | Assets per dollar of shipments | Value added per employee | Payrolls as percent of value added | Value added per man-hour of production worker |

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

| Industry | Composition of new industry | | | | | Totals for industries on old SIC | | | | |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

| ESTABS, COVERED BY ADMIN. RECORD ¹ . | 30 | .1 | .9 | .1 | .2 | .7 | 1.7 | 1.3 | 3.0 | .1 | .3 |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |
|--------------------------------|---|----------------------------|-------------------|------------------------------|--------------------|-------------------------|----------------------------|---|--|---|--|

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| 25190 00 | Other household furniture, n.e.c., n.s.k., for companies with 10 employees or more. (See note.)..... | | (X) | 14.7 | (X) | 9.2 |
| 25190 02 | Other household furniture, n.e.c., n.s.k., for companies with less than 10 employees. (See note.)..... | | (X) | 4.4 | (X) | .8 |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. ^cFrom 10 to 30 percent of this figure was estimated.

¹Estimates of monthly shipments of mattresses and bedsprings have been published since 1957 in Current Industrial Reports, series M25E, Mattresses, Bedsprings, and Other Sleep Furniture.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |
|-----------------------------------|---|------|-----------------------------------|---|------|
| | 1972 | 1967 | | 1972 | 1967 |
| STUDIO COUCHES (25156)--Continued | | | STUDIO COUCHES (25156)--Continued | | |
| North Central Region..... | 7.0 | 4.1 | South Region--Continued | | |
| East North Central Division..... | AA | AA | East South Central Division..... | AA | AA |
| Indiana..... | AA | (NA) | Mississippi..... | AA | AA |
| West North Central Division..... | CC | BB | West South Central Division..... | AA | (NA) |
| Kansas..... | BB | AA | Texas..... | AA | (NA) |
| South Region..... | 5.6 | 3.3 | West Region..... | 5.1 | 4.5 |
| South Atlantic Division..... | 1.6 | (NA) | Pacific Division..... | 5.1 | BB |
| | | | California..... | 5.1 | BB |

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

¹The individual product codes included in this class of product for 1972 differ from the 1967 definition. Products shifting into or out of this class of product represent approximately 11 percent of the total 1967 shipments at the U.S. level.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

²The individual product codes included in this class of product for 1972 differ from the 1967 definition. Products shifting into or out of this class of product represent approximately 11 percent of the total 1967 shipments at the U.S. level.

³This class of product for 1972 differs from the 1967 definition. Products shifting into or out of this class of product represent approximately 4 percent of the total 1967 shipments at the U.S. level.

EXPLANATORY TEXT

OFFICE, PUBLIC BUILDING, AND MISCELLANEOUS FURNITURE; OFFICE AND STORE FIXTURES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2521—Wood Office Furniture
- 2522—Metal Office Furniture
- 2531—Public Building and Related Furniture
- 2541—Wood Partitions, Shelving, Lockers, and Office and Store Fixtures*
- 2542—Metal Partitions, Shelving, Lockers, and Office and Store Fixtures*
- 2591—Drapery Hardware and Window Blinds and Shades*
- 2599—Furniture and Fixtures, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2521.—WOOD OFFICE FURNITURE

This industry comprises establishments primarily engaged in manufacturing wood office furniture, whether padded, upholstered, or plain. For a detailed list of products of industry 2521, refer to table 6A, product codes 25210 11 to 25210 98.

*Note that the "short title" for this industry is used throughout the report.

The code number and the definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Wood Office Furniture Industry in 1972 totaled \$249.7 million. This included shipments of wood office furniture (primary products) valued at \$217.2 million, shipments of other products (secondary products) valued at \$23.9 million, and miscellaneous receipts (mainly resales) of \$8.6 million.

Shipments of wood office furniture (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent. Secondary products shipped by this industry in 1972 consisted mainly of public building and related furniture (\$7.7 million).

Shipments of wood office furniture (primary products) from establishments classified in industry 2521 in 1972 represented 84 percent (coverage ratio) of these products valued at \$259.1 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping wood office furniture consisted mainly of industry 2522, Metal Office Furniture, (\$23.2 million) and industry 2541, Wood Partitions and Fixtures, (\$5.3 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2521, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 2522.—METAL OFFICE FURNITURE

This industry comprises establishments primarily engaged in manufacturing metal office furniture, whether padded or plain. Establishments primarily engaged in manufacturing safes and vaults are classified in industry 3492. For a detailed list of products of industry 2522, refer to table 6A, product codes 25221 13 to 25224 98.

The code number and the definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Metal Office Furniture Industry in 1972 totaled \$853.7 million. This included shipments of metal office furniture (primary products) valued at \$697.7 million, shipments of other products (secondary products) valued at \$81.0 million, and miscellaneous receipts (mainly resales) of \$75.0 million.

Shipments of metal office furniture (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent. Secondary products shipped by this industry in 1972 consisted mainly of wood office furniture (\$23.2 million) and metal partitions and fixtures (\$13.7 million).

Shipments of metal office furniture (primary products) from establishments classified in industry 2522 in 1972 represented 89 percent (coverage ratio) of these products valued at \$781.3 million shipped by all industries. In 1967, the coverage ratio was 88 percent. Other industries shipping metal office furniture consisted mainly of industry 3499, Fabricated Metal Products, N.E.C., (\$20 to \$50 million) and industry 2542, Metal Partitions and Fixtures (\$12.7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2522, these establishments accounted for 0.3 percent of value of shipments.

INDUSTRY 2531.—PUBLIC BUILDING AND RELATED FURNITURE

This industry comprises establishments primarily engaged in manufacturing furniture for schools, theaters, assembly halls, churches, and libraries. Establishments primarily engaged in manufacturing seats for public conveyances and seats for automobiles and aircraft are included in this industry. Establishments primarily engaged in manufacturing stone furniture are classified in industry 3281 and concrete furniture in industry 3272. For a detailed list of products of industry 2531, refer to table 6A, product codes 25311 12 to 25312 98.

The code number and the definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Public Building Furniture Industry in 1972 totaled \$535.3 million. This included shipments of public building and related furniture (primary products) valued at \$421.6 million, shipments of other products (secondary products) valued at \$69.8 million, and miscellaneous receipts (mainly resales) of \$43.9 million.

Shipments of public building furniture (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 84 percent. Secondary products shipped by this industry in 1972 consisted mainly of wood partitions and fixtures (\$12.5 million).

Shipments of public building furniture (primary products) from establishments classified in industry 2531 in 1972 represented 87 percent (coverage ratio) of these products valued at \$485.2 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping public building furniture consisted mainly of industry 2521, Wood Office Furniture, (\$7.7 million) and industry 2522, Metal Office Furniture, (\$6.8 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2531, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 2541.—WOOD PARTITIONS AND FIXTURES (Short Title)

This industry comprises establishments primarily engaged in manufacturing wood shelving, lockers, office and store fixtures, prefabricated partitions, plastic laminated fixture tops, and related fabricated products. Establishments primarily engaged in manufacturing refrigerated cabinets, showcases, and display cases are classified in industry 3585 and safes and vaults in industry 3499. For a detailed list of products of industry 2541, refer to table 6A, product codes 25411 11 to 25413 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Wood Partitions and Fixtures Industry in 1972 totaled \$791.7 million. This included shipments of wood partitions and fixtures (primary products) valued at \$686.0 million, shipments of other products (secondary products) valued at \$56.9 million, and miscellaneous receipts (mainly resales) of \$48.8 million.

Shipments of wood partitions and fixtures (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of metal partitions and fixtures (\$12.6 million).

Shipments of wood partitions and fixtures (primary products) from establishments classified in industry 2541 in 1972 represented 89 percent (coverage ratio) of these products valued at \$772.1 million shipped by all industries. In 1967, the coverage ratio was also 89 percent. Other industries shipping wood partitions and fixtures consisted mainly of industry

2542, Metal Partitions and Fixtures, (\$27.6 million) and industry 2531, Public Building and Related Furniture, (\$12.5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2541, these establishments accounted for 7 percent of value of shipments.

INDUSTRY 2542.—METAL PARTITIONS AND FIXTURES (Short Title)

This industry comprises establishments primarily engaged in manufacturing metal shelving, storage racks, lockers, office and store fixtures, prefabricated partitions, and related fabricated products. Establishments primarily engaged in manufacturing refrigerated cabinets, showcases, and display cases are classified in industry 3585 and safes and vaults in industry 3499. For a detailed list of products of industry 2542, refer to table 6A, product codes 25421 13 to 25424 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Metal Partitions and Fixtures Industry in 1972 totaled \$734.5 million. This included shipments of metal partitions and fixtures (primary products) valued at \$617.5 million, shipments of other products (secondary products) valued at \$71.4 million, and miscellaneous receipts (mainly resales) of \$45.6 million.

Shipments of metal partitions and fixtures (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of wood partitions and fixtures (\$27.6 million) and fabricated metal products, n.e.c. (\$14.6 million).

Shipments of metal partitions and fixtures (primary products) from establishments classified in industry 2542 in 1972 represented 86 percent (coverage ratio) of these products valued at \$713.2 million shipped by all industries. In 1967, the coverage ratio was 84 percent. Other industries shipping metal partitions and fixtures consisted mainly of industry 2522, Metal Office Furniture (\$13.7 million) and industry 2541, Wood Partitions and Fixtures (\$12.6 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at

the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2542, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 2591.—DRAPERY HARDWARE AND BLINDS AND SHADES (Short Title)

This industry comprises establishments primarily engaged in manufacturing curtain and drapery rods, poles, and fixtures; and venetian blinds and other window blinds and shades, regardless of the materials used, except canvas shades and awnings which are classified in industry 2394. For a detailed list of products of industry 2591, refer to table 6A, product codes 25911 12 to 25912 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number is also the same. However, the SIC title has been changed from Venetian Blinds and Shades.

Value of shipments and other receipts of the Drapery Hardware and Blinds and Shades Industry in 1972 totaled \$364.5 million. This included shipments of drapery hardware and blinds and shades (primary products) valued at \$299.2 million, shipments of other products (secondary products) valued at \$34.5 million, and miscellaneous receipts (mainly resales) of \$30.8 million.

Shipments of drapery hardware and blinds and shades (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent. Secondary products shipped by this industry in 1972 consisted mainly of coated fabrics, not rubberized, (\$10 to \$20 million) and miscellaneous plastics products (\$10.8 million).

Shipments of drapery hardware and blinds and shades (primary products) from establishments classified in industry 2591 in 1972 represented 96 percent (coverage ratio) of these products valued at \$311.3 million shipped by all industries. In 1967, the coverage ratio was 94 percent. Other industries shipping drapery hardware and blinds and shades consisted mainly of industry 3962, Artificial Flowers, (\$2 to \$5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2591, these establishments accounted for 8 percent of value of shipments.

INDUSTRY 2599.—FURNITURE AND FIXTURES, N.E.C.

This industry comprises establishments primarily engaged in manufacturing furniture and fixtures, not elsewhere classified, including furniture especially designed for use in restaurants, bars, cafeterias, bowling establishments, and ships. For a detailed list of products of industry 2599, refer to table 6A, product codes 25990 21 to 25990 98.

The code number and the definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Furniture and Fixtures, N.E.C., Industry in 1972 totaled \$372.0 million. This included shipments of furniture and fixtures, n.e.c., (primary products) valued at \$302.0 million, shipments of other products (secondary products) valued at \$39.5 million, and miscellaneous receipts (mainly resales) of \$30.5 million.

Shipments of furniture and fixtures, n.e.c., (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 87

percent. Secondary products shipped by this industry in 1972 consisted mainly of wood partitions and fixtures (\$6.0 million) and public building and related furniture (\$5.3 million).

Shipments of furniture and fixtures, n.e.c., (primary products) from establishments classified in industry 2599 in 1972 represented 79 percent (coverage ratio) of these products valued at \$379.9 million shipped by all industries. In 1967, the coverage ratio was 75 percent. Other industries shipping furniture and fixtures, n.e.c., consisted mainly of industry 2542, Metal Partitions and Fixtures, (\$14.4 million) and industry 3841, Surgical and Medical Instruments, (\$10 to \$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2599, these establishments accounted for 4 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|---|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |
| | (number) | (number) | (1,000) | (million dollars) | (1,000) | (millions) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (percent) | (percent) |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2521 | Industry 2522 | Industry 2531 | Industry 2541 | Industry 2542 | Industry 2591 | Industry 2599 |
|-----------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|
| 1972..... | 232 | 165 | 405 | 1,473 | 482 | 493 | 477 |
| 1967..... | 172 | 166 | 428 | 1,463 | 491 | 581 | 317 |
| 1963..... | 131 | 153 | 424 | (NA) | (NA) | 695 | 354 |

(NA) Not available. (S) Withheld because the data did not meet publication standards. *The figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²Data for 1972 include a significant number of establishments previously classified in other industries. These establishments contribute to a greater company count. These added establishments, reflecting a change in the product mix between 1967 and 1972, are not really identifiable in the ASM years. Accordingly, the change since 1967 should have been more gradual.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over.

TABLE 4. General Statistics, by Employment Size of Establishment: 1972

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of the other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (2) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

See footnote at end of table.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

(D) Withheld to avoid disclosing data for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|--|----------------------|----------------------|-----------------------|--------------------------------|--|-------------------------------------|-----------------------------|--------------------------------|-------------------------------|

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Wood office furniture (SIC 2521) | Metal office furniture (SIC 2522) | Public building and related furniture (SIC 2531) | Wood partitions and fixtures (SIC 2541) | Metal partitions and fixtures (SIC 2542) | Drapery hardware and blinds and shades (SIC 2591) | Furniture and fixtures, n.e.c. TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | Other industries | Product code | Industry, class of products, and miscellaneous receipts | Other industries |
|--------------|---|------------------|--------------|--|------------------|
| | Listing of the other industries with over \$2 million shipments of the primary products | | | Listing of the other industries with over \$2 million shipments of the primary products--Continued | |
| 2521- | 2511 Wood household furniture..... | 2.7 | 2542- | 2514 Metal household furniture..... | 3.5 |
| | 2512 Upholstered household furniture..... | 2.6 | | 3429 Hardware, n.e.c..... | (2-5) |

| 25990 02 | Furniture and fixtures, n.e.c., n.s.k., for companies with less than 10 employees. (See note.)..... | | (X) | 13.5 | (X) | 5.2 |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. ^eFrom 10 to 30 percent of this figure was estimated.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments:
1958, 1963, 1967 to 1972

(In millions of dollars)

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. (Z) Less than half of the unit of measurement shown.

¹From 10 to 30 percent of this figure was estimated.²From 30 to 50 percent of this figure was estimated.

MAJOR GROUP 26

Paper and Allied Products

- 26A Pulp, paper, and board mills
- 26B Converted paper and paperboard products,
except containers and boxes
- 26C Paperboard containers and boxes

This major group includes the manufacture of pulps from wood and other cellulose fibers, and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products such as paper coated off the paper machine, paper bags, paper boxes, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in industry 3291, carbon paper in industry 3955, and photosensitized and blueprint paper in industry 3861.

(X) Not applicable. (NA) Not available.

¹The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

²For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.

³The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

⁴The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.

⁵See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.

⁶Data prior to 1958 are not directly comparable due to a change in the Standard Industrial Classification. Hard pressed wood fiberboard mills are no longer classified in industry 2661, but are classified in industry 2499, Wood Products, N.E.C.

⁷The figures for 1939 to 1972 included, whereas those for earlier years excluded, data for establishments primarily engaged in the manufacture of printed paper patterns and laminated enamel hard pressed insulating wallboards of vegetable fiber. Value added to manufacture in 1939 excluding data for these establishments was \$869.9 million. The comparability of 1947 to 1967 figures with those for earlier years is further affected by the inclusion of data for establishments primarily engaged in the manufacture of tags which were formerly classified in the printing and publishing area.

⁸Similar data are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these establishments are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, or prior to 1949.

⁹These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

¹⁰The figures for 1937 to 1972 include, whereas those for earlier years exclude, data for establishments primarily engaged in manufactures of fiber products, fiber conduits, and molded pulp products. Value added by manufacture for 1937, excluding data for these establishments, was \$852.7 million.

¹¹The figures for 1931 to 1972 include, whereas those for earlier years exclude, data for establishments primarily engaged in manufacture of papeteries. Value added by manufacture for 1931, excluding data for these establishments, was \$599.6 million.

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

²The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

EXPLANATORY TEXT

PULP, PAPER, AND BOARD MILLS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2611—Pulpmills
- 2621—Papermills, Except Building Papermills*
- 2631—Paperboard Mills
- 2661—Building Paper and Building Board Mills*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2611.—PULPMILLS

This industry comprises establishments primarily engaged in manufacturing pulp from wood or from other materials such as rags, linters, wastepaper, bagasse, and straw. Logging camps operated by pulpmills and not separately reported are also included in this industry. Establishments primarily engaged in cutting pulpwood are classified in industry 2411 (Logging Camps and Logging Contractors); and pulpmills combined with papermills, paperboard mills, and building paper and board mills, and not separately reported, are classified with the latter in industries 2621, 2631, and 2661, respectively. For a detailed list of products of industry 2611, refer to table 6A, product codes 26111 11 to 26112 89.

*Note that the "short title" for this industry is used throughout the report.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

While there has been no change in the classification system, a number of establishments previously classified in this industry are now included in industry 2621, Papermills, Except Building Paper, and industry 2631, Paperboard Mills, since the operations involved represent integrated mills. In any comparison of historical statistics, all three of these industries should be considered. Accordingly, the general statistics for this single industry for 1972 are not strictly comparable to those shown for prior years.

Value of shipments and other receipts of the Pulpmills Industry in 1972 totaled \$709.9 million. This included shipments of pulp (primary products) valued at \$668.4 million, shipments of other products (secondary products) valued at \$35.6 million, and miscellaneous receipts of \$5.9 million.

Shipments of pulp (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent. Secondary products shipped by this industry in 1972 consisted mainly of logging products and contract logging (\$10 to \$20 million) and sawmill and planing mill products (over \$2 million).

Shipments of pulp (primary products) from establishments classified in industry 2611 in 1972 represented 59 percent (coverage ratio) of these products valued at \$1,132.4 million shipped by all industries. In 1967, the coverage ratio was 71 percent. Other industries shipping pulp consisted mainly of industry 2621, Papermills, Except Building Paper, (\$266.6 million) and industry 2631, Paperboard Mills, (\$185.2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2611, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2621.—PAPERMILLS, EXCEPT BUILDING PAPER (Short Title)

This industry comprises establishments primarily engaged in manufacturing paper, except building paper (industry 2661), from woodpulp and other fibers, and which may also manufac-

ture converted paper products. Pulp mills combined with paper mills and not separately reported are also included in this industry; where separately reported, they are classified in industry 2611. Establishments primarily engaged in manufacturing converted paper products from purchased paper stock are classified in SIC groups 264 (Miscellaneous Converted Paper Products) or 265 (Paperboard Containers and Boxes). For a detailed list of products of industry 2621, refer to table 6A, product codes 26211 00 to 26210 80.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Paper Mills, Except Building Paper, Industry in 1972 totaled \$6,385.2 million. This included shipments of papermill products, except building paper, (primary products) valued at \$5,777.3 million, shipments of other products (secondary products) valued at \$566.4 million, and miscellaneous receipts of \$41.5 million.

Shipments of papermill products, except building paper, (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of pulp (\$266.6 million) and paperboard (\$209.8 million).

Shipments of papermill products, except building paper, (primary products) from establishments classified in industry 2621 in 1972 represented 93 percent (coverage ratio) of these products valued at \$6,182.2 million shipped by all industries. In 1967, the coverage ratio was also 93 percent. Other industries shipping papermill products, except building paper, consisted mainly of industry 2631, Paperboard Mills, (\$384.1 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2621, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2631.—PAPERBOARD MILLS

This industry comprises establishments primarily engaged in manufacturing paperboard, including paperboard coated on the paperboard machine, from woodpulp, wastepaper, and other fibers; and which may also manufacture converted paperboard products. Pulp mills combined with paperboard

mills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611. Establishments primarily engaged in manufacturing converted paperboard products from purchased paperboard are classified in SIC groups 264 (Miscellaneous Converted Paper Products) and 265 (Paperboard Containers and Boxes), and building board in industry 2661. For a detailed list of products of industry 2631, refer to table 6A, product codes 26311 10 to 26318 00.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Paperboard Mills Industry in 1972 totaled \$4,153.5 million. This included shipments of paperboard mill products (primary products) valued at \$3,441.9 million, shipments of other products (secondary products) valued at \$682.3 million, and miscellaneous receipts of \$29.3 million.

Shipments of paperboard mill products (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 84 percent. Secondary products shipped by this industry in 1972 consisted mainly of paper, except building paper, (\$384.1 million) and pulp (\$185.2 million).

Shipments of paperboard mill products (primary products) from establishments classified in industry 2631 in 1972 represented 94 percent (coverage ratio) of these products valued at \$3,657.4 million shipped by all industries. In 1967, the coverage ratio was 91 percent. Other industries shipping paperboard mill products consisted mainly of industry 2621, Paper Mills, Except Building Paper, (\$209.8 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2631, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2661.—BUILDING PAPER AND BOARD MILLS (Short Title)

This industry comprises establishments primarily engaged in manufacturing building paper and building board from wood and other fibrous materials. Pulp mills combined with building paper and building board mills, not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611. For a detailed list of

EXPLANATORY TEXT—Continued

products of industry 2661, refer to table 6A, product codes 26611 10 to 26612 00.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Building Paper and Board Mills Industry in 1972 totaled \$456.2 million. This included shipments of building paper and board (primary products) valued at \$368.3 million, shipments of other products (secondary products) valued at \$63.0 million, and miscellaneous receipts (mainly resales) of \$24.9 million.

Shipments of building paper and board (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of mineral wool (\$34.1 million) and wood products, n.e.c., (\$24.8 million).

Shipments of building paper and board (primary products) from establishments classified in industry 2661 in 1972 represented 92 percent (coverage ratio) of these products valued at \$401.9 million shipped by all industries. In 1967, the coverage ratio was 96 percent. Other industries shipping building paper and board consisted mainly of industry 2421, Sawmills and Planing Mills, General, (over \$2 million) and industry 2631, Paperboard Mills, (\$8.4 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2661, these establishments accounted for 1 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2611 | Industry 2621 | Industry 2631 | Industry 2661 |
|-----------|------------------|------------------|------------------|------------------|
| 1972..... | 46 | 194 | 135 | 45 |
| 1967..... | 45 | 203 | 148 | 43 |
| 1963..... | 34 | 186 | 146 | 33 |

(NA) Not available.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²While there has been no change in the 1972 Standard Industrial Classification system from that used in earlier years, a number of establishments previously classified in this industry are now included in industry 2621, Papermills, Except Building Paper, and industry 2631, Paperboard Mills, since the operations involved represent integrated mills. In any comparison of historical statistics, all three of these industries should be considered. Accordingly, the general statistics for this single industry for 1972 are not strictly comparable to those shown for prior years.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent

E3--30 to 39 percent

E5--50 to 59 percent

E7--70 to 79 percent

E9--90 to 99 percent

E2--20 to 29 percent

E4--40 to 49 percent

E6--60 to 69 percent

E8--80 to 89 percent

E0--100 percent

(NA) Not available.

(D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

TABLE 3. Detailed Statistics: 1972

(See appendix, Explanation of Terms)

| Item | Pulpmills (SIC 2611) | Papermills, except building paper (SIC 2621) | | | Paperboard mills (SIC 2631) | | | Building paper and board mills (SIC 2661) | | |

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|--|--------------------|-------------------|--------------------|------------------------|--------------------------------------|------------------------------------|-----------------------|--------------------------|------------------|

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Pulpmills (SIC 2611) | Papermills, except building paper (SIC 2621) | Paperboard mills (SIC 2631) | Building paper and board mills (SIC 2661) | Other industries |

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Pulpmills (SIC 2611) | Papermills, except building paper (SIC 2621) | Paperboard mills (SIC 2631) | Building paper and board mills (SIC 2661) | Other industries |
|---|---|----------------|----------------------|--|-----------------------------|---|------------------|
| Shipments and miscellaneous receipts--Continued | | | | | | | |
| Other product shipments by 4-digit product group: | | | | | | | |
| 2141- | Tobacco stemming and redrying..... | (X) | - | (over 2) | - | - | (X) |
| 2297- | Nonwoven fabrics..... | (X) | - | 26.0 | - | (under 2) | (X) |

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error estimate or on the basis of a consistency review.

¹Comparable monthly and detailed annual production data are published in Current Industrial Reports, series M26A, "Pulp, Paper, and Board."

²The difference between total shipments and interplant transfers represents "market shipments." In the case of woodpulp, total shipments and interplant transfers exclude transfers of woodpulp to a paper or board mill operated at the same physical location unless the pulpmill is reported separately. In the case of paper and board, total shipments and interplant transfers include transfers of paper and board to a converting facility conducted at the same physical location.

³The source of 1972 woodpulp "Production for all purposes," is the 1972 Current Industrial Report M26A(72)-13, "Pulp, Paper, and Board;" the 1967 woodpulp production data are from the 1967 report, M26A(67)-13.

⁴The total does not include tonnage for the value of shipments reported for product codes 26210 00 and 26210 02.

⁵The total does not include tonnage for the value of shipments reported for product codes 26310 00 and 26310 02.

⁶The total does not include tonnage for the value of shipments reported for product codes 26610 00 and 26610 02.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

- Represents zero. (X) Not applicable. (NA) Not available. (S) Withheld because the data did not meet publication standards.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Due to a change in 1967 in the detailed grades of paper and paperboard collected, many of the product classes do not have comparable data for 1963 and 1958.

³The total does not include tonnage for the value of shipments reported for product codes 26210 00 and 26210 02.

⁴The total does not include tonnage for the value of shipments reported for product codes 26310 00 and 26310 02.

⁵The total does not include tonnage for the value of shipments reported for product codes 26610 00 and 26610 02.

⁶Total for 1958 includes data for hardpressed fiberboard. Due to a classification change in 1963, hard pressed fiberboard is now included in industry 2499, Wood Products, N.E.C.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

EXPLANATORY TEXT

CONVERTED PAPER AND PAPERBOARD PRODUCTS, EXCEPT CONTAINERS AND BOXES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2641—Paper Coating and Glazing
- 2642—Envelopes
- 2643—Bags, Except Textile Bags
- 2645—Die-Cut Paper and Paperboard and Cardboard*
- 2646—Pressed and Molded Pulp Goods
- 2647—Sanitary Paper Products
- 2648—Stationery, Tablets, and Related Products*
- 2649—Converted Paper and Paperboard Products, N.E.C.*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2641.—PAPER COATING AND GLAZING

This industry comprises establishments primarily engaged in manufacturing coated, glazed, or varnished paper from purchased paper. Also included are establishments primarily manufacturing pressure sensitive tape with backing of any material other than rubber. Establishments primarily engaged in manufacturing carbon paper are classified in industry 3955 (Carbon Paper and Inked Ribbons) and photographic and blue-print paper, in industry 3861 (Photographic Equipment and

*Note that the "short title" for this industry is used throughout the report.

Supplies). For a detailed list of products of industry 2641, refer to table 6A, product codes 26411 13 to 26418 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Paper Coating and Glazing Industry in 1972 totaled \$1,954.0 million. This included shipments of coated and glazed paper (primary products) valued at \$1,426.1 million, shipments of other products (secondary products) valued at \$442.2 million, and miscellaneous receipts (mainly resales) of \$85.7 million.

Shipments of coated and glazed paper (primary products) in 1972 represented 76 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 79 percent. Secondary products shipped by this industry in 1972 consisted mainly of abrasive products (over \$2 million); and bags, except textile bags (\$60.7 million).

Shipments of coated and glazed paper (primary products) from establishments classified in industry 2641 in 1972 represented 86 percent (coverage ratio) of these products valued at \$1,650.5 million shipped by all industries. In 1967, the coverage ratio was 87 percent. Other industries shipping coated and glazed paper consisted mainly of industry 2643, Bags, Except Textile Bags, (\$54.0 million); and industry 3861, Photographic Equipment and Supplies, (\$26.7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2641, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 2642.—ENVELOPES

This industry comprises establishments primarily engaged in manufacturing envelopes of any description from purchased paper and paperboard. Establishments primarily engaged in manufacturing papeteries (boxed stationery) are classified in industry 2648.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Envelopes Industry in 1972 totaled \$620.8 million. This included shipments of envelopes (primary products) valued at \$558.7

million, shipments of other products (secondary products) valued at \$24.6 million, and miscellaneous receipts (mainly resales) of \$37.5 million.

Shipments of envelopes (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent. Secondary products shipped by this industry in 1972 consisted mainly of bags, except textile bags, (\$5 to \$10 million) and stationery products (\$6.2 million).

Shipments of envelopes (primary products) from establishments classified in industry 2642 in 1972 represented 95 percent (coverage ratio) of these products valued at \$587.9 million shipped by all industries. In 1967, the coverage ratio was 96 percent. Other industries shipping envelopes consisted mainly of industry 2648, Stationery Products, (\$22.6 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2642, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 2643.—BAGS, EXCEPT TEXTILE BAGS

This industry comprises establishments primarily engaged in manufacturing bags from purchased paper, cellophane, acetate, polyethylene, polypropylene, pliofilm, foil, and similar sheet or film materials. Establishments primarily engaged in manufacturing textile bags are classified in industry 2393, Textile Bags. For a detailed list of products of industry 2643, refer to table 6A, product codes 26431 11 to 26433 51.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Bags, Except Textile Bags, Industry in 1972 totaled \$1,885.7 million. This included shipments of bags, except textile bags, (primary products) valued at \$1,617.4 million, shipments of other products (secondary products) valued at \$218.9 million, and miscellaneous receipts (mainly resales) of \$49.4 million.

Shipments of bags, except textile bags, (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 86 percent. Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastics products (\$84.0 million) and coated and glazed paper (\$54.0 million).

Shipments of bags, except textile bags, (primary products) from establishments classified in industry 2643 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,829.4 million shipped by all industries. In 1967, the coverage ratio was also 88 percent. Other industries shipping bags, except textile bags, consisted mainly of industry 2641, Paper Coating and Glazing, (\$60.7 million); and industry 2647, Sanitary Paper Products, (\$51.0 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2643, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 2645.—DIE-CUT PAPER AND BOARD (Short Title)

This industry comprises establishments primarily engaged in diecutting purchased paper and paperboard; and in manufacturing cardboard by laminating, lining, or surface coating paperboard. Establishments primarily engaged in laminating building paper or building board from purchased paper or board are classified in industry 2649. For a detailed list of products of industry 2645, refer to table 6A, product codes 26451 11 to 26452 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Die-Cut Paper and Board Industry in 1972 totaled \$676.3 million. This included shipments of die-cut paper and board (primary products) valued at \$572.5 million, shipments of other products (secondary products) valued at \$71.5 million, and miscellaneous receipts (mainly resales) of \$32.3 million.

Shipments of die-cut paper and board (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 86 percent. Secondary products shipped by this industry in 1972 consisted mainly of stationery products (\$10 to \$20 million), and manifold business forms (\$10 to \$20 million).

Shipments of die-cut paper and board (primary products) from establishments classified in industry 2645 in 1972 represented 89 percent (coverage ratio) of these products valued at \$645.9 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping die-cut paper and board consisted mainly of industry 2631, Paperboard Mills, (\$18.2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2645, these establishments accounted for 5 percent of value of shipments.

INDUSTRY 2646.—PRESSED AND MOLDED PULP GOODS

This industry comprises establishments primarily engaged in manufacturing all kinds of pressed and molded pulp goods, including papier-mache articles, other than statuary and art goods (industry 3299). Establishments primarily engaged in manufacturing plates and utensils from purchased paper and paperboard are classified in industry 2654, Sanitary Food Containers. For a detailed list of products of industry 2646, refer to table 6A, product codes 26461 07 to 26462 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Pressed and Molded Pulp Goods Industry in 1972 totaled \$162.8 million. This included shipments of pressed and molded pulp goods (primary products) valued at \$156.9 million, shipments of other products (secondary products) valued at \$3.4 million, and miscellaneous receipts (mainly resales) of \$2.5 million.

Shipments of pressed and molded pulp goods (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was a minimum of 95 percent. Secondary products shipped by this industry in 1972 consisted mainly of converted paper products, n.e.c.

Shipments of pressed and molded pulp goods (primary products) from establishments classified in industry 2646 in 1972 represented 97 percent (coverage ratio) of these products valued at \$161.6 million shipped by all industries. In 1967, the coverage ratio was a minimum of 95 percent. Other industries shipping pressed and molded pulp goods consisted mainly of industry 3079, Miscellaneous Plastics Products, (\$2 to \$5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2646, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 2647.—SANITARY PAPER PRODUCTS

This industry comprises establishments primarily engaged in manufacturing, from purchased paper, sanitary paper products, such as facial tissue and handkerchiefs, table napkins, toilet paper, towels, disposable diapers, and sanitary napkins and tampons. For a detailed list of products of industry 2647, refer to table 6A, product codes 26471 11 to 26472 98.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. However, the SIC number and title are unchanged. The industry as now constituted includes paper disposable diapers, formerly classified in industry 2399, Fabricated Textile Products, N.E.C. The effect of the reclassification on the data was insignificant.

Value of shipments and other receipts of the Sanitary Paper Products Industry in 1972 totaled \$2,071.8 million. This included shipments of sanitary paper products (primary products) valued at \$1,915.7 million, shipments of other products (secondary products) valued at \$111.0 million, and miscellaneous receipts (mainly resales) of \$45.1 million.

Shipments of sanitary paper products (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent. Secondary products shipped by this industry in 1972 consisted mainly of bags, except textile bags, (\$51.0 million), and coated and glazed paper (\$20.2 million).

Shipments of sanitary paper products (primary products) from establishments classified in industry 2647 in 1972 represented 97 percent (coverage ratio) of these products valued at \$1,981.9 million shipped by all industries. In 1967, the coverage ratio was 96 percent. Other industries shipping sanitary paper products consisted mainly of industry 3069, Fabricated Rubber Products, N.E.C., (over \$2 million) and industry 2297, Nonwoven Fabrics, (\$10 to \$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2647, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 2648.—STATIONERY PRODUCTS (Short Title)

This industry comprises establishments primarily engaged in manufacturing stationery, tablets, looseleaf fillers, and related items from purchased paper. Establishments primarily engaged in manufacturing envelopes are classified in industry 2642. For

a detailed list of products of industry 2648, refer to table 6A, product codes 26481 11 to 26482 69.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. At the same time, a new SIC number and title were assigned. In 1967, the products now in this industry were included in industry 2649 under product class 26491. This product class now constitutes the new industry 2648. The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 431 establishments with 14.7 thousand total employment and \$225.6 million value added which now constitute industry 2648 would have been classified in industry 2649 under the old SIC.

Value of shipments and other receipts of the Stationery Products Industry in 1972 totaled \$450.5 million. This included shipments of stationery products (primary products), valued at \$344.1 million, shipments of other products (secondary products) valued at \$63.0 million, and miscellaneous receipts (mainly resales) of \$43.4 million.

Shipments of stationery products (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of blankbooks and looseleaf binders (\$23.6 million) and envelopes (\$22.6 million).

Shipments of stationery products (primary products) from establishments classified in industry 2648 in 1972 represented 82 percent (coverage ratio) of these products valued at \$421.5 million shipped by all industries. Other industries shipping stationery products consisted mainly of industry 2771, Greeting Card Publishing, (\$23.7 million) and industry 2782, Blankbooks and Looseleaf Binders, (\$18.3 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2648, these establishments accounted for 13 percent of value of shipments.

INDUSTRY 2649.—CONVERTED PAPER PRODUCTS, N.E.C., (Short Title)

This industry comprises establishments primarily engaged in manufacturing from purchased paper or paperboard, miscel-

laneous converted paper or paperboard products, not elsewhere classified. Establishments primarily engaged in manufacturing sanitary paper products are classified in industry 2647, and stationery products in industry 2648. The paper stock used for wallpaper called "hanging paper" is classified in industry 2621. For a detailed list of products of industry 2649, refer to table 6A, product codes 26492 65 to 26495 98.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual. However, the SIC number and title are unchanged. The industry as now constituted includes wallpaper, formerly in industry 2644, and excludes stationery products now classified separately in industry 2648. The effect of the revisions on the data are summarized in table 1C, "Composition of New SIC (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 82 establishments with 2.9 thousand total employment and \$49.6 million value added would have been classified in industry 2644 under the old SIC. In addition, 431 establishments with 14.7 thousand total employment and \$225.6 million value added, formerly classified in industry 2649, shifted to new industry 2648.

Value of shipments and other receipts of the Converted Paper Products, N.E.C., Industry in 1972 totaled \$626.7 million. This included shipments of converted paper products, n.e.c., (primary products) valued at \$490.0 million, shipments of other products (secondary products) valued at \$98.5 million, and miscellaneous receipts (mainly resales) of \$38.2 million.

Shipments of converted paper products, n.e.c., (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of metal foil and leaf (\$20.8 million), and coated and glazed paper (\$16.8 million).

Shipments of converted paper products, n.e.c., (primary products) from establishments classified in industry 2649 in 1972 represented 74 percent (coverage ratio) of these products valued at \$661.8 million shipped by all industries. Other industries shipping converted paper products, n.e.c., consisted mainly of industry 2771, Greeting Card Publishing, (\$33.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2649, these establishments accounted for 1 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|---|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |
| | (number) | (number) | (1,000) | (million dollars) | (1,000) | (millions) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (percent) | (percent) |

| INDUSTRY 2649.--CONVERTED PAPER PRODUCTS, N.E.C. | | | | | | | | | | | | | | | |
| 1972 Census..... | 305 | 179 | 18.0 | 135.6 | 13.9 | 27.5 | 88.4 | 323.2 | 306.2 | 626.7 | 18.5 | (NA) | 96.4 | 83 | 74 |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2641 | Industry 2642 | Industry 2643 | Industry 2645 | Industry 2646 | Industry 2647 | Industry 2648 | Industry 2649 |
|-----------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|
| 1972..... | 364 | 178 | 466 | 309 | 32 | 72 | 405 | 285 |
| 1967..... | 334 | 172 | 466 | 368 | 43 | 91 | (NA) | (NA) |
| 1963..... | 323 | 180 | 495 | 370 | 43 | 97 | (NA) | (NA) |

(NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²This is a minimum percentage. The exact percentage cannot be shown without disclosing figures for individual companies.

³In the 1967 Census of Manufactures, data for this industry were classified in industry 2649 as product class 26491.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee (dollars) | Assets per employee (dollars) | Production worker as percent of total employment (percent) | Annual man-hours of production workers (number) | Average hourly earnings of production workers (dollars) | Cost of materials per dollar of shipments (dollars) | Cost of materials and payrolls per dollar shipments (dollars) | Assets per dollar of shipments (dollars) | Value added per employee (dollars) | Payrolls as percent of value added (percent) | Value added per man-hour of production worker (dollars) |

(NA) Not available. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

| Industry | Composition of new industry | | | | | Totals for industries on old SIC | | | | |
|--|-----------------------------|---------------------------|---------------|----------------------------|--------------------|----------------------------------|---------------------------|---------------|----------------------------|--------------------|

TABLE 2. General Statistics by Geographic Area: 1972 and 1967—Continued

(Footnotes for table 2)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

(Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

TABLE 4. General Statistics, by Employment Size of Establishment: 1972

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization--the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization--the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|--------------|--|--------------------|-------------------|--------------------|------------------------|--------------------------------------|------------------------------------|-----------------------|--------------------------|-------------------------------|

¹This is a minimum percentage. The exact percentage cannot be shown without disclosing figures for individual companies.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Paper coating and glazing (SIC 2641) | Envelopes (SIC 2642) | Bags, except textile bags (SIC 2643) | Die-cut paper and board (SIC 2645) | Pressed and molded pulp goods (SIC 2646) | Sanitary paper products (SIC 2647) | Stationery products (SIC 2648) | Converted paper products, n.e.c. TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. ¹Revised.

¹Comparable quarterly data for related products are published in Current Industrial Reports, series MQ-26F, Converted Flexible Packaging Products.

²From 10 to 30 percent of the data was estimated.

³From 30 to 50 percent of the data was estimated.

⁴In 1967, paper disposable diapers were included with nonwoven disposable diapers in industry 2399, Fabricated Textile Products, N.E.C.

⁵The value shown for these items is not included in the product class or industry totals; they are memo items indicating distribution of value of shipments by end use for product codes 26492 82 and 26492 91. However, the value of these items does not equal the previously noted product codes since not all respondents reported their sales by end use.

⁶The data for 1967 and 1972 are not wholly comparable due to 1972 SIC revisions which transferred stationery products from industry 2649 to industry 2648 and wallpaper from industry 2644 to industry 2649. Accordingly, data for establishments manufacturing stationery products are included in the 1967 figure but excluded from 1972; data for establishments manufacturing wallpaper are excluded from 1967 but included in 1972.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

(X) Not applicable. (NA) Not available. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. ^eFrom 10 to 30 percent of this figure was estimated.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²The 1972 data for product class 26490 are slightly non-comparable to prior years due to 1972 SIC revisions to industry 2649.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

| 1972 code | Material | Unit of measure | 1972 | | 1967 | |
|--------------|---|--------------------|----------|-------------------------------------|----------|-------------------------------------|

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
 (S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error or on the basis of a consistency review. ^eFrom 10 to 30 percent of this figure was estimated.

¹Includes an insignificant amount of "Own paperboard" in order to avoid disclosing figures for individual companies.

²This item represents the total cost of materials for establishments that did not report detailed materials data. It also includes estimates for companies that were not mailed report forms.

EXPLANATORY TEXT

PAPERBOARD CONTAINERS AND BOXES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 2651—Folding Paperboard Boxes
- 2652—Setup Paperboard Boxes
- 2653—Corrugated and Solid Fiber Boxes
- 2654—Sanitary Food Containers
- 2655—Fiber Cans, Tubes, Drums, and Similar Products*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 2651.—FOLDING PAPERBOARD BOXES

This industry comprises establishments primarily engaged in manufacturing folding paperboard boxes from purchased paperboard. For a detailed list of products of industry 2651, refer to table 6A, product codes 26510 14 to 26510 98.

The code number and definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Folding Paperboard Boxes Industry in 1972 totaled \$1,493.5 million. This included shipments of folding paperboard boxes (primary products) valued at \$1,247.4 million, shipments of other products (secondary products) valued at \$215.8 million, and miscellaneous receipts (mainly resales) of \$30.3 million.

*Note that the "short title" for this industry is used throughout the report.

Shipments of folding paperboard boxes (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 84 percent. Secondary products shipped by this industry in 1972 consisted mainly of sanitary food containers (\$124.6 million).

Shipments of folding paperboard boxes (primary products) from establishments classified in industry 2651 in 1972 represented 91 percent (coverage ratio) of these products valued at \$1,372.1 million shipped by all industries. In 1967, the coverage ratio was 90 percent. Other industries shipping folding paperboard boxes consisted mainly of industry 2654, Sanitary Food Containers, (\$70.1 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2651, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 2652.—SETUP PAPERBOARD BOXES

This industry comprises establishments primarily engaged in manufacturing setup paperboard boxes from purchased paperboard. For a detailed list of products of industry 2652, refer to table 6A, product codes 26520 21 to 26520 98.

The code number and definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Setup Paperboard Boxes Industry in 1972 totaled \$321.3 million. This included shipments of setup paperboard boxes (primary products) valued at \$295.1 million, shipments of other products (secondary products) valued at \$18.5 million, and miscellaneous receipts (mainly resales) of \$7.7 million.

Shipments of setup paperboard boxes (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of folding paperboard boxes (\$9.3 million).

Shipments of setup paperboard boxes (primary products) from establishments classified in industry 2652 in 1972 represented 86 percent (coverage ratio) of these products valued at \$342.6 million shipped by all industries. In 1967, the

coverage ratio was 87 percent. Other industries shipping setup paperboard boxes consisted mainly of industry 2651, Folding Paperboard Boxes, (\$25.9 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2652, these establishments accounted for 8 percent of value of shipments.

INDUSTRY 2653.—CORRUGATED AND SOLID FIBER BOXES

This industry comprises establishments primarily engaged in manufacturing corrugated and solid fiber boxes and related products from purchased paperboard or fiber stock. Important products of this industry include corrugated and solid fiberboard boxes, pads, partitions, display items, pallets, single-face products, and corrugated sheets. For a detailed list of products of industry 2653, refer to table 6A, product codes 26530 12 to 26530 68.

The code number and definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Corrugated and Solid Fiber Boxes Industry in 1972 totaled \$4,308.8 million. This included shipments of corrugated and solid fiber boxes (primary products) valued at \$4,139.4 million, shipments of other products (secondary products) valued at \$67.8 million, and miscellaneous receipts of \$101.6 million.

Shipments of corrugated and solid fiber boxes (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 98 percent. Secondary products shipped by this industry in 1972 consisted mainly of folding paperboard boxes (\$13.1 million) and setup paperboard boxes (\$10.6 million).

Shipments of corrugated and solid fiber boxes (primary products) from establishments classified in industry 2653 in 1972 represented 99 percent (coverage ratio) of these products valued at \$4,196.9 million shipped by all industries. In 1967, the coverage ratio was 98 percent. Other industries shipping corrugated and solid fiber boxes consisted mainly of industry 2651, Folding Paperboard Boxes, (\$23.7 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at

the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2653, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 2654.—SANITARY FOOD CONTAINERS

This industry comprises establishments primarily engaged in manufacturing food containers from special food board. Important products of this industry include fluid milk containers; folding paraffined cartons for butter, margarine, and shortening; ice cream containers; frozen food containers; liquid-tight containers; round nested food containers; paper cups for hot or cold drinks; pails for food and ice cream; and stamped plates, dishes, spoons, and similar products. Establishments primarily engaged in manufacturing similar items of plastics materials are classified in industry 3079. For a detailed list of products of industry 2654, refer to table 6A, product codes 26541 13 to 26543 73.

The code number and definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Sanitary Food Containers Industry in 1972 totaled \$1,413.1 million. This included shipments of sanitary food containers (primary products) valued at \$1,200.6 million, shipments of other products (secondary products) valued at \$122.0 million, and miscellaneous receipts (mainly resales) of \$90.5 million.

Shipments of sanitary food containers (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of folding paperboard boxes (\$70.1 million).

Shipments of sanitary food containers (primary products) from establishments classified in industry 2654 in 1972 represented 87 percent (coverage ratio) of these products valued at \$1,381.4 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping sanitary food containers consisted mainly of industry 2651, Folding Paperboard Boxes, (\$124.6 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2654, these establishments accounted for 1 percent of value of shipments.

**INDUSTRY 2655.—FIBER CANS, DRUMS, AND
SIMILAR PRODUCTS (Short Title)**

This industry comprises establishments primarily engaged in manufacturing fiber cans, cones, drums, and similar products, with or without metal ends, from purchased materials; and vulcanized fiber boxes. For a detailed list of products of industry 2655, refer to table 6A, product codes 26551 51 to 26552 98.

The code number and definition of this industry were unchanged between 1972 and 1967.

Value of shipments and other receipts of the Fiber Cans, Drums, and Similar Products Industry in 1972 totaled \$568.0 million. This included shipments of fiber cans, tubes, drums, and similar products (primary products) valued at \$537.4 million, shipments of other products (secondary products) valued at \$25.6 million, and miscellaneous receipts (mainly resales) of \$5.0 million.

Shipments of fiber cans, tubes, drums, and similar products (primary products) in 1972 represented 95 percent (specializa-

tion ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 96 percent. Secondary products shipped by this industry in 1972 consisted mainly of metal barrels, drums, pails, and metal stampings.

Shipments of fiber cans, tubes, drums, and similar products (primary products) from establishments classified in industry 2655 in 1972 represented 87 percent (coverage ratio) of these products valued at \$620.0 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping fiber cans, tubes, drums, and similar products consisted mainly of industry 3411, Metal Cans, (\$47.0 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 2655, these establishments accounted for 2 percent of value shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

| Year ¹ | Establishments | | All employees | | Production workers | | | Value added by manufacture | Cost of materials, fuels, etc. | Value of industry shipments | Capital expenditures, new | Gross value of fixed assets | End-of-year inventories | Specialization ratio | Coverage ratio |
|--|----------------|---------------------------|---------------|-------------------|--------------------|------------|-------------------|----------------------------|--------------------------------|-----------------------------|---------------------------|-----------------------------|-------------------------|----------------------|----------------|
| | Total | With 20 employees or more | Number | Payroll | Number | Man-hours | Wages | | | | | | | | |
| | (number) | (number) | (1,000) | (million dollars) | (1,000) | (millions) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (million dollars) | (percent) | (percent) |

| 1958 Census | 198 | 112 | 11.0 | 47.9 | 9.2 | 18.4 | 36.5 | 79.5 | 86.0 | 165.6 | 8.3 | (NA) | 17.4 | 98 | 83 |

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

| | Industry 2651 | Industry 2652 | Industry 2653 | Industry 2654 | Industry 2655 |
|-----------|---------------|---------------|---------------|---------------|---------------|
| 1972..... | 443 | 366 | 709 | 160 | 168 |
| 1967..... | 476 | 418 | 568 | 144 | 165 |
| 1963..... | 534 | 474 | 534 | 98 | 166 |

(NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

| Year | Payroll per employee | Assets per employee | Production worker as percent of total employment | Annual man-hours of production workers | Average hourly earnings of production workers | Cost of materials per dollar of shipments | Cost of materials and payrolls per dollar shipments | Assets per dollar of shipments | Value added per employee | Payrolls as percent of value added | Value added per man-hour of production worker |
|--|----------------------|---------------------|--|--|---|---|---|--------------------------------|--------------------------|------------------------------------|---|

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent

E3--30 to 39 percent

E5--50 to 59 percent

E7--70 to 79 percent

E9--90 to 99 percent

E2--20 to 29 percent

E4--40 to 49 percent

E6--60 to 69 percent

E8--80 to 89 percent

E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

(See appendix, Explanation of Terms)

²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

| Industry or product class code | Industry or product class by percent of specialization | Establishments (number) | All employees | | Production workers | | | Value added by manufacture (million dollars) | Cost of materials (million dollars) | Value of shipments (million dollars) | Capital expenditures, new (million dollars) |

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

| 1972 code | Industry and census year | Value of shipments | | | | | Value of primary product shipments | | | |
|-----------|--|--------------------|-------------------|--------------------|------------------------|--------------------------------------|------------------------------------|-----------------------|--------------------------|-------------------------------|
| | | Total | Primary products | Secondary products | Miscellaneous receipts | Primary product specialization ratio | Total, made in all industries | Made in this industry | Made in other industries | Coverage ratio |

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | All industries | Folding paperboard boxes (SIC 2651) | Setup paperboard boxes (SIC 2652) | Corrugated and solid fiber boxes (SIC 2653) | Sanitary food containers (SIC 2654) | Fiber cans, drums, and similar products (SIC 2655) | Other industries |
|--------------|--|----------------|-------------------------------------|-----------------------------------|---|-------------------------------------|--|------------------|

See footnotes at end of table.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

| Product code | Industry, class of products, and miscellaneous receipts | Other industries |
|--------------|---|------------------|
| | Listing of other industries with over \$2 million shipments of the primary products | |
| 2651- | 2631 Paperboard mills..... | (5-10) |
| | 2643 Bags, except textile bags..... | (2-5) |
| | 2752 Commercial printing, lithographic..... | (2-5) |
| | 3353 Aluminum sheet, plate, and foil..... | (10-20) |
| 2653- | 2631 Paperboard mills..... | (2-5) |
| | 2645 Die-cut paper and board..... | (2-5) |
| | 3221 Glass containers..... | (5-10) |
| 2654- | 2647 Sanitary paper products..... | (2-5) |
| | 2648 Stationery products..... | (2-5) |
| | 2752 Commercial printing, lithographic..... | (2-5) |
| | 2771 Greeting card publishing..... | (20-50) |
| | 3079 Miscellaneous plastics products..... | 8.7 |
| 2655- | 2641 Paper coating and glazing..... | (2-5) |
| | 3079 Miscellaneous plastics products..... | (2-5) |
| | 3411 Metal cans..... | 47.0 |
| | 3412 Metal barrels, drums, and pails..... | (2-5) |
| | 3469 Metal stampings, n.e.c..... | (10-20) |

Note: Data shown parenthetically are ranges expressed in millions of dollars.

- Represents zero. (X) Not applicable.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

-Represent zero. (X) Not applicable. (NA) not available.

¹From 10 to 30 percent of this figure was estimated.

²From 30 to 50 percent of this figure was estimated.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

| Product class and geographic area | Value of shipments (million dollars) | | Product class and geographic area | Value of shipments (million dollars) | |
|--|---|-------|---|---|-------|

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9

CC.....\$5.0 to \$9.9

FF.....\$20.0 to \$49.9

BB.....\$2.0 to \$4.9

EE.....\$10.0 to \$19.9

GG.....\$50.0 and over

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

- Represents zero. (X) Not applicable. (S) Withheld because the estimates did not meet publication standards. (Z) Less than half of the unit of measurement shown.

APPENDIX A. Explanation of Terms

Employment and Payrolls—The census of manufactures provides information on employment and payrolls at operating establishments and central administrative offices and auxiliaries. On the standard forms for manufacturing establishments, the number of production workers by quarter and all other employees during the pay period including March 12 was requested. Form NC-X6, "Central Administrative Office or Auxiliary Establishment," called for employment as of March 12 only. Both forms called for salaries and wages paid for the year.

All Employees—This category comprises all full-time and part-time employees who worked or received pay for any part of the pay periods including the 12th of the months specified on the report forms. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms, however, are excluded.

In special cases, respondents were instructed to exclude agricultural or fishery employment and related data from their reports. These were sugar mills operated as part of plantations, canning or freezing plants operated in conjunction with farms, and fish processing plants engaged in fishing.

Production and Related Workers—This category includes workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level were excluded from this category.

All Other Employees—These are defined as nonproduction personnel, including employees engaged in the following activities: Factory supervision above the working foreman level, sales (including driver-salesmen), sales delivery (highway truckdrivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.), professional, and technical. Also included are employees on the payroll engaged in the construction of major additions or alterations to the plant and utilized as a separate work force.

Average Employment—The number of production workers as shown in the census tabulations is an average of the four quarterly figures reported by manufacturing plants. The "all employees" figure is the sum of this average and the reported number of other employees as of March 12.

Payrolls—This category includes the gross annual earnings of employees on the payroll. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. This definition includes all forms of compensation such as salaries, wages, commissions, dismissal pay, bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of these establishments, if a corporation; it excludes payments to the proprietor or partners, if an unincorporated concern. Also excluded are payments to members of Armed Forces and pensioners carried on the active payroll.

The 1972 census definition of payrolls is identical to that recommended to all Federal statistical agencies by the Office of Management and Budget. This definition does not include supplementary labor costs such as employer's Social Security contributions and other legally required expenditures or payments for voluntary programs. Data on such supplementary labor costs were collected in the ASM and are scheduled for publication in the ASM reports, but are not included in the census reports.

Man-Hours—This total consists of all plant man-hours of production and related workers as defined above. It represents all man-hours at the plant including actual overtime hours—not straight-time equivalent hours. It excludes hours paid for vacations, holidays, or sick leave, when the employee was not actually at the plant. Where employees elected to work during the vacation period, the actual hours worked by such employees were reported.

Cost of Materials, Etc., Consumed—A summary inquiry on form MA-100 and the other manufacturing establishment report forms requested information on the cost of materials, supplies, semifinished goods, fuels, and electric energy actually consumed or put into production during the year and the cost of products purchased for resale, whether purchased, withdrawn from inventories, or received from other establishments of the company. Included, also, are the costs of materials supplied by the establishment which were processed elsewhere on contract for the establishment. "Cost" was defined as the direct charges actually paid or payable for items consumed or

put into production during the year, after discounts, and including freight charges and other direct charges incurred by the establishment in acquiring the materials.

To arrive at the industry total "cost of materials, etc.,"¹ separate figures were obtained for (a) the total delivered cost of all raw materials, semifinished goods, parts, components, containers, scrap, and supplies consumed or put into production, (b) the amount paid for electric energy purchased, (c) the amount paid for all fuels consumed for heat, power, or the generation of electricity, (d) the cost of work done by others on materials or parts furnished by the reporting establishment (contract work), and (e) the cost of products bought and resold in the same condition.

It should be noted that the cost of fuel consumed under (c), above, does not include fuel used as a material in the manufacturing process; for example, coal used in the production of coke. Such costs are included with other materials cost in category (a), above.

The total excludes the cost of services used, such as advertising, insurance, telephone, etc., and developmental, research, and consulting services of other establishments. It also excludes overhead costs, such as depreciation charges, rent, interest, royalties, etc., and materials, machinery, and equipment used in plant expansion or capitalized repairs which are chargeable to fixed assets accounts.

For materials received from other plants of the same company or from a central materials depot (whether at the same or different physical location), respondents were asked to value the items at their full economic value as produced, plus freight and other direct handling charges. The respondents were asked to check, where possible, that the cost equaled the value of shipments reported for the items by the company's plant which produced and transferred the goods, plus freight and other direct charges.

Value of Shipments—Except in a few industries, the respondents were instructed to report net selling values, f.o.b. plant, after discounts and allowances and excluding freight charges and excise taxes. For a few industries, specifically noted in the text of the industry chapters, Volume II, delivered prices were requested if delivery by employees of the establishment was a routine practice, as in the milk and bakery industries.

For most industries, value of shipments is readily available from accounting records and is closely related to the value of production. In a small group of industries, however, value of production or of work done was requested. This instruction was of particular importance in the aircraft and shipbuilding industries, where the shipments or deliveries of complete units

may be a poor approximation of the work actually done during a given year.

Manufacturers were asked to include as products shipped not only the products made in the establishment but also those made elsewhere under contract from the materials owned by the establishment. Included were all products sold, transferred to other parts of the same company, or shipped on consignment. The duplication in value of shipments and cost of materials arising because of the shipment of semifinished products among manufacturing plants is discussed in part III of the Introduction, which also includes comments on the valuation of intracompany shipments by multiunit firms.

Miscellaneous Receipts—In addition, manufacturers reported receipts for contract work performed for others, resales (that is, the value of all products resold without further processing), receipts for miscellaneous activities such as sale of scrap and refuse, and the value of installation and repair work performed by the plant employees. Although the value of products bought and resold without further processing is included in the value of shipments totals for each industry, it is excluded from the figures for individual products or classes of products.

Value Added by Manufacture—This figure is derived by subtracting the total cost of materials (including materials, supplies, fuel, electric energy, cost of resales, and contract work done by others) from the value of shipments, including resales, and other receipts and adjusting the resulting amount by the net change in finished products and work-in-process inventories between the beginning and end of the year.²

Value added avoids the duplication in the value of shipments figure which results from the inclusion of the shipments of establishments producing materials and components along with the shipments of establishments producing finished products. It is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

Inventories—The value of beginning-of-year and end-of-year inventories held by each manufacturing establishment was obtained in the 1972 census. Separate inventory figures were requested for (1) finished products, (2) work in process, and (3) materials, supplies, fuel, and other inventories.

Respondents were asked to report their inventories at approximate current costs, if feasible; otherwise, at book value. Since different methods of inventory valuation are used (LIFO, FIFO, etc.), the value of inventories aggregated for all

¹ In some tables, this category is designated simply as "cost of materials."

² For a few industries (for example, aircraft and shipbuilding) where value of work done is substituted for value of shipments, no adjustment is made for change in inventories. In a few other industries where value of production is collected, the inventory adjustment is made only on the basis of change in work-in-process inventories.

establishments in an industry is not precisely defined. The importance of reporting inventories on a comparable basis was emphasized in the instructions; thus the year-to-year change in inventories indicated by the census figures is of more significance than their level.

In using inventory data by stage of fabrication for all industries and at the 2-digit industry level, it should be noted that an item treated as a finished product by one establishment may be reported as a material by another establishment. For example, the finished product inventories of a steel mill would be reported as materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication for individual industries, industry groups, and all manufacturing, since these figures are merely aggregates of the figures reported by establishments.

Multiunit companies were instructed to include the inventories held by each establishment in that establishment's report. The inventory data tabulated on a geographic basis are believed, therefore, to reflect the actual physical holdings in each area, to the extent that the inventories were owned by the reporting companies. It is not clear where goods owned by one company and stored by another were reported.

Special instructions on inventories were issued for two industries in the food group. Meatpacking establishments were told to report work in process separately only if separate records were maintained; otherwise, to combine work in process with finished products. Distillers were instructed to include stocks of liquors held for aging as finished products, not as work in process.

Capital Expenditures—Under this heading, manufacturers were instructed to report expenditures of the type chargeable to fixed assets accounts for which depreciation reserves are normally maintained. Actual capital outlays during the year were requested, not the final value of equipment put in place or structures completed during the year. It was suggested to the respondents that capital expenditures, as thus defined, could be computed by the following formula: The cost of additions completed during the year, plus construction in progress at the end of the year, less construction in progress at the beginning of the year. It was specified that the census definition of capital expenditures was to be used in computing the gross value of fixed assets discussed below.

Capital expenditures include the cost of plant and equipment for replacement purposes, as well as for additions to productive capacity. Cost associated with plants under construction but not in operation during the year are also included. The method of collecting data for plants under construction is described in the Introduction, section 7, "Reporting Forms." Capital expenditures do not include plant

and equipment furnished to the manufacturer without charge by governmental or private organizations. The value of rented facilities is also excluded.

New Structures and Additions to Plant—This category includes all construction and other land improvements, whether built on contract or by the manufacturer's own labor force. Included are major alterations; capitalized repairs; new elevators, cranes, heating and air-conditioning equipment essentially a part of buildings; fixed structures such as blast furnaces, brick kilns, fractionating towers, and shipways; and land improvements such as roads, fences, parking lots, and railroad spurs.

New Machinery and New Equipment—This category includes production and all other machinery and equipment. Included are motors, lathes, presses, looms, and other production machinery; office machines and fixtures; furniture; and automobiles, trucks, and handling equipment. Major repairs or improvement to existing equipment are included if the cost is capitalized, as well as equipment manufactured by the plant for use in its own production.

Used Plant and Equipment—This category represents expenditures for old or existing plants and for secondhand equipment acquired from others. Transfers of used equipment between plants of multiunit companies are included. The companies were instructed to report such transfers at their current value rather than original cost. The Census Bureau estimates of capital expenditures as compared to those published in the joint Bureau of Economic Analysis—Securities and Exchange Commission survey are discussed in the Introduction.

Fuels and Electric Energy—Separate data were collected in the census for coal, coke, fuel oil, gas, and other fuels used for heat and power; purchased electric energy, electric energy generated by manufacturing establishments; and energy generated less the amount sold. Fuels used as a raw material (as coal in the production of coke) are included in the cost of materials rather than in the fuel category.

Assests and Rents—Data on the gross value of fixed assets owned and rental payments for leased fixed assets were collected in the ASM. These figures are scheduled for publication in the ASM series, but are not included in the census volumes.³

³ Earlier reports on these topics include chapter 9 of volume I, Summary Statistics, in the 1958 census, and chapter 7 of the ASM volumes for 1964-1965, 1968-1969, and 1970-1971.

APPENDIX B Composition of Industries in the 1972 Standard Industrial Classification

The censuses of manufactures for 1972 and 1967 covered all establishments engaged in manufacture as defined, respectively, in the **Standard Industrial Classification Manual (SIC)**, 1972 edition, issued by the Office of Management and Budget. The 1972 edition contained major revisions in the SIC Manual for the manufacturing industries additional to those issued between 1957 and 1967.

For 1972, of the 422 manufacturing industries as defined in 1967, 121 were changed in some manner in 1972. This

appendix cites only those industries affected by a revision between 1967 and 1972. Presented in two parts, this appendix lists, in part 1A, the industries as defined for 1972 in terms of their 1967 equivalents and, in part 2A, the industries of 1967 in terms of their 1972 equivalents. The distribution of the 1972 SIC industries among the 1967 SIC industries is shown in part 1B. The distribution of the 1967 SIC industries among the 1972 SIC industries is shown in part 2B.

PART 1A. Comparability of 1972 SIC Industries to 1967 SIC Industries, Where Revisions Occurred to 1967 Industries

| 1972 industry | | 1967 industry | |
|---------------|---|----------------------------------|---|
| SIC code | Short title | SIC code | Short title |
| 2011 | Meatpacking plants (excludes slaughter of nonfood animals; excludes canned baby food meats) | 2011 pt. | Meatpacking plants. |
| 2013 | Sausages and other prepared meats (excludes canned baby food meats) | 2013 pt. | Sausages and other prepared meats. |
| 2016 | Poultry dressing plants | 2015 | Poultry dressing plants. |
| 2017 | Poultry and egg processing | | |
| 2032 | Canned specialties: | 2011 pt. 2013 2032 | Meatpacking plants. Sausage and other prepared meats. Canned specialties. |
| | Baby food meats | | |
| | Except baby food meats | | |

¹No change in content.

²The classification of separate establishments milling or otherwise preparing nonmetallic minerals in this division and in industry 3295 has been clarified. Industry 3295 will include only establishments crushing or grinding or otherwise preparing minerals mined in industry groups 145 and 149, and industry 1472. Establishments crushing or grinding minerals mined in industry groups 142 and 144 and industries 1473 to 1479 are included in those same industries.

¹No change in content.

²The classification of separate establishments milling or otherwise preparing nonmetallic minerals in this division and in industry 3295 has been clarified. Industry 3295 will include only establishments crushing or grinding or otherwise preparing minerals mined in industry groups 145 and 149, and industry 1472. Establishments crushing or grinding minerals mined in industry groups 142 and 144 and industries 1473 to 1479 are included in those same industries.

APPENDIX C. Reporting Forms

This appendix contains reproductions of a representative selection of the reporting forms used in the 1972 economic censuses, with emphasis on the Census of Manufactures. The uses of each of them is described in the Introduction, section 7.

APPENDIX C-Continued

DUE DATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2751; Approval Expires December 31, 1974

| FORM NC-X1A (Item 1A) <small>(7-70-78)</small> | | U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS | | NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process. | |

| 1973 REPORT OF COMPANY ORGANIZATION | | Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report | | | |
| Please complete this report within 20 days after receipt and RETURN THIS COPY TO | | BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130 | | | |
| NOTE - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. This list should include establishments of your company and each of its subsidiaries. To make it easier for you to complete this report, we have prelisted information that you have previously provided to the Census Bureau. READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT | | | | | |
| Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS forms 941, 943, or CT-1) or Federal income returns (IRS forms 1065, 1120, 1120S, or 990C). In Item 1A, based on Census records, we have prelisted (in numeric sequence) all EI numbers and their associated names and addresses where available. Bring this list up-to-date by correcting the prelisted EI number and name and address information in column (a), and completing columns (b) through (d) as indicated. For some prelisted EI numbers, name and address information was not available. Please enter the name and address that applies in each case. EI numbers of your company and its subsidiaries that are not prelisted in Item 1A should be added in Item 1B. If your company or any of its subsidiaries uses different EI numbers for reporting employment and income, be sure that there is a separate entry for each such EI number in either Item 1A or 1B. | | | | | |
| Item 1A - LISTING OF EMPLOYER IDENTIFICATION NUMBERS (BASED ON CENSUS RECORDS) | | | | | |
| Line No. | Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information) (a) | Employees (during the pay period including March 12, 1973) (b) | Reporting status of EI number (c) | Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated) (d) | |
| | EMPLOYER IDENTIFICATION NUMBER NAME NUMBER AND STREET CITY STATE ZIP CODE | (Number) | Did you report Federal employment taxes under this EI number during 1973? 1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No | 1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date _____ 3 <input type="checkbox"/> Sold - Mo./yr. of sale _____ PURCHASER'S NAME NUMBER AND STREET CITY STATE ZIP CODE 4 <input type="checkbox"/> Other - Explain → | |
| | EMPLOYER IDENTIFICATION NUMBER NAME NUMBER AND STREET CITY STATE ZIP CODE | (Number) | Did you report Federal employment taxes under this EI number during 1973? 1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No | 1 <input type="checkbox"/> Active 2 <input type="checkbox"/> Inactive - Date _____ 3 <input type="checkbox"/> Sold - Mo./yr. of sale _____ PURCHASER'S NAME NUMBER AND STREET CITY STATE ZIP CODE 4 <input type="checkbox"/> Other - Explain → | |

Enter All Additional Employer Identification Numbers in Item 1B and Complete Items 2 through 5

APPENDIX C-Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1A

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2, and 5A. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in items 1B or 5B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- ▶ **Company or Firm** - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services
 - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House to House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.

- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS forms 941, 943, or CT-1) or income returns (IRS forms 1065, 1120, 1120S, or 990C).
- If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available.
- If the EI number is currently used, correct any errors or omissions in the pre-listed name and address in column (a), report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d).
- If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**
- Column (a)** - List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
- Column (b)** - Report the number of employees during the pay period including March 12, 1973.
- Column (c)** - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
- Column (d)** - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished items 5A and 5B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 5A and 5B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) - The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

Column (b) - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 5A and 5B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 5A, and 5B for errors, omissions, or duplications.

If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in items 1A or 1B should have at least one establishment listed in item 5A or 5B; conversely, each establishment listed in item 5A or 5B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 5A or 5B. Therefore, in completing item 2 for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 5A or 5B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 5A or 5B for the income EI number. In completing item 2 for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

- ▶ **Item 5 - Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 5A and 5B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 5A or 5B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 5A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by listing out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 5B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in item 5A that are now in operation, under construction, or were in operation at any time during 1973. Please read the definition of an establishment above before completing this item.

Column (a) - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "None." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) - Mark one box which best describes the principal business activity during 1973, mark Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Mark Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

- ▶ **Instructions for (e) and (f)** - Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

- ▶ **NOTE** - After you have completed item 5, please be sure to complete items 2, 3, and 4 before returning this form.

Additional copies of items 1B, 2, and 5B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments, in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C-Continued

DUE DATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2751; Approval Expires December 31, 1974

FORM NC-XIB (Item 1A)
(7-80-78)

U.S. DEPARTMENT OF COMMERCE
SOCIAL AND ECONOMIC STATISTICS ADMIN.
BUREAU OF THE CENSUS

NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

1973 REPORT OF COMPANY ORGANIZATION

(This page includes Items 1A and 1B)

Please complete this report within 20 days
after receipt and RETURN THIS COPY TO

BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47130

NOTE - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. This list should include establishments of your company and each of its subsidiaries. To make it easier for you to complete this report, we have prelisted information that you have previously provided to the Census Bureau.

READ THE INSTRUCTIONS ON THE REVERSE SIDE
BEFORE COMPLETING THIS REPORT

Refer to this CENSUS FILE NUMBER in any
correspondence pertaining to this report

Company name and address (Please correct any errors in name and address including ZIP code)

Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT

This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS forms 941, 943, or CT-1) or Federal income returns (IRS forms 1065, 1120, 1120S, or 990C).

If your company or any of its subsidiaries uses different EI numbers for reporting employment and income, be sure that there is a separate entry for each such EI number in either Item 1A or 1B.

In Item 1A, based on Census records, we have prelisted (in numeric sequence) all EI numbers and their associated names and addresses where available. Bring this list up-to-date by correcting the prelisted EI number and name and address information in column (a), and completing columns (b) through (d) as indicated.

For some prelisted EI numbers, name and address information was not available. Please enter the name and address that applies in each case.

In Item 1B add EI numbers that are currently used by your company or its domestic and foreign subsidiaries that are not prelisted in Item 1A. List separately in column (a) all Employer Identification (EI) Numbers and their associated names and addresses used at any time during 1973. For each added EI number complete columns (b) through (d) as indicated.

If you need more space for adding EI numbers, you may request additional pages or use a blank sheet of paper following the same format shown below in Item 1B. At the top of each sheet enter "Item 1B continued" and your company name, address, and Census File Number.

Item 1A - LISTING OF EMPLOYER IDENTIFICATION NUMBERS (BASED ON CENSUS RECORDS)

| Line number | Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information) | Employees (during the pay period including March 12, 1973) | Reporting status of EI number | Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated) |
|-------------|--|--|--|--|

Please Complete Items 2 through 4

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1B

A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2A, and 2B. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- Company or Firm** — A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** — A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services — Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House-to-House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.

- ▶ **Subsidiary** — A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for Item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** — Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** — This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS Forms 941, 943, or CT-1) or income returns (IRS Forms 1065, 1120, 1120S or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A — Listing of Employer Identification Numbers (Based on Census Records)** — All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS Forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d). If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the Item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B — Your Listing of Additional Employer Identification Numbers**
 - Column (a)** — List separately each EI number not prelisted in Item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
 - Column (b)** — Report the number of employees during the pay period including March 12, 1973.
 - Column (c)** — Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
 - Column (d)** — Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in Item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 — Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** — This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 2A and 2B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 2A or 2B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 2A — Listing of Domestic Establishments (Based on Census Records)** — Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. Identify in the establishment name those Leased Departments operated in a retail or service store as "leased dept." or "leased concession." The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — List separately all domestic establishments of your company and its subsidiaries not prelisted in Item 2A that were in operation, or under construction, during part or all of 1973. Please read the definition of an establishment above before completing this item.

Column (a) — Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) — Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "none." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) — Mark one box which best describes the principal business activity during 1973. Check Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Check Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) — List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

Instructions for (e) and (f) — Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

Note — After you have completed item 2, please be sure to complete items 2C, 3, and 4 before returning this form.

- ▶ **Item 2C — Reconciliation of Employment Reported by EI Numbers and by Establishments** — Complete this item after you have finished items 2A and 2B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 2A and 2B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) — The Employer Identification (EI) Numbers are identical to those prelisted in Item 1A. Bring this list up-to-date by making the corrections previously made in Item 1A and adding any EI numbers that you added in Item 1B.

Column (b) — Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) — For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 2A and 2B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 2A, and 2B for errors, omissions, or duplications. If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in Item 1A or 1B should have at least one establishment listed in item 2A or 2B; conversely, each establishment listed in item 2A or 2B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 2A or 2B. Therefore, in completing Item 2C for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in Item 2A or 2B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in Item 2A or 2B for the income EI number. In completing Item 2C for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

1973 REPORT OF COMPANY ORGANIZATION

PLEASE ENTER YOUR
CENSUS FILE NUMBER HERE
(See Item 1A page)

Item 1B - YOUR LISTING OF ADDITIONAL EMPLOYER IDENTIFICATION NUMBERS - USE ITEM 5B FOR LISTING ADDITIONAL ESTABLISHMENTS

List separately in column (a) below all Employer Identification (EI) Numbers (and their associated names and addresses) not prelisted in Item 1A that were used by your company or its domestic and foreign subsidiaries at any time during 1973. For each added EI number, complete columns (b) through (d) as indicated.

Enter your Census File Number (which is on the Item 1A page above the address box) in the space provided in the upper right corner of this page.

| Line No. | Employer Identification (EI) Number, name, and mailing address (a) | Employees (during the pay period including March 12, 1973) (b) | Reporting status of EI number (c) | Explanation of additional companies acquired, reorganized, or newly organized during 1973 (d) |

Please Complete Items 2 through 5

APPENDIX C-Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1A

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2, and 5A. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in items 1B or 5B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- ▶ **Company or Firm** - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services
 - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House to House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.
- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS forms 941, 943, or CT-1) or income returns (IRS forms 1065, 1120, 1120S, or 990C).
- If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available.
- If the EI number is currently used, correct any errors or omissions in the pre-listed name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d).
- If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the Item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**
- Column (a) - List separately each EI number not prelisted in Item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
- Column (b) - Report the number of employees during the pay period including March 12, 1973.
- Column (c) - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
- Column (d) - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in Item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished items 5A and 5B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 5A and 5B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) - The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

Column (b) - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 5A and 5B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 5A, and 5B for errors, omissions, or duplications.

If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in items 1A or 1B should have at least one establishment listed in item 5A or 5B; conversely, each establishment listed in item 5A or 5B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 5A or 5B. Therefore, in completing item 2 for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 5A or 5B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 5A or 5B for the income EI number. In completing item 2 for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

- ▶ **Item 5 - Domestic Establishments of your Company and Its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 5A and 5B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 5A or 5B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 5A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 5B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in item 5A that are now in operation, under construction, or were in operation at any time during 1973. Please read the definition of an establishment above before completing this item.

Column (a) - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "None." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) - Mark one box which best describes the principal business activity during 1973, mark Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Mark Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

- ▶ **Instructions for (e) and (f) - Answer question (e) for acquired establishments.** Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

- ▶ **NOTE** - After you have completed item 5, please be sure to complete items 2, 3, and 4 before returning this form.

Additional copies of items 1B, 2, and 5B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

Enter All Additional Establishments in Item 2B; Then Complete Items 2C, 3, and 4

APPENDIX C-Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1B

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2A, and 2B. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in item 2B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- Company or Firm** - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House-to-House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.
- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS Forms 941, 943, or CT-1) or income returns (IRS Forms 1065, 1120, 1120S or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS Forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d). If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the Item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**
 - Column (a)** - List separately each EI number not prelisted in Item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
 - Column (b)** - Report the number of employees during the pay period including March 12, 1973.
 - Column (c)** - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
 - Column (d)** - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in Item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 - Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 2A and 2B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 2A or 2B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 2A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. Identify in the establishment name those Leased Departments operated in a retail or service store as "leased dept." or "leased concession." The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 2B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in Item 2A that were in operation, or under construction, during part or all of 1973. Please read the definition of an establishment above before completing this item.

Column (a) - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "none." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) - Mark one box which best describes the principal business activity during 1973. Check Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Check Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

Instructions for (e) and (f) - Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

Note - After you have completed item 2, please be sure to complete items 2C, 3, and 4 before returning this form.

- ▶ **Item 2C - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished items 2A and 2B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 2A and 2B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) - The Employer Identification (EI) Numbers are identical to those prelisted in Item 1A. Bring this list up-to-date by making the corrections previously made in Item 1A and adding any EI numbers that you added in Item 1B.

Column (b) - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 2A and 2B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 2A, and 2B for errors, omissions, or duplications. If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in Item 1A or 1B should have at least one establishment listed in item 2A or 2B; conversely, each establishment listed in item 2A or 2B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 2A or 2B. Therefore, in completing Item 2C for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).

2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 2A or 2B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 2A or 2B for the income EI number. In completing item 2C for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).

3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C-Continued

DUE DATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2751; Approval Expires December 31, 1974

FORM NC-X1C (Item 1A)
U.S. DEPARTMENT OF COMMERCE
SOCIAL AND ECONOMIC STATISTICS ADMIN.
BUREAU OF THE CENSUS

NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

1973 REPORT OF COMPANY ORGANIZATION

(This page includes Items 1A and 1B)

Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report

Company name and address (Please correct any errors in name and address including ZIP code)

Please complete this report within 20 days after receipt and RETURN THIS COPY TO

BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47130

NOTE - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. To make it easier for you to complete this report, we have pre-listed information that you have previously provided to the Census Bureau.

READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT

Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT

This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS Forms 941, 943, or CT-1) or Federal income returns (IRS Forms 1065, 1120, 1120S, or 990C).

In Item 1A, based on Census records, we have pre-listed your company's EI number and name and address. Please make any corrections necessary to update these entries. Also complete columns (b) and (c) as indicated.

In Item 1B add EI numbers that are currently used by your company that are not pre-listed in Item 1A. List separately in column (a) all Employer Identification (EI) Numbers and their associated names and addresses. For each added EI number complete columns (b) and (c) as indicated.

If you need more space for adding EI numbers, you may request additional pages or use a blank sheet of paper following the same format shown below in Item 1B. At the top of each sheet enter "Item 1B continued" and your company name, address, and Census File Number.

Item 1A - LISTING OF YOUR EMPLOYER IDENTIFICATION NUMBER (BASED ON CENSUS RECORDS)

| Line No. | Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information) | Employees (during the pay period including March 12, 1973) | Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated) |

Instructions on Reverse Side

APPENDIX C -Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1C

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** - A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** - Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** - The gross earnings paid to employees prior to any deductions.

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** - List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A - Listing of Your Employer Identification Number (Based on Census Records)** - We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B - Your List of Additional Employer Identification Numbers** - If you purchased another company or organized a subsidiary company, enter each additional EI number in item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A - Establishments of Your Company and its Subsidiaries, and Their 1973 Employment and Payroll** - We have prelisted the individual business locations (establishments) that make up the EI number in item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B - Your Listing of Additional Domestic Establishments** - If you added additional business locations under your original EI number, report in item 2B for each location. Also if you added additional EI numbers in item 1A, list the individual locations for each EI number in item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE - If figure is \$25,428.28:

• PREFERRED METHOD $\longrightarrow \frac{25}{(\$1,000)}$

Column (c) - Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

Enter All Additional Establishments in Item 2B; Then Complete Items 3 and 4

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1C

A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and Its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in item 2B for each location. Also if you added additional EI numbers in item 1A, list the individual locations for each EI number in item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD $\longrightarrow \frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1C

A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in item 2B for each location. Also if you added additional EI numbers in item 1A, list the individual locations for each EI number in item 2B. The addresses should represent the **physical location**, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD $\longrightarrow \frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

NOTE: Additional copies of this form are available upon request. If you prefer, list additional establishments on your own paper. BE SURE TO ENTER THE CENSUS FILE NUMBER in the upper right-hand corner of each additional sheet.

(Please correct any error in name and address including ZIP code)

INSTRUCTIONS

List below ALL establishments of your firm and its subsidiaries located in the U.S. or any of its territories for which you did NOT receive a 1972 Census of Business, Construction, Manufactures, or Mineral Industries report form, or which are not shown in the enclosed listing for your firm. Include those establishments acquired by you through purchase, lease, construction, or other method of acquisition; include those which were in operation or under construction at any time during 1972. For acquired establishments, also report the former owner or operator in column (f). Each additional establishment should be listed on a SEPARATE LINE, except as specified in the enclosed Special Reporting Instructions.

INTRODUCTION AND GENERAL INSTRUCTIONS

The Bureau of the Census is now conducting a census of establishments primarily engaged in the types of activities described in Section A, item 1 below. However, our records do not contain sufficient information on the kind of business or activity carried on at your establishment. Please complete Section A, item 1 below, to provide this information. Then proceed according to the instructions given in item 2 (i.e., if you are primarily engaged in one of the business activities described in boxes 1 through 33 or 59 below, complete Section A and ALL of Section B; otherwise, complete only Section A and the certification in Section B, item 9, and return the form in the envelope provided).

Please refer to the Census File Number (the 11-digit number in the upper left corner of the address label), if you write to us about this report. This will expedite our processing of correspondence.

If book figures are not available, carefully prepared estimates are acceptable.

Section A - KIND OF BUSINESS OR ACTIVITY DURING 1972

Item 1 - BUSINESS OR ACTIVITY

Mark the box or boxes which best describe the kind of business or activity in which your company was primarily engaged in 1972.

☐ PUBLIC WAREHOUSING AND STORAGE

☐ MINING - Extracting or quarrying minerals (metallic and non-metallic ores; stone, sand, gravel; oil and gas; coal; etc.); minerals exploration and development; contract mineral services

☐ MANUFACTURING - Fabricating, assembling, or processing materials into new products. Also includes such activities as: logging; apparel jobbing; machine shop repair; and miscellaneous services "for the manufacturing trade."

CONSTRUCTION (Includes new and/or maintenance and repair)

☐ General contractor (buildings, roads, etc.)☐ Special trade contractor (painting, carpentry, plumbing, etc.)☐ Operative or merchant builder; land subdivider and developer

WHOLESALE TRADE - Selling merchandise to retailers; industrial, commercial, professional, institutional users; farmers; and government

☐ Merchant wholesaler☐ Merchandise agent or broker☐ Other type of wholesaler - Specify _____

RETAIL TRADE - Selling merchandise to the general public (includes eating and drinking places and gasoline service stations)

☐ Selling at this establishment☐ Mail order (catalog selling)☐ House-to-house (direct selling)☐ Operating merchandise vending machines☐ Other type of retailer - Specify _____

SELECTED SERVICES (Includes amusement and recreation services)

☐ Motel or tourist court☐ Dry cleaning plant☐ Coin operated dry cleaner or laundry☐ Laundry or dry-cleaning agent "retail store"☐ Beauty shop☐ Barber shop☐ Funeral service☐ General auto repair☐ Law office☐ Truck carrier, local service, except ICC regulated☐ Other services (e.g., repair, business services, theaters, amusement, recreation, travel agency.) Specify kind _____

AGRICULTURE, FORESTRY, FISHERY

☐ Farm or ranch☐ Feed lot operations (cattle, hogs, and lambs)☐ Poultry operations, including hatcheries☐ Horticultural production (greenhouse products and nursery products)☐ Animal specialties (horses, rabbits, fur-bearing animals in captivity, fish in captivity)☐ Agricultural services (e.g., soil preparation, custom harvesting, cotton ginning, labor and management services)☐ Veterinarian, animal hospital☐ Forestry (e.g., timber tracts, forest nursery)☐ Fishery

TRANSPORTATION (If business is a travel agency, mark box 25; if a non-ICC regulated motor carrier, mark box 24.)

☐ Railroad☐ Taxicab☐ Water transportation☐ Air transportation☐ Pipeline☐ Motor carrier (ICC regulated only)

COMMUNICATION

☐ Telephone or telegraph service☐ Radio or television broadcasting

ELECTRIC, GAS, SANITARY SERVICES

FINANCE, INSURANCE, REAL ESTATE

☐ Finance (bank, credit agency, security dealer, financial leasing)☐ Insurance☐ Real estate (except hotel operation, land subdividers and developers, and operative builders)

MEDICAL AND OTHER HEALTH SERVICE - Doctor, dentist, hospital, etc. (If dental laboratory, mark box 25.)

EDUCATIONAL SERVICE (If a barber, beauty, or dancing school, mark box 25.)

NONPROFIT MEMBERSHIP ORGANIZATION (Nonprofit recreation clubs and performing arts organizations should mark box 59 and specify activity.)

☐ Trade association, board of trade, chamber of commerce☐ Professional membership organization☐ Labor union☐ Civic, social, or fraternal association☐ Political organization☐ Religious organization☐ Charitable organization

MISCELLANEOUS SERVICES

☐ Accounting, auditing, bookkeeping (if a data processing service, mark box 25.)☐ Writer, lecturer☐ Government organization

OTHER BUSINESS

☐ All other - Specify activity _____

Item 2 - MARK ONE

☐ If you have marked one or more boxes numbered 1-33 OR 59 - COMPLETE Section B on the reverse side.
☐ If only box(es) numbered 34-58 are marked - SKIP to Section B, item 9, "Certification" on the reverse side.

APPENDIX C-Continued

FORM NC-X3 (10300)

Page 2

| Section B - OPERATIONS OF ESTABLISHMENT DURING 1972 | | | | | | | | | |
|---|---|-----------------|---------------------------------------|--|--|---------------------------|--|--|--|
| Item 1 - PHYSICAL LOCATION OF BUSINESS ESTABLISHMENT a. The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that data can be tabulated in the correct geographic area. a. Is this business establishment PHYSICALLY located at the address shown in the address box of this form? <input type="checkbox"/> YES - Answer b and c <input type="checkbox"/> NO - Enter PHYSICAL location Also answer b and c | | | | | | | | | |
| PHYSICAL LOCATION b. If location cannot be described by street name and number, give as much information as possible such as name of shopping center, street intersection, highway number or distance from nearest town, etc. Street name and number | | | | | | | | | |
| Place (City or village, etc.) State ZIP code | | | | | | | | | |
| b. Is this business establishment located WITHIN the LEGAL boundaries of the city, village, etc., which you indicate is its PHYSICAL location? 1 <input type="checkbox"/> YES 2 <input type="checkbox"/> NO | | | | | | | | | |
| c. In what county is this business establishment PHYSICALLY located? County | | | | | | | | | |
| Item 2 - EMPLOYER IDENTIFICATION NUMBER a. Is the Employer Identification (E.I.) Number printed in the upper right of the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941? <input type="checkbox"/> YES <input type="checkbox"/> NO → Enter current E.I. number (9 digits) | | | | | | | | | |
| b. Did this establishment also use any other Employer Identification (E.I.) Number during 1972? <input type="checkbox"/> YES → Enter E.I. number or numbers (9 digits) <input type="checkbox"/> NO | | | | | | | | | |
| Item 3 - PERIOD OPERATED IN 1972 a. Was this establishment in business at the end of 1972? 1 <input type="checkbox"/> YES 2 <input type="checkbox"/> NO b. How many months during 1972 did you own this establishment? 031 | | | | | | | | | |
| Important - Please read Dollar figures should be reported as illustrated. Please be careful to enter your figures in the correct columns. See example below: EXAMPLE: If figure is \$1,125,628.28 → PREFERRED method 1 125 628 Acceptable method 1 125 628 | | | | | | | | | |
| Item 4 - DOLLAR VOLUME OF BUSINESS IN 1972 Include in line "a" all sales of merchandise (whether or not payment was received in 1972); all other receipts from customers for services, including repair, maintenance, delivery, and installation charges; and all receipts from carrying charges or other charges and credit. | | | | | | | | | |
| a. Sales of merchandise and other receipts from customers, including sales and excise taxes collected 040 Mil. Thou. Dol. | | | | | | | | | |
| b. Does the entry in "a" include sales taxes and excise taxes collected from customers? 1 <input type="checkbox"/> YES 2 <input type="checkbox"/> NO 041 | | | | | | | | | |
| c. If "NO," how much (if any) did you forward to taxing agencies for such taxes? 042 Mil. Thou. Dol. | | | | | | | | | |
| d. Of the amount in line "a," what percent was for products manufactured by you at this location? 046 Percent % | | | | | | | | | |
| Item 5 - PAYROLL AND EMPLOYMENT Lines a and b - Report the gross earnings paid to employees prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and savings bonds. Include in gross earnings all wages, salaries, commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind. If a corporation, include salaries of officers; if an unincorporated concern, exclude payments to proprietors or partners. Line c - Be sure to include all persons on paid sick leave, paid holidays, and paid vacation during the pay period indicated, as well as those actually working. If a corporation, include officers; if an unincorporated concern, exclude proprietors or partners. | | | | | | | | | |
| a. Total ANNUAL payroll in 1972 before deductions 060 Mil. Thou. Dol. | | | | | | | | | |
| b. Payroll for the FIRST QUARTER of 1972 061 Mil. Thou. Dol. | | | | | | | | | |
| c. Number of paid employees for the pay period including March 12, 1972 062 Number | | | | | | | | | |
| Item 6 - COMPANY ORGANIZATION a. Is the first digit of your Census File Number (imprinted in the address box) a zero (0)? 1 <input type="checkbox"/> YES - Answer b, c, and d 2 <input type="checkbox"/> NO - SKIP to Item 7 | | | | | | | | | |
| b. Is this company owned or controlled by another company? 1 <input type="checkbox"/> YES 2 <input type="checkbox"/> NO Enter the company name and address (street name and number, city, State, ZIP code) and E.I. number. If more space is needed to list companies, attach a separate sheet providing same information required below. | | | | | | | | | |
| c. Does this company own or control any other company or companies? 1 <input type="checkbox"/> YES 2 <input type="checkbox"/> NO Owned or controlled company E.I. No. (9 digits) | | | | | | | | | |
| d. YOUR BUSINESS LOCATIONS (1) At how many locations did you operate this business during 1972? (Include all selling or service locations and any other facilities such as warehouses, administrative offices, etc.) Number of locations If more than one location, complete (2) below. | | | | | | | | | |
| (2) List each location (including main location). If more space is needed, attach separate sheet providing same information required below. | | | | | | | | | |
| Census use only | Physical address of business location (Street name and number, city, State, ZIP code) (a) | Census use only | Kind of business at this location (b) | Sales and receipts (c) Mil. Thou. Dol. | Annual payroll (d) Mil. Thou. Dol. | Number of employees * (e) | | | |
| 070 | 1. | 071 | | 072 | 073 | 074 | | | |
| 070 | 2. | 071 | | 072 | 073 | 074 | | | |
| 070 | 3. | 071 | | 072 | 073 | 074 | | | |
| 070 | 4. | 071 | | 072 | 073 | 074 | | | |
| TOTAL (Totals should equal entries in items 4a and 5a and 5c) | | | | | | | | | |
| Item 7 - SOURCE OF SALES OR RECEIPTS List below the principal lines of merchandise sold, kinds of construction work done, products manufactured or mined, or services performed and indicate the approximate percentage each was of your total receipts (item 4a) in 1972. | | | | | | | | | |
| Lines of merchandise sold, types of construction activity, types of services, and products manufactured or mined Percentage of total receipts shown in item 4a | | | | | | | | | |
| Item 8 - SALES OR RECEIPTS BY CLASS OF CUSTOMER Report the approximate percentage of your total 1972 sales or receipts for each class of customer. | | | | | | | | | |
| a. General public (household consumers and individuals) 262 % | | | | | | | | | |
| b. Builders, contractors, applicators 263 % | | | | | | | | | |
| c. Other retailers 264 % | | | | | | | | | |
| d. Wholesale organizations 265 % | | | | | | | | | |
| e. Institutional, industrial, commercial, professional and farm users (for use in farm production) and government 266 % | | | | | | | | | |
| f. Other (Specify) 267 % | | | | | | | | | |
| Item 9 Name of person to contact regarding this report Address (if different from label address) Telephone Area code Number Extension | | | | | | | | | |
| CERTIFICATION This report is substantially accurate and covers the period from _____ to _____ Signature of authorized person Title Date | | | | | | | | | |

* Report number of paid employees for the pay period including March 12, 1972.

APPENDIX C -Continued

PENALTY FOR FAILURE TO REPORT

DUE DATE: February 15, 1973

Form Approved: O.M.B. No. 41-S71102

NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT
If calendar year records are not available, fiscal year reports for the periods ending between October 31, 1972 and February 28, 1973 are acceptable. If book figures are not available, carefully prepared estimates are acceptable. If filing by due date causes an undue burden, a request for an extension of time should be sent to the above address. Please mention the 11-digit Census File Number in the upper left of the address box if you write regarding this report.
This report should cover ONLY the establishment identified in the address box.
(Please correct any error in name and address including ZIP code)

NOTICE—Response to this inquiry is required by law. Title 13, U.S.C. (a)(1). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

In correspondence pertaining to this report please refer to this Census File Number

Employer Identification Number

ITEM 1 NAME AND PHYSICAL LOCATION OF ESTABLISHMENT
The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that the data can be tabulated in the correct geographic area.

a. Name of this establishment, IF DIFFERENT from that appearing in the address box. Name

b. Is your business establishment PHYSICALLY located at the address shown in the address box of this form?
☐ YES—Proceed to c and d ☐ NO—Enter PHYSICAL location Also answer c and d

If location cannot be described by street name and number, give as much information as possible such as name of shopping center, street intersection, highway number or distance from nearest town, etc.

Street name and number

Place (city or village, etc.) State ZIP code

c. Is this business establishment located WITHIN the LEGAL boundaries of the city, village, etc., which you indicate is its PHYSICAL location? ☐ Yes ☐ No

d. In what county is your business establishment PHYSICALLY located? County

ITEM 2 EMPLOYER IDENTIFICATION NUMBER

a. Is the Employer Identification (EI) Number printed in the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941? ☐ Yes ☐ No—If "No," enter the currently assigned EI number here (9 digits)

b. Did this establishment also use any other Employer Identification (EI) Number during 1972? ☐ Yes—If "Yes," enter EI number(s) (9 digits) ☐ No

ITEM 3 LEGAL FORM OF ORGANIZATION OF COMPANY OPERATING THIS ESTABLISHMENT (MARK ONE)

010 ☐ 1 Individual proprietor ☐ 8 Co-op (cooperative association), corporate or noncorporate
☐ 2 Partnership ☐ 9 Other—Specify _____
☐ 3 Corporation (Do NOT mark if any form of cooperative association)

ITEM 4 PRINCIPAL ACTIVITY OF THIS ESTABLISHMENT IN 1972
Mark the ONE item that BEST describes the PRINCIPAL activity of this establishment. If none applies, mark item (j) and enter a description of your principal activity. MARK ONE ITEM ONLY.

011 ☐ 1 a. Centralized administration (i.e., supervisory functions of a central, home, general, branch, divisional or district office) ☐ 3 c. Warehousing ☐ 4 f. Trading stamp redemption
☐ 2 b. Management and other supporting services (e.g., purchasing or buying office, accounting office, legal office, public relations office, etc.) ☐ 7 d. Chainstore warehousing (i.e., a combination of administrative and warehousing activities described in a, b, and c) ☐ 8 g. Selling
☐ 2 e. Research, development, and testing ☐ 9 h. Repair service
☐ 9 i. Electronic data processing
☐ 9 j. Other _____

ITEM 5 PRINCIPAL ACTIVITIES OF YOUR COMPANY SERVICED BY THIS ESTABLISHMENT IN 1972

a. Does this establishment perform the above described management, general administrative functions, or other supporting services primarily for establishments of your company (rather than for other business firms or for the general public)? ☐ 012 1 Yes—Complete items 5b, c, and d ☐ 2 No—Skip to item 6

b. Does this establishment perform these management and administrative functions or services for all establishments of your company? ("Your company" refers to the parent firm and all its subsidiaries under common ownership or control.) ☐ 013 1 Yes ☐ 2 No

c. Mark the principal kind of business or industrial activity of the establishments of your company that are managed or serviced by this central office or auxiliary.

014 ☐ 1 Minerals extraction, quarrying, production, or exploration ☐ 3 Construction (including general contracting, subcontracting, home building, and land subdividing and developing)
☐ 2 Manufacturing (fabricating, assembling, or processing materials into new products; also includes publishing and printing) ☐ 4 Manufacturer sales branches or other wholesale operations
☐ 5 Retail stores
☐ 6 Other—Describe _____

d. List in order of importance, the principal products made, kinds of retail or wholesale business operated, types of services rendered, or construction activities performed by the establishments that are managed or serviced by this central office or auxiliary.
(1) _____ (3) _____
(2) _____ (4) _____

IMPORTANT—Figures for dollars should be reported in thousands. If you wish you may report to the nearest dollar. In either case, please be careful to enter your figures in the correct columns.

EXAMPLE: If payroll is \$1,125,628

| | Mil- lions 000 | Thou- sands 000 | Dol- lars 000 |
|-------------------------|----------------------|-----------------------|---------------------|
| PREFERRED method . . . | 1 | 125 | 628 |
| Acceptable method . . . | 1 | 125 | 628 |

ITEM 6 PAYROLL AND EMPLOYMENT AT THIS ESTABLISHMENT DURING 1972

a. Payroll—Report the payroll of persons employed at this establishment, including its traveling personnel. Do not include the payroll of employees working in or from other establishments of your company, however, even though paid from this location. (The number and payroll of such employees should be included in the 1972 Census reports for the establishments at which they were actually employed.)

b. Employment by function—Report the number of employees employed at this establishment according to the principal functions performed during the pay period including March 12, 1972.

Where records do not provide actual employee counts in terms of the functions listed, estimates of the approximate number in each are acceptable. Those persons performing a variety of functions should be reported in their primary activity during that pay period, or allocated on some other reasonable and consistent basis (e.g., by converting the total number of man-hours or man-days expended during the pay period into the average number of employees in each activity).

a. Payroll during 1972. (Enter the total wages, salaries, bonuses, commissions, and other remuneration paid to employees of this establishment during 1972, before payroll deductions)

Key Mil. Thou. Dol.

050

b. Employment by function for pay period including March 12, 1972

Key Number of employees

(1) Centralized administration (e.g., various management functions of a general, home, or district office) 051

(2) Research, development, and testing 052

(3) Warehousing 053

(4) Sales to customers directly from this location 054

(5) Trading stamp redemption 055

(6) Electronic data processing 056

(7) Other—Specify 057

(8) TOTAL NUMBER OF EMPLOYEES (Sum of lines 1 through 7) 058

c. Were the employees and payroll reported above also reported in any other 1972 Census establishment report form of your company i.e., in the Census Forms MA-, MC-, CB-, or CC-series)? ☐ Yes—If "Yes," please give the 11-digit CENSUS FILE NUMBER of that report ☐ No

| ITEM 7 SALES MADE BY THIS ESTABLISHMENT DURING 1972 TO CUSTOMERS OUTSIDE YOUR COMPANY | | Key | Mil. | Thou. | Dols. |
|--|--|---|------|--|----------------------------|
| <p>a. Report all sales made by this establishment during 1972 (merchandise sales, receipts for services, and other business receipts) to customers outside your company. Include excise taxes and sales taxes paid directly to taxing agencies. Exclude intracompany transfers to other domestic establishments of your company; however, include export transfers to your foreign subsidiaries. Exclude sales to outside customers made by OTHER establishments of your company, even though billed centrally by this establishment. (Report such sales on the 1972 Census forms of these other establishments.)</p> | | a. Sales made by this establishment during 1972 to customers outside your company | | | |
| | | 060 | | | |
| b. List principal products sold or services rendered by this establishment to customers outside your company, and their approximate percent of 1972 sales and receipts, as reported in item 7a above. | | | | | |
| Principal products sold or services rendered | | Percent of sales and receipts in 1972 | | Principal products sold or services rendered | |
| (1) | | % | | (3) | |
| (2) | | % | | (4) | |
| | | | | % | |
| | | | | % | |
| ITEM 8 BILLINGS BY THIS ESTABLISHMENT IN 1972 TO RETAIL STORES OF YOUR COMPANY | | Key | Mil. | Thou. | Dols. |
| <p>Report at cost value all merchandise billed by this establishment in 1972 to retail stores of your company. Include all billings, whether or not the merchandise was shipped directly by the supplier to your retail stores or shipped from this establishment. Exclude purchases made directly by your individual stores. Exclude billings to establishments other than your retail stores. Exclude sales to retail stores of other companies, and franchise sales (which should be reported in item 7a above.)</p> | | Total billings by this establishment in 1972 to retail stores of your company | | | |
| | | 065 | | | |
| ITEM 9 INVENTORIES AT BEGINNING AND END OF 1972 | | Key | Mil. | Thou. | Dols. |
| Report all inventories of this establishment at current cost (if feasible), rather than sales price. Exclude inventories reported by other establishments of your company on their 1972 Census establishment forms. | | Value of inventories of this establishment: | | | |
| | | 068 | | | |
| | | 069 | | | |
| ITEM 10 CAPITAL EXPENDITURES FOR THIS ESTABLISHMENT DURING 1972 (EXCLUDE LAND AND MINERAL RIGHTS) | | Key | Mil. | Thou. | Dols. |
| <p>Report all capital expenditures actually made during 1972 for this establishment, including major alterations, capitalized repairs and improvements. "Capital expenditures" refer to all costs that are chargeable to property accounts for which depreciation or amortization accounts are ordinarily maintained. Include the cost of all improvements and new construction at this establishment which were in progress but had not been completed at the end of 1972. Include expenditures made by your company (or any of its subsidiaries) for structures which, upon completion, were or are to be sold and leased back to this establishment. Include transfers of used plant and equipment to your establishment from other establishments of your company. Exclude the cost of land and mineral rights. Exclude the cost of maintenance and repairs charged as current operating expense. Exclude capital expenditures made by outside owners of property rented or leased to this establishment. Exclude capital expenditures made by this establishment for other locations of your company.</p> | | Type of capital expenditures: | | | |
| | | 070 | | | |
| | | 071 | | | |
| | | 072 | | | |
| | | 074 | | | |
| ITEM 11 CHANGES IN GROSS VALUE OF DEPRECIABLE ASSETS OF THIS ESTABLISHMENT DURING 1972 | | Key | Mil. | Thou. | Dols. |
| <p>Report the changes in gross value of depreciable assets of this establishment for which depreciation or amortization accounts are ordinarily maintained. "Gross value" represents the acquisition cost (original cost or other basis) to your company of such depreciable assets. Include all depreciable assets (buildings, structures, machinery, equipment, etc.) and all amortizable fixed assets. Include all improvements and new construction "in progress" during 1972 but not yet completed at the end of 1972. Also include the value of depreciable assets owned by this establishment but leased or rented to other companies. Include the value of depreciable assets owned by your company or any of its subsidiaries but "leased" to this establishment. Exclude the value of depreciable assets at other locations of your company (or any of its subsidiaries) for which this establishment maintains records.</p> | | a. Gross value of depreciable assets at BEGINNING of 1972 | | | |
| | | 075 | | | |
| | | 076 | | | |
| | | 078 | | | |
| | | 079 | | | |
| ITEM 12 RENTAL PAYMENTS MADE FOR THIS ESTABLISHMENT DURING 1972 (EXCLUDE LAND) | | Key | Mil. | Thou. | Dols. |
| <p>Report all rental payments made or accrued during 1972 to OUTSIDE firms which own the plant and equipment rented or leased by this establishment. Exclude rental payments made by this establishment to your parent company or any of its subsidiaries. (The gross value of such company-owned assets should be reported in item 11, however, as if actually owned by this establishment.) Exclude rental payments made by this establishment for plant and equipment located at other establishments of your company. In reporting rents paid (or equivalent charges) for use of "Buildings and structures," exclude separately identified fees for leasing of land (such as ground rents). Under "Machinery and equipment," be sure to include rental payments, (or equivalent charges), for use of transportation equipment, office equipment, computer systems, passenger cars, and all other types of machinery or equipment.</p> | | Rental payments made for this establishment: | | | |
| | | 085 | | | |
| | | 086 | | | |
| | | 087 | | | |
| ITEM 13 COST OF RESEARCH AND DEVELOPMENT PERFORMED AT THIS ESTABLISHMENT DURING 1972 | | Key | Mil. | Thou. | Dols. |
| <p>"Cost" should include all costs incurred at this establishment during 1972 to support research and development activities (i.e. wages and salaries; direct materials costs; services and supporting costs; and an appropriate share of depreciation and overhead). If this establishment performed research and development for the Federal government or for other companies on contract during 1972, include the total amount charged for such work performed. (Also, report such receipts in item 7 above.) If this establishment performed research and development for your own company or its subsidiaries, include the total amount of company funds provided for such work performed.</p> | | Type research and development performed: | | | |
| | | 095 | | | |
| | | 096 | | | |
| | | 097 | | | |
| | | 098 | | | |
| ITEM 14 WAREHOUSE STORAGE SPACE, AS OF DECEMBER 31, 1972 | | Square feet | | | |
| <p>If you reported any employees in item 6b, line (3) "Warehousing," complete this item. Exclude floor space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc.</p> | | Occupiable floor space (under roof) - occupied and unoccupied - of this establishment | | | |
| | | 099 | | | |
| Remarks | | | | | |
| | | | | | |
| ITEM 15 | | Name and address (including ZIP code) of person to contact regarding this report | | | Telephone |

| 1972 ECONOMIC CENSUSES COMPANY SUMMARY REPORT | | In correspondence pertaining to this report please refer to CENSUS FILE NO. Name and address—Please correct errors in name, address and ZIP code. ENTER street and number if not shown. | | | | | | | | | | | | |
| PLEASE COMPLETE THIS FORM AND RETURN TO BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130 | | If filing by due date causes an undue burden, a request for an extension of time should be sent to the above address. | | | | | | | | | | | | |
| PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT | | | | | | | | | | | | | | |
| <p>This form will provide you and the Bureau of the Census with a systematic means for assuring that all domestic activities of your company and its subsidiaries have been accounted for in the 1972 Censuses of Business (i.e., Retail Trade, Wholesale Trade, Selected Services), Construction, Manufactures, and Mineral Industries. For the purposes of this report, "domestic" activities should include all 50 States and the District of Columbia. It should not include activities of your firm in foreign countries. (Note—Your Puerto Rico activities, if any, should be included in items 2 and 3 below but excluded from items 4 through 11 on page 2 of this report.)</p> <p>Please complete Form NC-K1, "Company Summary Report," after you have prepared all required 1972 Census establishment reports for your company and its subsidiaries, but before you return these completed reports to the Bureau of the Census. Preparing this Company Summary Report prior to returning the completed establishment reports may help you to discover more readily and to correct promptly any omission or duplication of reports for those establishments which should be covered in the 1972 Economic Censuses. In turn, this will speed up the Census Bureau's processing of your company report forms and will minimize any correspondence regarding coverage.</p> | | | | | | | | | | | | | | |

FORM NC-K1

Page 2

INSTRUCTIONS FOR SELECTED COMPANY STATISTICS FOR 1972 (ITEMS 4 - 11)

Please report the following items on a consolidated basis for the DOMESTIC ACTIVITIES of your company and ALL its subsidiaries. Do not include foreign activities, if any, (except for reporting foreign assets in item 11). Consolidate all domestic activities, whether or not covered in the 1972 Census by individual report forms. If calendar year records are not available, fiscal year reports for the periods ending between October 31, 1972 and February 28, 1973 are acceptable. If book records are not available, enter your best estimates. Before completing these items, please read the detailed instructions.

IMPORTANT - Figures for dollars should be reported in thousands. If you wish you may report to the nearest dollar. In either case, please be careful to enter your figures in the correct column.

EXAMPLE: If payroll is \$1,125,628

PREFERRED method . . .
Acceptable method . . .

| Mil- lions (000) | Thou- sands (000) | Dol- lars (000) |
|------------------------|-------------------------|-----------------------|
| \$ 1 | 125 | |
| \$ 1 | 125 | 628 |

| ITEM | COMPANY PAYROLL DURING 1972 | Key | Mil. | Thou. | Dol. |
|---------------|--|-----------|--------|-------|------|
| | Report total wages, salaries, bonuses, commissions, and other remuneration paid by your company and its subsidiaries at domestic establishments and facilities during 1972 before payroll deductions. | | | | |
| | Total company payroll during 1972 | 050 | \$ | | |
| ITEM 4 | COMPANY SALES AND RECEIPTS DURING 1972 | | | | |
| | Report consolidated net sales and business receipts of your company and its subsidiaries during 1972. Exclude domestic intra-company transfers; exclude sales BY foreign subsidiaries; exclude non-operating income. Include sales to customers OUTSIDE your company; include excise taxes and sales taxes paid by your company directly to Federal, State, or local taxing agencies; include export transfers TO your foreign subsidiaries. | | | | |
| | a. Net company sales and business receipts during 1972 | 060 | | | |
| | b. Does the entry in 5a above include excise and sales taxes paid directly to taxing agencies? 1 <input type="checkbox"/> 2 <input type="checkbox"/> | 061 | | | |
| | c. If "No," report here the amount of such taxes paid by your company and its subsidiaries during 1972 | 062 | | | |
| ITEM 5 | CAPITAL EXPENDITURES DURING 1972 (EXCLUDE LAND AND MINERAL RIGHTS) | | | | |
| | Report all capital expenditures actually made during 1972 by your company and its subsidiaries for all domestic establishments and facilities. "Capital expenditures" refer to all costs that are chargeable to fixed assets accounts of your company for which depreciation or amortization accounts are ordinarily maintained; include major alterations, capitalized repairs and improvements; include expenditures made in 1972 for establishments under construction but not yet in operation. Exclude capital expenditures made by owners of property rented or leased by your firm and its subsidiaries; but include expenditures made by your firm and its subsidiaries for structures which, on completion, were or are to be sold and leased back by your firm. Exclude cost of land, mineral rights, and cost of maintenance and repair charged as current and operating expenses; exclude capital expenditures by subsidiaries in foreign countries. | | | | |
| | Type of capital expenditures | | | | |
| | a. New structure and new additions to plant | 070 | | | |
| | b. New machinery and new equipment | 071 | | | |
| | c. Used plant, machinery, and equipment acquired from others | 072 | | | |
| | d. Capitalized development and exploration of mineral properties | 073 | | | |
| | e. TOTAL CAPITAL EXPENDITURES DURING 1972 (Sum of lines a, b, c, and d) | 074 | | | |
| ITEM 6 | CHANGES IN DEPRECIABLE ASSETS DURING 1972 | | | | |
| | Report the value of depreciable assets of your company and its subsidiaries for which depreciation or amortization accounts are ordinarily maintained. "Gross value" represents the acquisition cost (original cost or other basis) to your company of such fixed depreciable assets. Include depreciable assets for all domestic establishments and facilities. Exclude depreciable assets of your company and its subsidiaries in foreign countries. These assets should be reported in item 11c below. Include all depreciable assets (buildings, structures, equipment, etc.) and amortizable fixed assets. Exclude depletable assets (land, timber, and mineral rights) and non-fixed assets (inventories, cash, accounts receivable, etc.) These assets should be reported in item 11b below. Include in the value of assets all improvements and new construction that were "in-progress" but not yet completed at the end of 1972. Also include the value of depreciable assets (machinery, equipment, buildings, structures, computer equipment, etc.) owned by your company and its subsidiaries, but leased or rented to other companies. | | | | |
| | a. Gross value (original cost or other basis) of depreciable assets owned by your company, as of BEGINNING of 1972 | 075 | | | |
| | b. Total capital expenditures DURING 1972 (Copy figure from item 6e.) | 076 | | | |
| | c. Other acquisitions by your company (by merger, exchange of stock, etc.) of depreciable assets DURING 1972 (if not included in line b above) | 077 | | | |
| | d. Deductions from depreciable assets DURING 1972 (i.e., gross value of assets sold, retired, scrapped, or destroyed; and other adjustments) | 078 | | | |
| | e. Gross value (original cost or other basis) of depreciable assets owned by your company, as of END of 1972 (Lines a + b + c - d) | 079 | | | |
| ITEM 7 | CHANGES IN DEPRECIATION RESERVES DURING 1972 | | | | |
| | In line a include total depreciation reserves as of the beginning of 1972 for the assets included in item 7, line a. In line b include additions made to depreciation reserves during 1972 for assets owned at the beginning of the year or acquired during the year. Exclude depletion reserves and reserves for intangible assets. Exclude depreciation of assets held in foreign countries. Such assets should be reported in item 11c below. | | | | |
| | a. Accumulated depreciation as of BEGINNING of 1972 | 080 | | | |
| | b. Depreciation charges against assets DURING 1972, (including charges against those acquired or completed during the year) | 081 | | | |
| | c. Additions charged to other accounts DURING 1972 | 082 | | | |
| | d. Deductions from reserves for retirements, renewals, and replacements during 1972 | 083 | | | |
| | e. Accumulated depreciation as of END of 1972 (Lines a + b + c - d) | 084 | | | |
| ITEM 8 | RENTAL PAYMENTS MADE DURING 1972 (EXCLUDE LAND) | | | | |
| | Report all rental payments made or accrued during 1972 to other firms which own the plant and equipment rented or leased by your company and its subsidiaries. In reporting rents paid (or equivalent charges) for use of "Buildings and structures," exclude separately identified fees for leasing of land (such as ground rents). Under "Machinery and equipment," be sure to include rental payments (or equivalent charges) for use of production machinery, office equipment, computer systems, passenger cars, trucks, materials handling equipment, and all other types of machinery or equipment. | | | | |
| | Rental payments made by your company | | | | |
| | a. For use of BUILDINGS AND STRUCTURES (excluding land) | 085 | | | |
| | b. For use of MACHINERY AND EQUIPMENT (including furniture and fixtures) | 086 | | | |
| | c. TOTAL RENTAL PAYMENTS DURING 1972 (Sum of lines a and b) | 087 | | | |
| ITEM 10 | INVENTORIES, AS OF BEGINNING AND END OF 1972 | | | | |
| | Report all inventories of your company and its subsidiaries at the beginning and end of 1972 on a comparable basis. Inventories should include: finished products; work-in-process; and materials, supplies, fuels, etc. Exclude inventories of subsidiaries in foreign countries. In aggregating the inventories of your company and its subsidiaries, report value on a current cost basis, if feasible, otherwise at book value. | | | | |
| | Value of inventories: | | | | |
| | a. All inventories, as of BEGINNING of 1972 | 088 | | | |
| | b. All inventories, as of END of 1972 | 089 | | | |
| ITEM 11 | TOTAL COMPANY ASSETS, AS OF END OF 1972 | | | | |
| | Report the balance sheet assets of your company and its subsidiaries on a consolidated basis. Lines a and b should include only domestic assets of your company and its subsidiaries. Line c should include all assets of your company and its subsidiaries in foreign countries, regardless of type. Report all foreign assets on a NET basis. (Line c) | | | | |
| | Type of company assets: | | | | |
| | a. Net value of depreciable assets (Should equal line 7e less 8e) | 090 | | | |
| | b. All other domestic assets (i.e., inventories, cash, accounts receivable, land, etc.) | 091 | | | |
| | c. Net foreign assets (i.e., assets located in foreign countries) | 092 | | | |
| | d. TOTAL COMPANY ASSETS, AS OF END OF 1972 (Sum of lines a, b, and c) | 093 | | | |
| Remarks | | | | | |
| ITEM 12 | Name and address (including ZIP code) of person to contact regarding this report | Telephone | | | |
| | | Area code | Number | Ext. | |
| CERTIFICATION | This report is substantially accurate and covers the period from _____ to _____ | | | | |
| | Signature of authorized person | Title | | | Date |

APPENDIX C - Continued

PENALTY FOR FAILURE TO REPORT

FORM MC-36B (3602)

U.S. DEPARTMENT OF COMMERCE
SOCIAL AND ECONOMIC STATISTICS ADMIN.
BUREAU OF THE CENSUS

1972 CENSUS OF MANUFACTURES
SWITCHGEAR AND SWITCHBOARD APPARATUS
AND INDUSTRIAL CONTROL

Please complete and return this form as soon as possible after receipt to:

BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47130

PLEASE READ ACCOMPANYING INSTRUCTION SHEET AND INSTRUCTIONS WITH EACH ITEM BEFORE COMPLETING

If book figures are not available, carefully prepared estimates are acceptable. Complete every item. Please enter the 11-digit number in the Census File Number space provided at the top of all odd-numbered pages.

If filing by due date causes an undue burden, a request of an extension of time should be sent to the above address. Please mention the 11-digit Census File Number in the upper left of the address box if you write regarding this report.

DUE DATE: FEBRUARY 15, 1973

Form Approved O.M.B. No. 41-571102

NOTICE - Response to this inquiry is required by law (Title 13 U.S. Code) § 19, the same law. Your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

In correspondence pertaining to this report, please refer to this Census File Number

Employer Identification Number

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

ITEM 1A PHYSICAL LOCATION OF MANUFACTURING ESTABLISHMENT

The purpose of this inquiry is to determine the place (city, county, etc.) where your plant is actually located (which may differ from the mailing address) so that the data can be tabulated in the correct geographic area.

a. Is your manufacturing establishment physically located at the address shown in the address box in the right hand corner of this form?

☐ NO - Enter PHYSICAL location here

Also answer b and c

*Street name and number

Place (City or village, etc.)

State ZIP code

☐ YES

Answer b and c

*If location cannot be described by street name and number, give as much information as possible such as street intersection, highway number or distance from nearest town, etc.

b. Is your manufacturing establishment located WITHIN the LEGAL boundaries of the city, village, etc., which you indicate in its PHYSICAL location?

☐ YES ☐ NO

c. In what county is your manufacturing establishment PHYSICALLY located?

County

ITEM 4 Plant man-hours of production workers by quarter

| Key | Jan. through March | Apr. through June | July through September | Oct. through December | TOTAL MAN HOURS (Item 4) |
|-----|--------------------|-------------------|------------------------|-----------------------|--------------------------|
| 3 | | | | | |

ITEM 5 Cost of materials, resales, fuels, electricity, and contract work

| Key | Cost of materials, parts, components, containers, etc., consumed | Cost of products bought and resold | Cost of fuels consumed | Cost of purchased electricity | Cost of contract work done for you by others on your materials | TOTAL COST (Item 5) |
|-----|--|------------------------------------|------------------------|-------------------------------|--|---------------------|
| 3 | | | | | | |

ITEM 6 Inventories of this establishment

| Key | JANUARY 1, 1972 | | | DECEMBER 31, 1972 | | |
|-------------------------------------|-----------------|-------------|------------|-------------------|-------------|------------|
| | Mil. \$000 | Thou. \$000 | Dol. \$000 | Mil. \$000 | Thou. \$000 | Dol. \$000 |
| a. Finished products | | | | | | |
| b. Work-in-process | | | | | | |
| c. Materials, supplies, fuels, etc. | | | | | | |
| d. TOTAL INVENTORIES (Item 6) | | | | | | |

ITEM 7 Capital expenditures during year (exclude land)

| Key | New structures and new additions to this plant (Exclude land) | New machinery and new equipment | Used plant and used equipment acquired from others | TOTAL CAPITAL EXPENDITURES (Item 7) |
|-----|---|---------------------------------|--|-------------------------------------|
| 3 | | | | |

ITEM 1B EMPLOYER IDENTIFICATION NUMBER(S)

a. Is the Employer Identification (E.I.) Number in the upper right of the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941?

☐ YES ☐ NO - Enter currently assigned E.I. number

b. Did this establishment also use any other Employer Identification (E.I.) Number(s) during 1972?

☐ YES - Enter E.I. number or numbers ☐ NO

IMPORTANT - Dollar and man-hour figures should be reported in thousands. If you wish, you may report to the nearest unit. Please be careful to enter your figures in the correct columns.

EXAMPLE - If the payroll is \$1,125,628:

| Mil. \$000 | Thou. \$000 | Dol. \$000 |
|------------|-------------|------------|
| 1 | 126 | |
| 1 | 125 | |

• PREFERRED METHOD

Acceptable method

ITEM 2 Number of employees

| Key | Number of production workers during pay period including 12th of month | a. March | b. May | c. August | d. November | e. Sum of lines a-d | f. Average number (divide line e by 4, omit fractions) | g. All other employees (pay period including March 12th) | h. TOTAL EMPLOYMENT (Sum of lines f and g, Item 2) |
|-----|--|----------|--------|-----------|-------------|---------------------|--|--|--|
| 3 | | | | | | | | | |

ITEM 3A Payrolls

| Key | Production workers' wages | All other salaries and wages | TOTAL PAYROLL (Item 3A) |
|-----|---------------------------|------------------------------|-------------------------|
| 3 | | | |

ITEM 3B Not applicable to this form.

| CHECKS to assure a complete and accurate report: The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report: <div style="float: right; text-align: right;"> (1) Review the report carefully to see that no items are omitted for the year being covered. (2) Calculate and enter figures for the four "reasonableness" checks below, and review the results. (3) Correct your report for any errors you find and explain unusual figures in "Remarks." For most manufacturing establishments, the figures computed usually fall within the ranges indicated. </div> | | | | | | | | | | | | | | | | | | | | | | | |
| "Reasonableness" checks | Calculation required for each check | Figures for 1972 | Usual range | | | | | | | | | | | | | | | | | | | | |
| a. Average hourly wages per production worker | Item 3Aa (Production workers' wages) ÷ item 4e (Total man-hours) | \$ | \$1 - \$10 | | | | | | | | | | | | | | | | | | | | |
| b. Hours worked per week per production worker | Item 4e (Total man-hours) × 20 ÷ item 2f (Average number of production workers) | Hrs. | 20 - 60 | | | | | | | | | | | | | | | | | | | | |
| c. Salaries and wages per dollar of shipments | Item 3Ac (Total payroll) ÷ item 18 (Total value of shipments) | ¢ | 05¢ - 95¢ | | | | | | | | | | | | | | | | | | | | |
| d. Materials cost per dollar of shipments | Item 5f (Total materials cost) ÷ item 18 (Total value of shipments) | ¢ | 05¢ - 95¢ | | | | | | | | | | | | | | | | | | | | |
| e. Is the total for Value of Shipments (item 18) greater than the sum for payroll (item 3Ac) plus total Cost of Materials, etc. (item 5D)? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks" | | | | | | | | | | | | | | | | | | | | | | | |
| Remarks | | | | | | | | | | | | | | | | | | | | | | | |

Item 16—INDUSTRIAL WATER USE DURING 1972

Please indicate the total quantity of water used by this establishment during the calendar year 1972. Include both fresh and brackish water. Include water recirculated and reused. Report the total annual consumption of water; do NOT report hourly, daily, weekly, or monthly rates of consumption.

(MARK ONE BOX ONLY)

☐ 348 ☐ Under 20 million gallons
☐ 4 ☐ 20 to 99 million gallons
☐ 5 ☐ 100 million gallons or more

Item 17—CONSUMPTION OF SELECTED MATERIALS DURING 1972
Report separately for each listed material that was actually consumed or put in production during 1972.

Section I—CONSUMPTION OF MATERIALS PURCHASED OR RECEIVED FROM OTHER ESTABLISHMENTS

INSTRUCTIONS

Report delivered cost of the individual items below which were consumed or put in production during 1972. (See General Instructions (item 5) for valuation.)

Include materials owned by this establishment but consumed by other establishments to make products for this establishment under contract.

(Report cost of contract work in item 5e; and the value of the products produced in item 18.)

Exclude materials owned by others used in this plant to make products for other establishments under contract or on commission. However, report receipts for this contract work in item 18.

If you consumed some of the specified material but less than \$5,000 worth of the item, enter an (X) in column (E) and include the value with "All other materials, etc."—Code 970099.

| Line number | Materials, parts, and supplies (A) | Census material code (B-1) | Unit of measure for quantities (B-2) | Consumption of purchased materials and of materials received from other establishments of your company | | | | |

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING THE 1972 CENSUS OF MANUFACTURES FORMS

GENERAL INSTRUCTIONS

A separate Census report is required for each business location. Therefore, based on Census records, a report form is provided for each location which your company operated in 1972.

For purposes of the Census, a manufacturing establishment is defined as a single physical location where manufacturing operations are performed (e.g., a factory, mill, or plant). Thus a separate report is required for different physical locations even though the establishments may be engaged in the same line of manufacturing.

Please note that establishments engaged in the following activities are also considered to be manufacturing for the purposes of this Census: Poultry dressing; milk pasteurizing and bottling; seafood, fresh packaged or frozen; apparel jobbing and contracting; logging camps and logging; sawmills; printing; publishing—book, magazine, periodical, etc.; manufacturing and delivering ready-mixed concrete; machine shops, including those operating on a job order basis; job casting, stamping, machining; plating, galvanizing, polishing materials owned by others, etc.; ship and boat repairing.

In completing this report, a limited amount of prorating or estimating is acceptable if book records are not readily available. Include all the activities conducted within the establishment; e.g., manufacturing, fabricating, processing,

and assembling; maintenance of plant and equipment; receiving, shipping, warehousing, storage; research; recordkeeping; health, safety, cafeteria, and other services.

Each report should cover the calendar year 1972. However, a report is required even if the establishment operated only part of the year. If your book records are not on a calendar year basis, carefully prepared estimates will be acceptable. If reporting on a calendar year basis will require considerable additional costs, and your fiscal year covers at least 10 months of the calendar year 1972 (i.e., ends between October 31, 1972 and February 28, 1973) you may report on a fiscal year basis. However, all employment, payroll, and man-hour figures should relate to the calendar year rather than the fiscal year. (Calendar year payroll records should be available from your tax records.)

In the certification, enter the exact dates of the period covered by the report. If the ownership changed during the year, complete the report only for that part of 1972 in which your company owned and operated the establishment. Report in item 13 the appropriate information on changes in ownership or operations.

If additional report forms are needed, write to the Bureau of the Census, 1291 East Tenth Street, Jeffersonville, Indiana 47130. Be sure to describe the type of activity of the establishments for which the additional report forms are requested.

INSTRUCTIONS FOR ITEMS 1 THROUGH 14

- **Item 1A and 1B—Physical Location and Employer Identification Number**—Accurate and precise information on the physical location of each establishment is needed in order to prepare the tabulations of manufacturing activity in each State, county, and city. Each establishment has tentatively been coded geographically based on the street address in the mailing label, on the assumption that the physical location and mailing address are the same. Please be certain to complete item 1A, part a, if this is not so. Item 1A, part b, and part c, must be completed even if the physical location and the mailing address are identical. Although the system devised by the Census Bureau codes adequately to State and county in all instances, in many localities it cannot clearly distinguish an address that is in the city from one that is out of the city.

Be certain to enter in item 1B, the current Employer Identification Number if it is different from the one printed in the address label. This information is needed so that the Census Bureau can avoid sending duplicate report forms for the same location. Our file of new business formations is based on the new employer identification numbers issued each year. However, we exclude mailing report forms to new employer identification numbers if we identify them as belonging to existing respondents.

(Definitions of employees and payrolls used to calculate withholding taxes generally may be followed in completing items 2 and 3A, Employment and Payrolls.)

- **Item 2—Number of Employees**—Report employees at the establishment who worked or received pay for part of the pay period including the 12th of specified months (March, May, August, and November). Include all persons on paid sick leave, paid holidays, and paid vacation during these pay periods; exclude members of Armed Forces and pensioners carried on your active rolls. Include officers at this establishment, if a corporation; if an unincorporated concern, exclude proprietor, or partners.

- **Items 2a–2d—Number of Production Workers**—Workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., powerplant), recordkeeping, and other closely associated services. Exclude proprietors and partners.

- **Item 2g—All Other Employees**—Nonproduction personnel, including those engaged in the following activities: supervision above working foreman level, sales (including driver salesmen), sales delivery (truck drivers and helpers), advertising, credit, collection, installation and servicing of own product, clerical and routine office functions, executive, purchasing, finance, legal, personnel (including cafeteria, etc.), professional and technical. Exclude proprietors and partners.

- **Item 3A—Payrolls**—Report the gross earnings paid in the calendar year to employees at the establishment prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and saving bonds.

Include in gross earnings commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind.

Include salaries of officers of this establishment, if a corporation; if an unincorporated concern, exclude payments to proprietors or partners.

Exclude payments to agricultural employees, fishermen, members of the Armed Forces, and pensioners carried on your active payroll.

- **Item 4—Plant Man-Hours of Production Workers by Quarter**—Include all man-hours worked or paid for, except hours paid for vacations, holidays, or sick leave. If an employee elects to work during the vacation period, report only actual hours worked by such employee. Overtime hours should be reported as actual hours worked, not straight-time equivalent hours.

- **Item 5—Cost of Materials**—Report total cost of the materials actually consumed or put in production during the year.

If there are no records of consumption, purchases may be reported instead for minor items. This can also be done for major items if purchases do not differ significantly from the amounts actually used. Where consumption of major items differs significantly from purchases, consumption may be estimated by adding beginning inventories to the amount purchased and subtracting ending inventories.

Cost is delivered cost—i.e., the amount paid or payable after discounts and including freight and other direct charges incurred by the establishment in acquiring the materials.

Include all materials received for consumption; i.e., purchases from other companies, transfers from other establishments of your own company, withdrawals from inventories.

If the establishment produces items subsequently consumed in further production, report cost of original materials consumed only.

- **Item 5a—Cost of Materials, Parts, Components, Containers, etc., Consumed**—The delivered cost figures reported in item 5a should cover all raw materials, containers, scrap, and supplies, etc., which were: (1) put into production, (2) used as operating supplies, (3) used in repair and maintenance. Item 5a should be consistent with the data in item 17.

Include also cost of materials owned by you but consumed by other companies to make products for your establishment under contract. (The value of these products should be reported in item 18). Amounts paid to other companies for such contract work should be reported on Line 5e and should include freight in and out.

Include only physical goods used or put into production.

Exclude services used or overhead charges, such as advertising, telephone, telegram and cable, insurance, developmental and research; services of engineering, management, marketing and other professional consultants, etc., unless charges for such services are included in the prices paid for materials.

Exclude also overhead items such as depreciation charges against plant and equipment; rent and rental allowances; interest payments, royalties, and patent fees.

Exclude materials, supplies, machinery, and equipment which were used in the construction of new structures or additions to your plant, or new machinery and equipment, and which are chargeable to fixed assets accounts. Exclude products purchased and resold without further manufacture or processing or assembly; their costs should be included in item 5b.

- **Item 5b—Cost of Products Bought and Resold**—Report the cost of all products bought and resold in the same condition as when purchased and not made part of another product manufactured by this establishment. (Total sales value of all products resold is to be reported in item 18 on the line for resales.)

- **Item 5c—Cost of Fuels Consumed**—Report the total amount actually paid or payable during the year for all fuels consumed for heat, power, transportation, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a by-product of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam.

- **Item 5d—Cost of Purchased Electricity**—Report the total amount actually paid or payable for electric energy purchased during the year from other companies, or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.

- **Item 5e—Cost of Contract Work Done for You by Others on Your Materials**—If any contract work was done by others on materials furnished by your establishment, report the total payments made during the year for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in item 5a.

- **Item 6—Inventories of This Establishment at Beginning and End of Year**—Inventories should be reported at approximate current costs, if feasible; otherwise at book values. It is important that inventories should be reported on a comparable basis at the beginning and end of year.

- **Item 7—Capital Expenditures During Year (Exclude expenditures for land)**—Include all cost actually incurred during 1972 chargeable to the fixed assets accounts and of the type for which depreciation or amortization accounts are ordinarily maintained.

- **Item 7a—New Structures and New Additions to Plant (Exclude expenditures for land)**—Report total expenditures during the year for new construction (whether constructed on contract or by your own forces), major alterations, capitalized repairs, and improvement of buildings (including all new elevators, cranes, heating and ventilating equipment essentially a part of the buildings), other fixed structures (such as blast furnaces, brick kilns, fractionating towers, shipways, and similar types of structures), and site improvements (such as roads, docks, tracks, parking lots, fences, utilities).

- **Item 7b—New Machinery and New Equipment**—Report total expenditures at this establishment for new production machinery and equipment and other new machinery and equipment. Include replacements as well as additions to capacity. Include all new motors, lathes, punch presses and similar machinery and equipment for use in production, as well as all new office machines and fixtures, furniture, cafeteria and dressing room furnishings, automobiles and trucks, and other similar equipment. Report value of improvement and capitalized repairs to machinery and equipment, whether repairs and improvements were purchased or made by employees of your company.

- **Item 7c—Used Plant and Used Equipment Acquired From Others**—Report total expenditures at this establishment for old or existing plants and for second-hand equipment acquired from others (including the U.S. Government). Include at approximate market value machinery or equipment transferred from other plants of your company.

- **Items 13 and 14—Change in Ownership or Company Affiliation and Organization**—Please complete these items fully if pertinent. Accurate completion of these items will avoid unnecessary correspondence, as well as reduce the possibility of your receiving more than one report form for the manufacturing activity at this location.

RETURN THIS COPY TO Bureau of the Census
Jeffersonville, Indiana 47130

ITEM 1 a. Is this establishment still located in the State, county, and place shown below? (If blank or incomplete, please complete (1) through (4).)
☐ YES - Skip to part b ☐ NO - Correct or complete lines (1) through (4)

(1) Number and street
(2) City, village, or other place State ZIP code
(3) County (4) If you corrected lines 1, 2, or 3, give year moved to new location. 19

Complete a, b, and c.

b. Is this establishment physically located WITHIN THE LEGAL BOUNDARIES of the city, village, or other place?
☐ YES ☐ NO

c. Is the Employer Identification (EI) Number printed in the address box the SAME as that used for this establishment on your latest Employer's Quarterly Federal Tax Return, Treasury Form 941?
☐ YES ☐ NO - Enter currently assigned EI No. here

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Be sure to read Instruction Manual before completing report. Report items 3-11 in THOUSANDS (Example: If total payroll is \$215,166, enter \$215).

| 23 CHECKS to assure a complete and accurate report | | | | | |
| The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report: (1) Review the report carefully to see that no items are omitted for the year being covered. (2) Calculate and enter figures for the four "reasonableness" checks below, and review the results. (3) Correct your report for any errors you find and explain unusual figures in "Remarks." For most manufacturing establishments, the figures computed usually fall within the ranges indicated. | | | | | |
| "Reasonableness" checks | | Calculation required for each check | | Figures for 1972 Usual range | |
| a. Average hourly wages per production worker | Item 3Ae (Production workers' wages) ÷ item 4e (Total man-hours) | \$ | | \$1 - \$10 | |
| b. Hours worked per week per production worker | Item 4e (Total man-hours) × 20 ÷ item 2f (Average number of production workers) | Hrs. | | 20 - 60 | |
| c. Salaries and wages per dollar of shipments | Item 3Ac (Total payroll) ÷ item 9p (Total value of shipments) | ¢ | | 05¢ - 95¢ | |
| d. Materials cost per dollar of shipments | Item 5f (Total materials cost) ÷ item 9p (Total value of shipments) | ¢ | | 05¢ - 95¢ | |
| e. Is the total for Value of Shipments (item 9p) greater than the sum for Payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks" | | | | | |
| f. Is the gross value of depreciable assets (item 10c) minus total capital expenditures (item 7d), within 3% of gross depreciable assets at the beginning of the survey year? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks" | | | | | |
| Remarks | | | | | |

APPENDIX C—Continued

| | | | |
|--|---|---|--|
| ITEM 5 BILLINGS BY THIS ESTABLISH- MENT DURING CALENDAR YEAR 1974 | Enter below the specified classes of billings of this establishment for calendar year 1974 | | |
| | Billings for products and services (including progress billings) | Item code | Value (Thousands of dollars) |
| | Manufacture and assembly | 61 | \$ |
| | Construction and conversion | 62 | |
| | Overhaul, repair, and renovation | 63 | |
| | Alteration and modification | 64 | |
| | Research and development | 65 | |
| | Other billings | 66 | |
| | Total billings for products and services | 67 | |
| | Increase or decrease in unbilled costs of work in progress | 68 | |
| | TOTAL EARNED REVENUE → | 69 | |
| ITEM 6 COSTS DURING CALENDAR YEAR 1974 | Types of costs incurred | Item code | Cost (Thousands of dollars) |
| | Materials, supplies, and parts used | 71 | \$ |
| | Wages and salaries (same as item 3, code 49, col. G) | 72 | |
| | Contractual services and other costs | 73 | |
| | TOTAL COSTS INCURRED → | 79 | |
| | VALUE ADDED (Census use only) | 81 | |
| ITEM 7 CHECKS TO ASSURE A COMPLETE AND ACCURATE REPORT (Please complete this item after you have answered all items on this report.) | The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report: a. Review this report carefully to see that no items are omitted. b. Calculate and enter the four "reasonableness" checks (described below), then review the resulting figures. c. Correct your report for any errors you find; explain unusual figures in "Remarks" section. | | |
| | "Reasonableness" checks | Calculation required for each check | Resulting figures for 1974 |
| | (1) Average hourly wages per Wage Board employee | Item code 41, column G (Wages paid Wage Board employees) ÷ Item code 59, column B (Total estimated man-hours) | \$ |
| | (2) Man-days per year per Wage Board employee | Item code 59, column A (Wage Board man-days in thousands) X 1,000 ÷ item code 41, column F (Average number of Wage Board employees) | Man-days |
| | (3) Wages and salaries per dollar of earned revenue | Item code 72, (Wages and salaries of civilian employees) ÷ item code 69 (Total earned revenue) | \$ |
| | (4) Is the total earned revenue (item code 69, total) greater than total costs incurred (item code 79, total)? <input type="checkbox"/> Yes <input type="checkbox"/> No (If "No," please explain in "Remarks" section.) | | |
| ITEM 8 REMARKS PERTAIN- ING TO THIS REPORT | | | |
| PERIOD OF REPORT | This report covers the period from _____ to _____ | | |
| ITEM 9 | Name of person to be contacted regarding this report | Address (Street and number, city, State, ZIP code) | Telephone (Area code, number, extension) |
| ITEM 10 | CERTIFICATION — This report is substantially accurate and has been prepared in accordance with instructions. | | |
| | Name of establishment | Address (Street and number, city, State, ZIP code) | |
| | Signature of authorized official | Title | Date |

APPENDIX C-Continued

| | | | | | |
|--|--|---|--|--|--|
| PENALTY FOR FAILURE TO REPORT Form CB-313 (8110) | | U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION BUREAU OF THE CENSUS | | DUE DATE: FEBRUARY 15, 1973 Form Approved: O.M.B. No. 41-571116 | |
| 1972 CENSUS OF BUSINESS MANUFACTURERS' SALES BRANCHES AND SALES OFFICES ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES | | NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By law, your report to the Census Bureau is confidential. It may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process. | | In correspondence pertaining to this report, please refer to this Census File Number: CB-313 (3110) | |
| Please complete this form and RETURN TO: BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130 | | KEEP THIS COPY FOR YOUR FILES PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS (Please correct any error in name and address including ZIP code) | | | |
| Important - Please read a. Please answer the questions on this form and return it as soon as you can, but not later than February 15, 1973. If filing by the due date causes an undue burden, a request for extension should be sent to the address shown above. b. This report should cover the calendar year 1972. If book figures are not available, carefully prepared estimates are acceptable. c. A separate report is required for each sales branch and sales office operated during 1972. Each sales office without stock should be reported separately as well as each sales branch carrying stocks of merchandise from which deliveries are made to customers. Sales branches and sales offices located at plants or administrative offices should be reported on this form where separate records are available, or if substantially accurate reports can be prepared. Employment, payroll, inventories, and operating expenses reported here should not be included in manufacturer's plant report (MC series). Sales, however, will to some extent duplicate shipments on your plant reports. d. This report should cover only the establishment identified in the address box. | | Census use only: 010 011 012 013 | | | |
| Item 1 - PHYSICAL LOCATION OF BUSINESS ESTABLISHMENT a. The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that data can be tabulated in the correct geographic area. b. Is this business establishment PHYSICALLY located at the address shown in the address box of this form? <input type="checkbox"/> YES - Answer b and c <input type="checkbox"/> NO - Enter PHYSICAL location Also answer b and c c. In what county is this business establishment PHYSICALLY located? <input type="checkbox"/> YES <input type="checkbox"/> NO | | PHYSICAL LOCATION (Enter if different from address shown above) If location cannot be described by street name and number, give as much information as possible such as name of shopping center, street intersection, highway number or distance from nearest town, etc. Street name and number: _____ Place (City or village, etc.): _____ State: _____ ZIP code: _____ County: _____ | | | |
| Item 2 - EMPLOYER IDENTIFICATION NUMBER a. Is the Employer Identification (E.I.) Number printed in the upper right of the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941? <input type="checkbox"/> YES <input type="checkbox"/> NO - Enter current E.I. number (9 digits) b. Did this establishment also use any other Employer Identification (E.I.) Number during 1972? <input type="checkbox"/> YES <input type="checkbox"/> NO - Enter E.I. number or numbers (9 digits) | | Number of months: 030 031 | | | |
| Item 3 - PERIOD OPERATED IN 1972 a. Was this establishment in business at the end of 1972? If establishment was inactive during December 1972 due to seasonal or part-time operations, answer "Yes" unless it was not owned by you at the end of the year. <input type="checkbox"/> YES <input type="checkbox"/> NO | | b. How many months during 1972 did you own this establishment? 030 031 | | | |
| Important - Please read Dollar figures should be reported as illustrated. Please be careful to enter your figures in the correct columns. See example below: EXAMPLE: If figure is \$1,125,628.28 | | PREferred method 1 125 Acceptable method 1 125 628 | | | |
| Item 4 - DOLLAR VOLUME OF BUSINESS Line a - Total net sales after deducting returns, allowances, and discounts, but include excise taxes and sales taxes. Include all company sales credited to the sales branch or sales office even though billings may be made from a central or district office and shipments made from a plant or central warehouse. Also include, at wholesale prices, sales or transfers to any retail stores you may own. Include any receipts from services rendered to customers, but do not include any receipts derived from sources other than customers. Line b - Approximate percentage of sales (item 4a), if any, accounted for by goods produced by your company, your parent company, or companies corporately affiliated with your company. Line c - Total receipts, if any, from work done by your employees at construction site including the value of any goods you put in place that became a permanent part of the structure or building. Amounts reported here should also be included in items 4a and 17. | | a. TOTAL SALES and other operating receipts in 1972 b. What percent of sales represents products produced by your company? c. Did this establishment do any construction work for others in 1972? If "YES," report the value of construction receipts during 1972 | | | |
| Item 5 - PAYROLL AND EMPLOYMENT Lines a and b - Report the gross earnings paid in calendar year to employees prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and savings bonds. Include in gross earnings all wages, salaries, commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind. If a corporation, include salaries of officers; if an unincorporated concern, exclude payments to proprietors or partners. Line c - Be sure to include all persons on paid sick leave, paid holidays, and paid vacation during the pay period indicated, as well as those actually working. If a corporation, include officers; if an unincorporated concern, exclude proprietor or partners. | | a. Total ANNUAL payroll in 1972 before deductions b. Payroll for the FIRST QUARTER of 1972 c. Number of paid employees for the pay period including March 12, 1972 | | | |
| Item 6 - Not applicable to this form | | Item 7 - OPERATING EXPENSES AND INVENTORIES Line a - Include in addition to other operating expenses, the payroll of this establishment and the pro rata share of any general office expense. Do not include the cost of merchandise. Do not include income taxes and excise taxes. Unincorporated businesses should not include withdrawals by owners or part owners. Line b - Report inventories of goods for sale at cost value rather than sale price. Include goods owned by you and consigned to others, but not goods of others in your possession. Report inventories as of the date specified, or nearest inventory date. | | | |
| Item 8 - SALES BY CUSTOMER CLASSES Report the approximate percentage of your 1972 sales to each of the classes of customers. If book figures are not available, entries for these lines should represent your best approximations. Percentages should add to 100. | | a. To institutional, industrial, commercial, professional, and farm users b. To governmental bodies (Federal, State, and local governments) c. To contractors and builders d. To public utilities e. To repair shops f. To retailers g. To wholesale organizations h. To household consumers and individual users i. Export sales j. TOTAL (Lines a through i should add to 100) | | | |

Please continue on page 2

APPENDIX C - Continued

Page 2

| Item 9 - EMPLOYMENT BY PRINCIPAL ACTIVITY | | Approximate number of employees | |
|---|--|---------------------------------|--|
| Distribute here the employees reported in item 5 according to their principal activity during the pay period including March 12, 1972. Each employee should be counted only once, according to his or her principal activity. | | 121 | |
| Line a - Selling employees - All employees primarily engaged in selling merchandise or services (traveling salesmen, house or telephone salesmen, etc.) | | 122 | |
| Line b - Office, clerical, warehouse employees - Employees primarily engaged in office, clerical, and warehouse work for this establishment (see instruction for central administration). | | 123 | |
| Line c - Central administration - Employees primarily engaged in performing various management, accounting, clerical, warehousing, etc., services for other establishments of your company. | | 124 | |
| Line d - Manufacturing (processing merchandise) | | 125 | |
| Line e - Other (Describe) | | 126 | |
| Line f - TOTAL (Should equal item 5c) | | 126 | |

| Item 10 - Not applicable to this form | |
|--|--|
| Item 11 - WAREHOUSE, STOCKROOM, AND OTHER INVENTORY STORAGE SPACE, DECEMBER 31, 1972 | |

| Line a - Please indicate if this item is applicable to this establishment by marking either "YES" or "NO." | | 140 | |
|--|--|---|--|
| a. Did you have warehouse, stockroom, or other inventory storage space on December 31, 1972? | | 1 <input type="checkbox"/> YES - Go to b 2 <input type="checkbox"/> NO - SKIP to item 17 | |
| Line b - Exclude floor space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc. | | Square feet Mil. Thou. 000 | |
| Line c - Net piling space is space for storing commodities - inside space measured from wall to wall and from floor to ceiling, less space for ventilation (putting of the piling), coils, aisles, posts, sprinklers, etc. | | Cubic feet Mil. Thou. 000 | |
| Line d - Refrigerated (net piling) space 50 degrees Fahrenheit or below in this establishment | | 142 | |

| Item 12 through 16 - Not applicable to this form | |
|--|--|
| Item 17 - ANALYSIS OF SALES BY PRODUCTS OR COMMODITY LINES | |

| Enter below, the total dollar sales of each product sold by this branch or office. Products are listed (at a less detailed level) in the same sequence as they appear on the reporting forms for your manufacturing plants. | | Report value of products bought and sold as well as value of products produced by your company and sold by this establishment. If figures based on records are not available, give best possible approximations. | |
|---|-----------------|--|-----------------------------------|
| Description | Census use only | Estimated sales during 1972 | Code |

APPENDIX D. Authority for Census: Title 13, United States Code

(Codification of August 1954 amended by Acts of August 1957, September 1960, and June and October 1962, and of August 1964)

Collection and publication: Five-year periods (131)

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses... in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof.

Geographic scope of censuses (191a)

Each of the censuses authorized by this chapter (other than censuses of population) shall include each State, the District of Columbia, Alaska, Hawaii, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Censuses of population shall include all geographic areas referred to in the preceding sentence. Inclusion of other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

Wrongful disclosure of information (214)

Whoever, being an employee referred to in subchapter II of chapter 1 of this title, having taken and subscribed the oath of

office, publishes or communicates, without the written authority of the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, any information coming into his possession by reason of his employment under the provisions of this title, shall be fined not more than \$1,000 or imprisoned not more than two years, or both.

Failure to answer questions affecting companies, businesses, religious bodies, and other organizations: False answers (224)

Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, whether such request be made by registered mail, by certified mail, by telegraph, by visiting representative, or by one or more of these methods, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule prepared and submitted to him under the authority of this title, shall be fined not more than \$500 or imprisoned not more than sixty days, or both; and if he willfully gives a false answer to any such questions, he shall be fined not more than \$10,000 or imprisoned not more than one year, or both.
